Sing Willow:

, The Tragedy of Othello William Shakespeare, 1903 *The Works of Shakespeare: Othello* William Shakespeare, 1917 **The Works of Shakespeare: The tragedy of Othello, ed. by H.C. Hart** William Shakespeare, 1905
The Arden Edition of the Works of William Shakespeare William Shakespeare, 1923 The Evolution of States John Mackinnon Robertson, The following treatise is an expansion under a new title of one originally published 1900 under the name of *An Introduction to English Politics* Several friendly reviewers of that work objected not unjustly that its title was something of a misnomer or at least an imperfect indication of its contents It had as a matter of fact originated remotely in a lecture delivered as preliminary to a course on Modern English Politicians from Bolingbroke to Gladstone the aim of the prefatory address being to trace in older politics home and foreign general laws which should partly serve as guides to modern cases or at least as preparation for their scientific study while the main course dealt with modern political problems as they have arisen in the careers and been handled by the measures of modern English statesmen It was that opening exposition developed into an essay and published as a series of magazine articles that had been further expanded into this treatise by way of covering the ground more usefully and the original name is therefore retained as a sub title It is perhaps unnecessary to explain that the book makes no pretension to being a complete or systematic treatment of political history or of political forms and theories The object in view from the first has been not the technical anatomy or documentary history of institutions but the bringing into light of the ruling forces in all political life ancient and modern alike It seeks to help the reader to fulfil the precept of Montaigne *Qu'il ne luy apprenne pas tant les histoires qu'en juger* Since it was first written there has been so much fresh sociological study of history that I need not repeat the justification originally offered for my undertaking Alike as to ancient and modern history the effort of scholars is now more and more towards comprehension of historic causation in terms of determining conditions the economic above all so much so that I have profited somewhat in my revision from various recent works and might with more leisure have done so more fully Revised as it is however the book may serve to expound views of history which are still not generally accepted and to call in question fallacious formulas which seem to me still unduly common On any view much remains to be done before the statement of historic causation can reach scientific thoroughness and it may well be that some of my theories will incur modification All I claim for them is that they are made in the light of a study of the concrete process and I am satisfied that fuller light is to be obtained only in that direction In the end doubtless conflicts of historical interpretation will turn upon problems of psychology A contemporary German expert of distinction Prof Lamprecht in his able lectures on the problem *What is History* Eng trans 1905 lays it down that the main problem of every scientific history of mankind is the deducing from the history of the most important communities of men the evolution of the breadth of consciousness and again that the full historical comprehension of a single change or of a single phenomenon with their historical significance can only be acquired from the most general principles

that is to say from the application of the highest universal historical categories If I understand Prof Lamprecht aright he here means simply that we properly understand the motivation of men in the past in terms of our own psychosis conceived as in touch only with their data This seems to me substantially sound But on the other hand I doubt the utility of his apparent purpose of explaining modern historic developments in terms of special psychic changes or movements in communities considered as forces That way seems to lie reversion to the old and vain device of explaining the course of nations in terms of their characters
