Windows to the Sun Earl G. Ingersoll, Virginia Hyde, 2009 The Cambridge sources embody the most recent textual scholarship and critical references include theoreticians like Gilles Deleuze Theodor Adorno and Judith Butler

New Windows into the Universe Arnold Hanslmeier, 2025-07-01 The observation capabilities of modern astrophysics are constantly increasing They range from optical telescopes and space telescopes in the infrared to radio telescopes and from gravitational wave detectors to neutrino observatories While some focus on light in space others examine the smallest particles underwater or measure disturbances in spacetime smaller than the diameter of a proton This book offers an exciting and comprehensive overview of our technical capabilities to explore the universe It is just as suitable as a foundation for a lecture in astronomy or astrophysics as it is for reading by those interested in the natural sciences

The Physicist's Conception of Nature Jagdish Mehra, 2012-12-06 The fundamental conceptions of twentieth century physics have profoundly influenced almost every field of modern thought and activity Quantum Theory Relativity and the modern ideas on the Structure of Matter have contributed to a deeper understanding of Nature and they will probably rank in history among the greatest intellectual achievements of all time The purpose of our symposium was to review in historical perspective the current horizons of the major conceptual structures of the physics of this century Professors Abdus Salam and Hendrik Casimir in their remarks at the opening of the symposium have referred to its origin and planning Our original plan was to hold a two week symposium on the different aspects of five principal themes 1 Space Time and Geometry including the structure of the universe and the theory of gravitation 2 Quantum Theory including the development of quantum mechanics and quantum field theory 3 Statistical Description of Nature including the discussion of equilibrium and

non equilibrium phenomena and the application of these ideas to the evolution of biological structure 4 The Structure of Matter including the discussion in a unified perspective of atoms molecules nuclei elementary particles and the physics of condensed matter and finally 5 Physical Description and Epistemology including the distinction between classical and quantum descriptions and the epistemological and philosophical problems raised by them An Imaginative Glimpse Joas Adiprasetya,2013-08-21 In contrast to the popular notion that the doctrine of the Trinity hinders Christians from engaging with the reality of religious diversity this book argues that the doctrine is the best way of constructing contemporary theology of religions An Imaginative Glimpse reexamines three prominent Trinitarian theologians of religions Raimundo Panikkar Gavin D Costa and S Mark Heim and proposes a fresh and creative model by bringing the classical idea of perichoresis to its present day multifaith situation Opening a new alternative in both Trinitarian theology and theology of religions Adiprasetya's approach adds a distinctive contribution to the ongoing and challenging discussion in both fields By using perichoresis imaginatively as a multidimensional category for multiple religious participations within the Trinity Adiprasetya argues that the model is able to respect all religions on their own terms while at the same time being faithful to the Christian standpoint *Focused Genograms* Rita DeMaria,Gerald R. Weeks,Gerald Weeks,Larry Hof,2013-06-17 The interpersonal relationships that make up family life are a complex web between many individuals spanning several generations at one time This web is further complicated by the influence of other factors such as culture and gender It can be a daunting task for a therapist to unravel this tangle and understand the specific dynamics and individual development within the family The Multifocused Family Genogram MFG is a powerful tool that allows the therapist to record and structure these different elements that make up the family system By combining the Basic Genogram the Family Map and several Focused Genograms the MFG provides a clear picture of dynamic family history that aids in individual and family assessment Focused Genograms provides a thorough account of the use of MFGs in family therapy and practice The authors present a clinically useful method for collecting the information in key areas of individual and family functioning needed to create Focused Genograms In addition the authors carefully explain the diagnostic use and therapeutic applications of this tool The book is supplemented by extensive examples of Focused Genograms Family Maps and Time Lines used in MFG construction Suggested readings listed at the close of each chapter provide links between techniques fully described in the book and other therapeutic techniques beyond the scope of this work A thorough presentation of innovative methods for using Focused Genograms makes this an important text for students of marriage and family therapy as well as an indispensable resource for professionals **Euclid's Window** Leonard Mlodinow,2010-09-28 Through Euclid's Window Leonard Mlodinow brilliantly and delightfully leads us on a journey through five revolutions in geometry from the Greek concept of parallel lines to the latest notions of hyperspace Here is an altogether new refreshing alternative history of math revealing how simple questions anyone might ask about space in the living room or in some other galaxy have been the hidden engine of the highest

achievements in science and technology Based on Mlodinow s extensive historical research his studies alongside colleagues such as Richard Feynman and Kip Thorne and interviews with leading physicists and mathematicians such as Murray Gell Mann Edward Witten and Brian Greene Euclid s Window is an extraordinary blend of rigorous authoritative investigation and accessible good humored storytelling that makes a stunningly original argument asserting the primacy of geometry For those who have looked through Euclid s Window no space no thing and no time will ever be quite the same *Gravitational Waves: A New Window to the Universe* Rosalba Perna,Bruno Giacomazzo,2021-07-02 *Windows Developer's Journal* ,1999

Mind And Reality: The Space-time Window Wolfram Schommers, 2014-09-22 The relationship between mind and reality is usually perceived as an event that takes place in reality and producing simultaneously an internal image in the mind So it takes place twice so to speak and there is a one to one correspondence between the two events Within this conception matter is embedded in space and time and can be designated as container principle This monograph emphasizes that the well known philosopher Immanuel Kant denied this principle and he stated that reality is principally not recognizable to a human being and modern biological evolution seems to lead exactly to Kant s point of view Within the theory of evolution man s image about reality in mind does not have to be complete and true in the sense of a precise reproduction and it is relatively easy to recognize that even space and time should not be elements of reality outside Within this conception only a certain part of reality which the human being needs for mastering life is projected onto space and time and we come to the so called projection principle Then spacetime defines the window to reality leading to a number of exciting and essential questions some of which are discussed in this monograph As is known current physics is mainly based on the container principle But this monograph proposes that the projection principle is obviously more suitable and could help to solve open ended questions as for example in connection with the nature of time the particle wave duality the cosmological constant etc Regarding the statistical behavior of matter Einstein s statement God does not play dice has to be seen in a new light but also Feynman s general viewpoint on quantum theory that it cannot be understood by man However conventional quantum theory is obviously not a consistent framework as per the projection principle The term world equation is critically probed in this monograph

Sakharov And Power: On The Other Side Of The Window Boris Altshuler, 2022-11-08 This book is a testimony to the amazing life of Andrei Sakharov 1921 1989 the great scientist and great man the creator of the most terrible weapon in the history of mankind and at the same time the Nobel Peace Prize Winner Sakharov s life is one might say an exciting detective story a chain of incredible events not accidental however but dictated by the genius and fortitude of the protagonist The theme of this book acquired new striking meanings after the Sakharov documents of the KGB of the USSR and of the Politburo of the Soviet ruling Communist Party were declassified I m not on the top floor I m next to the top floor on the other side of the window Sakharov once joked referring to the top floor of political power This joke accurately reflects the uniqueness of his status which has become his destiny Andrei Sakharov is a giant among thought leaders who have shaped the fate of mankind This book is an important commemoration of his 100th birthday to summarize his creative experience of producing miracles which will help to find constructive solutions to the challenges of the 21st century The peculiarity of this book is that the main storyteller is Sakharov himself it collects the most significant quotes from his memoirs alternate with vivid memories of people who knew him offering documentaries and explanations
