Religion And Human Rights Competing Claims:

Religion and Human Rights Peter Juviler, Carrie Gustafson, 2016-07-01 Much has been written about the issue of religious freedom and church state relations The contributors to this book however take up another side of the question what has been the impact of religion on human rights Representatives from various religious traditions address a broad range of topics from environmental rights to the basic validation of human rights to the rights of women in India and Iran and within Orthodox Judaism to the global imposition of criminal justice to pressures for democratization within the Catholic Church in Latin America The six major essays along with their accompanying replies answer questions and raise issues in a provocative and compelling debate

Islam and the Challenge of Human Rights Abdulaziz Sachedina, 2009-11-05 In 1948 the General Assembly of the United Nations adopted and proclaimed the International Declaration of Human Rights a document designed to hold both individuals and nations accountable for their treatment of fellow human beings regardless of religious or cultural affiliations Since then the compatibility of Islam and human rights has emerged as a particularly thorny issue of international concern and has been addressed by Muslim rulers conservatives and extremists as well as Western analysts and policymakers all have commonly agreed that Islamic theology and human rights cannot coexist Abdulaziz Sachedina rejects this informal consensus arguing instead for the essential compatibility of Islam and human rights He offers a balanced and incisive critique of Western experts who have ignored or underplayed the importance of religion to the development of human rights contending that any theory of universal rights necessarily emerges out of particular cultural contexts At the same time he re examines the juridical and theological traditions that form the basis of conservative Muslim objections to human rights arguing that Islam like any culture is open to development and change Finally and most importantly Sachedina articulates a fresh position that argues for a correspondence between Islam and secular notions of human rights

Does Human Rights Need God? Elizabeth M. Bucar, Barbra Barnett, 2005-08-31 When the Universal Declaration of Human Rights was drafted in 1945 French Catholic philosopher Jacques Maritain observed We agree on these rights providing we are not asked why With the why the dispute begins The world since then has continued to agree to disagree fearing that an open discussion of the divergent rationales for human rights would undermine the consensus of the Declaration Is it possible however that current failures to protect human rights may stem from this tacit agreement to avoid addressing the underpinnings of human rights This consequential volume presents leading scholars activists and officials from four continents who dare to discuss the why behind human rights Appraising the current situation from diverse religious perspectives Jewish Protestant Orthodox Muslim Confucian and secular humanist the contributors openly address the question whether God is a necessary part of human rights Despite their widely varying commitments and approaches the authors affirm that an investigation into the why of human rights need not devolve into irreconcilable conflict Contributors Khaled Abou El Fadl Barbra Barnett Elizabeth M Bucar Jean Bethke Elshtain Robert P George Vigen Guroian Louis Henkin Courtney W Howland David Novak Sari Nusseibeh Martin Palou Robert A Seiple Max L Stackhouse Charles Villa Vicencio Anthony C Yu *The World's Religions after September 11* Arvind Sharma, 2008-11-30 This set is an unprecedented examination of religion s influence on modern life an honest assessment of how religion can either destroy us or preserve us and a thorough exploration of what steps might be necessary for all religions to join together as a force for good Convening on the fifth anniversary of the terrorist attack on the World Trade Center the global congress The World s Religions after September 11 explored the negative and positive possibilities of the religious dimensions of life The presentations from the congress have been pulled together in this set which addresses religion s intersection with human rights spirituality science healing the media international diplomacy globalization war and peace and more This comprehensive set includes contributions from such well known scholars of

religion as Arvind Sharma and a host of others from all the world's religious traditions This set is an unprecedented examination of religion's influence on modern life an honest assessment of how religion can either destroy us or preserve us and a thorough exploration of what steps might be necessary for all religions to join together as a force for good Because of the attack on the World Trade Center on September 11 2001 the very concept of religion underwent a paradigm shift Instead of standing for virtue and piety peace and harmony the word religion also came to be inextricably associated with evil aggression and terror People around the world began to question whether the religious and secular dimensions of modern life can be reconciled whether the different religions of the world can ever coexist in harmony Indeed the very future of religion itself has sometimes seemed to be uncertain or at least suspect

Public Theology in Law and Life Paul Babie, Brian Edgar, David Wilson, 2012-08-30 Public theology involves the application of biblical and theological principles outside the confines of the church and assesses their implications for wider society It examines both the theoretical structures of society the nature of secularity government globalisation pluralism and so forth and the myriad specific issues involved in daily life everything from sport to work place relations to economics Public theology is also very importantly a discipline that is practiced by the ordinary Christian as well as the academic and it is done in public with all the scrutiny that entails and in such a way that it communicates to non Christians although it remains a theological endeavour In a real sense it is theology for the world from the Word by the people of God The volume has a variety of contributors and includes an article on the role of public theology in Islam

