Stories of Life in the Workplace Larry Browning, George H. Morris, 2012-04-27. Addressing both renowned theories and standard applications, *Stories of Life in the Workplace* explains how stories affect human practices and organizational life. Authors Larry Browning and George H. Morris explore how we experience, interpret, and personalize narrative stories in our everyday lives and how these communicative acts impact our social aims and interactions. In pushing the boundaries of how we perceive narrative and organization, the authors include stories that are broadly applicable across all concepts and experiences. With a perception of narrative and its organizational application, chapters focus on areas such as pedagogy, therapy, project management, strategic planning, public communication, and organizational culture. Readers will learn to differentiate and gain an in-depth understanding of perspectives from varying narrators, recognize how stories are constructed and used in organizations, and modify the stories they tell. View stories as a means to promote an open exchange of creativity. By integrating a range of theories and practices, Browning and Morris write for an audience of narrative novices and scholars alike. With a distinctive approach and original insight, *Stories of Life in the Workplace* shows how individuality, developing culture, and the psychology of the self are constructed with language and how the acceptance of one's self is accomplished by reaffirming and rearranging one's story.

[Trademark 2.0](#) Todd Stephens, 2007 This book will discuss several dimensions of building a personal Trademark. Unlike other books on this subject, this book will focus on the How: an individual can move from local labor to global talent in the new world defined as Enterprise 2.0. Enterprise 2.0 commonly refers to organizations that operate under an open communication model where interaction and communication is encouraged from the top down. Enterprises are accomplishing this feat by not only addressing the technology requirements of Web 2.0 but the social and organizational changes required to sustain a competitive advantage. In the 2.0 environment, these physical trademarks have been replaced by more meta-physical ones such as logos, slogans, and reputation. Still, like every organization, we must learn to build both the physical and meta-physical trademarks in order to compete in the next 25 years. **Marketing Management** Philip Kotler, Kevin Keller, Mairead
