The Works of the English Poets, from Chaucer

to Cowper: J. Beaumont, G. and P. Fletcher, F. Beaumont, Browne, Davenant, Habington, Suckling, Cartwright, Crashaw, Sherburne, Brome, C. Cotton Alexander Chalmers, 1810 **Un-American Womanhood** Kim E. Nielsen, 2001

This book studies the Red Scare of the 1920s through the lens of gender. The author describes the methods antifeminists used to subdue feminism and other movements they viewed as radical. The book also considers the seeming contradictions of outspoken antifeminists who broke with traditional gender norms to assume forceful and public roles in their efforts to denounce feminism.

Polyamory, Monogamy, and American Dreams Mimi Schippers, 2019-10-28 This book introduces the poly gaze as a cultural tool to examine how representations of polyamory and poly lives reflect or challenge cultural hegemonies of race, class, gender, and nation. What role does monogamy play in American Identity, the American dream, and U.S. exceptionalism? How do the stories we tell about intimate relationships do cultural and ideological work to maintain and legitimize social inequalities along the lines of race, ethnicity, nation, religion, class, gender, and sexuality? How might the introduction of polyamory or consensually non-monogamous relationships in the stories we tell about intimacy confound, disrupt, or shift the meaning of what constitutes a good American life? These are the questions that Mimi Schippers focuses on in this original and engaging study. As she develops the poly gaze, Schippers argues for a sociologically informed and cultivated lens with which anyone, regardless of their experiences with polyamory or consensual non-monogamy, can read culture, media, images, and texts against hegemony. This will be a key text for researchers and students in Gender Studies, Queer Studies, Cultural Studies, Critical Race Studies, Media Studies, American Studies, and Sociology. This book is accessible and indispensable reading for undergraduate student and postgraduates wanting to gain greater understanding of debates around the key concept of heteronormativity.

Making Marriage Modern Christina Simmons, 2009-04-10 The nineteenth-century middle-class ideal of the married woman was of a chaste and diligent wife focused on being a loving mother with few needs or rights of her own. The modern woman, by contrast, was partner to a new model of marriage, one in which she and her husband formed a relationship based on greater sexual and psychological equality. In *Making Marriage Modern*, Christina Simmons narrates the development of this new companionate marriage ideal, which took hold in the early twentieth century and prevailed in American society by the 1940s. The first challenges to public reticence to discuss sexual relations between husbands and wives came from social hygiene reformers who advocated for a scientific but conservative sex education to combat prostitution and venereal disease. A more radical group of feminists, anarchists, and bohemians opposed the Victorian model of marriage and even the institution of marriage. Birth control advocates such as Emma Goldman and Margaret Sanger openly championed women's rights to acquire and use effective contraception. The companionate marriage emerged from these efforts. This marital ideal was characterized by greater emotional and sexual intimacy for both men and women, use of birth control to create smaller families, and destigmatization of divorce in cases of failed unions. Simmons examines what she calls the flapper marriage, in which free-spirited young wives enjoyed the early years of marriage postponing children and

domesticity She looks at the feminist marriage in which women imagined greater equality between the sexes in domestic and paid work and sex And she explores the African American partnership marriage which often included wives employment and drew more heavily on the involvement of the community and extended family Finally she traces how these modern ideals of marriage were promoted in sexual advice literature and marriage manuals of the period Though male dominance persisted in companionate marriages Christina Simmons shows how they called for greater independence and satisfaction for women and a new female heterosexuality By raising women s expectations of marriage the companionate ideal also contained within it the seeds of second wave feminists demands for transforming the institution into one of true equality between the sexes