Much has been written on the subject. This volume addresses it from a new perspective. It attempts to define some basis for constructive dialogue and interaction in the context of international law and more precisely in the context of participation of many Muslim States in the United Nations Convention on the Elimination of All Forms of Discrimination Against Women. Having discovered a constructive potential in both Islam and women's human rights, the author concentrates on the role which international law should play in promoting dialogue and constructive interaction. This is done mainly through analysis of the regime of reservations and of the practice of reservations developed in the context of Muslim States' participation in the CEDAW. The basic thesis defended is the following: Islam as articulated in the practice of States and women's human rights as reflected in international instruments are both results of human activity. Their analysis in this study reveals more commonalities than one might expect. International law should be more attentive to their voices and more innovative in using these commonalities in order to promote constructive dialogue between them and thus help to improve the situation of women suffering from discrimination and inequalities. *Civil Religion, Human Rights and International Relations* Helle Porsdam, 2012-01-01 This ground breaking book discusses whether human rights can be forged into a common set of transcendent principles against which actions of every nation can be judged and whether such a common understanding or civil religion could one day become a vehicle for global peace. Eminent international scholars of history, political science, international relations, human rights and civil religion argue both sides of this debate. In Part One the theoretical issues relating to why human rights have come about and whether they should be fought for are discussed. Part Two focuses on the reality of actions brought about by human rights ideas with illuminating case studies showing that human rights ideas and practice are generated from both the bottom up and top down by individual actors and institutions. The unique book will be of great interest to scholars in the field of history, human rights, international relations and political science in general. *The Imperatives of Progressive Islam* Adis Duderija, 2017-02-03 With the proliferation of transnational Muslim networks over the last two decades, the religious authority of traditionally educated Muslim scholars, the *ulama*, has come under increasing scrutiny and disruption. These networks have provided a public space for multiple perspectives on Islam to be voiced, allowing progressive Islamic worldviews to flourish alongside more neo-traditional outlooks. This book brings together the scholarship of leading progressive Muslim scholars incorporating issues pertaining to politics, jurisprudence, ethics, theology, epistemology, gender and hermeneutics in the Islamic tradition. It provides a comprehensive discussion of the normative imperatives behind a progressive Muslim thought as well as outlining its various values and aims. Presenting this emerging and distinctive school of Islamic thought in an engaging and scholarly manner, this is essential reading for any academic interested in contemporary religious thought and the development of modern Islam. **The Routledge Companion to the Study of Religion** John

Hinnells, 2009-09-10 The Routledge Companion to the Study of Religion is a major resource for courses in Religious Studies. It begins by explaining the most important methodological approaches to religion including psychology, philosophy, anthropology and comparative study before moving on to explore a wide variety of critical issues such as gender, science, fundamentalism, ritual and new religious movements. Written by renowned international specialists, this new edition includes eight new chapters including post-structuralism, religion and economics, religion and the environment, religion and popular culture and sacred space. It surveys the history of religious studies and the key disciplinary approaches, explains why the study of religion is relevant in today's world, highlights contemporary issues such as globalization, diaspora and politics, includes annotated reading lists, a glossary and summaries of key points to assist student learning. *Religion, Gender, and the Public Sphere* Niamh Reilly, Stacey Scriver, 2013-11-26 The re-emergence of religion as a significant cultural, social and political force is not gender-neutral. Tensions between claims for women's equality and the rights of sexual minorities on one side and the claims of religions on the other side are well documented across all major religions and regions. It is also well recognized in feminist scholarship that gender identities and ethno-religious identities work together in complex ways that are often exploited by dominant groups. Hence a more comprehensive understanding of the changing role and influence of religion in the public sphere more widely requires complex multidisciplinary and comparative gender analyses. Most recent discussion on these matters, however, especially in Europe, has focused primarily on the perceived subordinate status of Muslim women. These debates are a reminder of the deep interrelation of questions of gender identity, human rights and religious freedom more generally. The relatively narrow albeit important purview of such discussions so far, however, underscores the need to extend the horizon of enquiry vis-à-vis religion, gender and the public sphere beyond the binary of Islam versus the West. *Religion, Gender and the Public Sphere* moves gender from the periphery to the centre of contemporary debates about the role of religion in public and political life. It offers a timely multidisciplinary collection of gender-focused essays that address an array of challenges arising from the changing role and influence of religious organisations, identities, actors and values in the public sphere in contemporary multicultural and democratic societies. *Shaping Public Theology* Max L. Stackhouse, 2014-01-30 Max L. Stackhouse is one of the most prolific and influential American theologians of the last half century and he has been widely recognized for his contributions to the emerging field of public theology. This volume compiles some of Stackhouse's most significant shorter writings. These selections make clear his central role in the development of public theology as a distinct disciplinary perspective in the fields of Christian theology and theological ethics. *Shaping Public Theology* serves as an introduction to Stackhouse's extensive corpus; readers will see the depth and breadth of his comprehensive public theology while also gaining insight into his singular importance for the field. **Gender and Development in Africa and Its Diaspora** Akinloyè Òjó, Ibígbolade S. Aderibigbe, Felisters Jepchirchir Kiprono, 2018-09-19 This book considers how the establishment and/or improvement of gender equality impacts on the social, economic, religious

cultural environmental and political developments of human societies in Africa and its Diaspora An interdisciplinary team of contributors examine the role of gender in development against the background of Africa s convoluted and arduous history of state formation slavery colonialism post independence nation building and poverty Each chapter highlights and stimulates further discussion on the struggles that many African and African Diaspora societies grapple with in the perplexing issue of gender and development concentrating on gains that have been made and the challenges yet to be surmounted

Religious Diversity and Public Religion in China Zhibin Xie,2006 This book addresses the issue of public religion and its implications in Chinese society Zhibin Xie explores various normative considerations concerning the appropriate role of religion in public political life in a democratic culture Besides drawing on the theoretical discourse on religion in the public sphere from Western academics it holds that the issue of religion in Chinese politics should be addressed by paying attention to characteristics of religious diversity and its political context in China This leads to a position of liberal constrained public religion in China which encourages religious contribution to the public sphere as a substantial component of religious liberty in China on the one hand and proposes some constraints both upon government and religions for regulating religious political discourse on the other
