Profit Beyond Measure H. Johnson, Anders Bröms, 2011-01-25 Waste has plagued almost every industrial age firm for the past century. In this powerfully argued alternative to conventional cost management thinking experts H. Thomas Johnson and Anders Bröms assert that any company can avoid the waste that is generated through excessive operating costs in the short run and excessive losses from market instability in the long run. To gain more secure levels of profitability management must simply change how it thinks about work and how it organizes work. Profit Beyond Measure details how two extremely profitable manufacturers Toyota and the Swedish truck maker Scania have rejected the traditional mechanistic mindset of managing by results that generates waste. Johnson and Bröms explain how Toyota and Scania achieve their legendary cost advantage through a revolutionary concept they call managing by means MBM. Instead of being driven to meet preconceived accounting targets the production systems of Toyota and Scania are governed by the three precepts that guide all living systems: self organization, interdependence, and diversity. Amid a wealth of new insights into Toyota's vaunted system Johnson and Bröms introduce the tools of MBM to show how design, production, and profitability analysis are done to customer order. They demonstrate that by following the principles that emulate life systems even a lean and profitable company can organize work to greatly lessen its long term earnings instability and sharply reduce its short run operating costs. Scania has achieved sixty five years of financial stability and longevity in the face of fierce competition. Toyota has amassed a market value since 1988 that has rivaled or sometimes surpassed the American Big Three automakers combined. The principles that Johnson and Bröms set forth in Profit Beyond Measure can guarantee the same richer longer life to any company that applies them.

The Marketing / Accounting

Interface Robin Roslender, Richard M.S. Wilson, 2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the *Journal of Marketing Management*

PRESENT SENSE Steve Morlidge,2019-10-04 In this provocative yet practical guidebook Steve Morlidge demonstrates why the approach and methods of performance reporting that all information professionals have been taught fails and what we need to do differently to help us make sense of the dynamic complex and data rich world in which we now live and work Reporting on performance should not be treated as worthy but dull requiring no more than routine comparisons of actual against targets This traditional approach is based on the false premise organisations can be managed as if they were a simple mechanical system operating in a predictable environment And the methods associated with it such as variance analyses and data tables that are used to measure and communicate performance are completely inadequate Instead Morlidge argues performance reporting should be reconceived as an act of perception conducted on behalf of the organisation helping to make sense of the sensory inputs data that it has at its disposal And to do so effectively performance reporters need to learn from and exploit the strengths of our own brains compensate for its weaknesses and communicate in a way that makes it easy for their audience s brains to assimilate Drawing on the latest insights from cognitive science in this book you will learn how to bring a dynamic perspective into performance reporting how to deploy a set of simple tools to help speared the signal from the noise inherent in large data sets and to make sound inferences how to set goals intelligently about the grammar of data visualization and how use it to design powerful and simple reports In this way information professionals are uniquely charged with the responsibility for creating the shared consciousness that is a prerequisite for organisations to effectively respond and adapt to their environments

PROMOTING CAPABILITIES TO MANAGE POSTTRAUMATIC STRESS Douglas Paton, John M. Violanti, Leigh M. Smith, 2003-01-01 This book provides a systematic review of the variables and mechanisms that underpin resilience and growth in professions who face a high risk of regular and repetitive exposure to adverse or hazardous events Given the inevitability of this exposure promoting the acceptance and practice of this paradigm is essential for facilitating the capability of emergency responders to adapt to and if possible to grow from adverse and hazardous experience By identifying salient dispositional cognitive group organizational and environmental predictors of resilience and articulating the mechanisms that link them to adaptive and growth outcomes emergency organizations will have the capacity to intervene prior to exposure to adverse events rather than waiting until after the event as is currently the norm This book thus adopts an approach that is fundamentally preventative in nature and offers practical suggestions to support the development of resilient capabilities By describing influences on this capability that cover the person the organization and factors external to the workplace it offers a more ecologically comprehensive

approach to those working in this area. In addition, it offers a more comprehensive framework for this work by drawing on constructs e.g. trust, empowerment that would ordinarily lie outside mainstream traumatic stress research. The contents of this book provide a theoretically and empirically rigorous knowledge base and intervention framework capable of mitigating negative reactions, facilitating adaptation in the face of adversity and enhancing the likelihood that adverse and traumatic work experiences will enrich the personal and professional lives of those who dedicate themselves to protecting and safeguarding others.
