equilibrium as a result of human activity While the soil subsurface system has in many cases been affected by human impact the effects of chemical contaminants on the actual matrix and properties have been largely neglected The major focus of the book is on changes to the soil subsurface matrix and properties caused by chemical pollution By integrating results available in the literature we observe that chemical pollutants may lead to the irreversible formation of a new soil subsurface regime characterized by a matrix and properties different than those of the natural regime In contrast to the geological time scales dictating natural changes to the matrix and properties of the soil subsurface system the time scale associated with chemical pollutant induced changes is far shorter and extends over a human lifetime scale The numerous examples presented in the book confirm that chemical contamination should be considered as an additional factor in the formation of a contemporary soil subsurface regime that is different than that of the pristine system

Agrochemicals in Soil and Environment

M. Naeem, Juan Francisco Jimenez Bremont, Abid Ali Ansari, Sarvajeet Singh Gill, 2022-06-28 This volume *Agrochemicals in Soil and Environment Impacts and Remediation* is a comprehensive collection of important literature on agrochemical contamination The main focus of this book is to point out undesirable changes in biological physical and chemical characteristics of agricultural soils and its impacts on global agricultural crop productivity Soil is one of the important resources of basic needs for our sustenance but due to various anthropogenic activities like urbanization and industrialization the soil is losing its basic quality characteristics Soil microorganisms water holding capacity minerals salts and nutrients are under the direct threat due to agrochemicals therefore agricultural sector is facing a serious challenge Lack of proper knowledge and luxurious applications of agrochemicals resulting into degradation and deterioration of soil quality loss of soil and crop productivity and threatening the food security Therefore it is imperative to develop indices indicators and soil parameters for the monitoring and impact assessment of agricultural contaminants Further biotic and abiotic stresses and their tolerance mechanisms in plants in relation to the soil contaminants such as toxic pollutants heavy metals inorganic and organic matters variety of pesticides insecticides herbicides agricultural runoffs and solid wastes and chemical fertilizers are also highlighted in this volume This book also discusses causes of reduced agriculture productivity and suggests sustainable measures such as plant based technologies bioremediation and nanotechnology that can be used to overcome the crop losses The book is interest to research students teachers agricultural scientists agronomists environmentalists as well as policy makers

Soil Remediation and Plants

Khalid Hakeem, Muhammad Sabir, Munir Ozturk, Ahmet Ruhi Mermut, 2014-08-29 The soil is being contaminated continuously by a large number of pollutants Among them heavy metals are an exclusive group of toxicants because they are stable and difficult to disseminate into non toxic forms The ever increasing concentrations of such pollutants in the soil are considered serious threats toward everyone s health and the environment Many techniques are used to clean eliminate obliterate or sequester these hazardous pollutants from the soil However these techniques can be costly labor intensive and often disquieting Phytoremediation is a simple cost

effective environmental friendly and fast emerging new technology for eliminating toxic heavy metals and other related soil pollutants Soil Remediation and Plants provides a common platform for biologists agricultural engineers environmental scientists and chemists working with a common aim of finding sustainable solutions to various environmental issues The book provides an overview of ecosystem approaches and phytotechnologies and their cumulative significance in relation to solving various environmental problems Identifies the molecular mechanisms through which plants are able to remediate pollutants from the soil Examines the challenges and possibilities towards the various phytoremediation candidates Includes the latest research and ongoing progress in phytoremediation *Advances in Human Growth Hormone Research* Salvatore Raiti,1973

Heavy Metal and Metalloid Contamination of Surface and Underground Water Abhik Gupta,2020-10-27 Heavy metal and metalloid

contamination of groundwater and surface water ecosystems involves important policy related and ethical issues besides its more well known scientific aspects Heavy Metal and Metalloid Contamination of Surface and Underground Water Environmental Policy and Ethical Issues has brought these three dimensions under a single volume The book presents an updated status of the nature and extent of heavy metal and metalloid contamination of water and discuss its future implications In Section I the book provides a state of the art review of research findings on entry storage and release human health risks and the uptake and accumulation by freshwater biota and the toxic effects experienced by them The book also provides information on the bioremediation of heavy metals and metalloids and the possible effects of climate change on their distribution and toxicity Section II of the book throws light on the policies and legislations adopted in several countries to deal with the vexed issue of metal contamination of waters in both historical and current perspectives Special emphasis has been given to the contamination of drinking water and its attendant implications for human health The book also treats the relevance and applications of Integrated Water Resources Management IWRM which forms the backbone of the water policies of several countries In Section III discussions focus on ethical issues rising out of heavy metal and metalloid contamination of water and on the different ethical approaches and principles in both indigenous and other societies Features A systematic overview of the major facets of heavy metal and metalloid contamination of water Compilation and analysis of the latest research in the subject area Ample case studies in all chapters that highlight specific problems Review of policy and legislation for the control of heavy metal pollution of water Water ethics in indigenous societies This book will be a vital resource for students and research scholars in the field of environmental science ecotoxicology and pollution studies

Mapping the Chemical Environment of Urban Areas Christopher C. Johnson,Alecos Demetriades,Juan Locutura,Rolf Tore Ottesen,2011-02-11 This comprehensive text focuses on the increasingly important issues of urban geochemical mapping with key coverage of the distribution and behaviour of chemicals and compounds in the urban environment Clearly structured throughout the first part of the book covers general aspects of urban chemical mapping with an overview of current practice and reviews of different aspects of the component methodologies The second part includes case histories from different urban areas around Europe authored by those national or academic institutions tasked with investigating the chemical environments of their major urban centers

Biomarkers of Toxic Metals Vanda Maria Falcão Espada Lopes de Andrade,2023-08-04 The current exposure of human populations to toxic metals makes the prevention and control of such exposures crucial Biomarkers are undoubtedly recognized as vital tools to achieve these goals This book is for researchers toxicologists physicians pharmacologists and those working in governmental regulatory agencies and other public health fields The first part of this book covers general aspects of biomarkers of toxic metals while parts 2 and 3 cover biomarkers of xenobiotic metals and essential metals with potential for toxicity respectively In part 4 novel approaches to metal biomarkers are focused

Handbook of Metal-Microbe Interactions and Bioremediation Surajit Das,Hirak Ranjan

Dash,2017-04-07 Around the World metal pollution is a major problem Conventional practices of toxic metal removal can be ineffective and or expensive delaying and exacerbating the crisis Those communities dealing with contamination must be aware of the fundamentals advances of microbe mediated metal removal practices because these methods can be easily used and require less remedial intervention This book describes innovations and efficient applications for metal bioremediation for environments polluted by metal contaminates
