Mutant Hunt:

CNS Neuroprotection Frank W. Marcoux, Dennis W. Choi, 2013-11-11 CNS neuroprotection was a common subject of papers symposia and reviews during the previous decade of the brain. Indeed in recent years experimental study of putative neuroprotective agents prompted clinical trials of numerous drug candidates in acute and chronic human neurodegenerative conditions. While the outcomes of these trials have not been as successful as initially hoped, these were early explorations and the pipeline of relevant ideas continues to grow in strength and depth. We predict that early in this new millennium crippling disorders such as stroke and Alzheimer's disease will be treated effectively by therapeutic neuroprotective strategies. This volume of the Handbook of Experimental Pharmacology titled eNS Neuroprotection provides a pharmacological perspective on currently promising neuroprotective approaches and a clinical perspective on the challenges involved in establishing the efficacy of these approaches through appropriate clinical trials. Section I Mechanistic Approaches to CNS Neuroprotection reviews major injury mechanisms that have formed the basis for many past and present clinical trials conducted around the world. Dr KIM and colleagues, Washington University School of Medicine, review the status of blocking excitotoxicity as an approach to CNS neuroprotection. Dr WANG, Pfizer Global Research and Development, Ann Arbor Laboratories, outlines evidence supporting a contribution of apoptosis to pathological neuronal or glial cell loss. Drs BECKER and HALLENBECK, University of Washington and the National Institute on Neurological Diseases and Stroke respectively, argue that inhibiting inflammatory pathways in the brain can be neuroprotective. Dr **Strategy of the Viral Genome** G. E. W. Wolstenholme, Maeve O'Connor, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world. *Issues in Neuroscience Research and Application: 2011 Edition*, 2012-01-09 Issues in Neuroscience Research and Application 2011 Edition is a ScholarlyEditions eBook that delivers timely, authoritative and comprehensive information about Neuroscience Research and Application.
