Construction Innovation Finn Orstavik, Andrew R. J. Dainty, Carl Abbott, 2015-04-20 Construction innovation is an important but contested concept both in industry practice and academic reflection and research A fundamental reason for this is the nature of the construction industry itself the industry and the value creation activities taking place there are multi disciplinary heterogeneous distributed and often fragmented This book takes a new approach to construction innovation revealing different perspectives set in a broader context It coalesces multiple theoretical and practice based views in order to stimulate reflection and to prepare the ground for further synthesis By being clear cogent and unambiguous on the most basic definitions it can mobilise a plurality of perspectives on innovation to promote fresh thinking on how it can be studied enabled measured and propagated across the industry This book does not gloss over the real life complexity of construction innovation Instead its authors look explicitly at the challenges that conceptual issues entail and by making their own position clear they open up fresh intellectual space for reflection Construction Innovation examines innovation from different positions and through different conceptual lenses to reveal the richness that the theoretical perspectives offer to our understanding of the way that the construction sector actors innovate at both project and organizational levels The editors have brought together here leading scholars to deconstruct the concept of innovation and to discuss the merits of different perspectives their commonalities and their diversity The result is an invaluable sourcebook for those studying and leading innovation in the design the building and the maintenance of our built environment

Social Networks, Terrorism and Counter-terrorism Martin Bouchard, 2015-06-05 This book examines two key themes in terrorism studies the radicalization process and counter

terrorism policies through the lens of social networks The book aims to show that networks should be at the forefront not only when analysing terrorists but also when assessing the responses to their actions The volume makes a unique contribution by addressing two relatively new themes for terrorism studies First it puts social relations and cooperation issues at the forefront an approach often identified as crucial to future breakthroughs in the field Second many contributions tackle the role of the Internet in the process of radicalization and in recruitment more generally a highly debated topic in the field today In addition the book provides a valuable mix of review essays critical essays and original empirical studies This balanced approach is also found in the topics covered by the authors as well as their academic disciplines which include sociology computer science geography history engineering and criminology as well as political science Many of the true advances in terrorism studies depend on the successful collaboration of multi disciplinary teams each with a different set of methodological and conceptual tools This volume reflects the newfound diversity in this field and is a true product of its time This book will be of much interest to students of terrorism studies social networks security studies sociology criminology and international relations in general

Disabling Migration Controls Rebecca Yeo, 2024-06-10 When people are prevented from meeting their needs the impact is disabling whether in the immigration system or in the wider population Drawing on many years of research and activism this book argues that insights from the disabled people s movement particularly the original Social Model of Disability can be usefully extended to focus resistance on the disabling restrictions imposed on people subject to asylum and immigration controls While acknowledging the pain and discomfort of many impairments and of forced displacement the book focuses on injustices that can be changed It does not catalogue the hostility of the hostile environment Nor does it promote inclusive asylum restrictions An unjust system is not transformed by including disabled people Policies designed to deprive people of essential needs and to stoke hatred among the wider population are core elements of the rise of fascism In this context bringing together movements for disability and migrant justice could help build urgently needed solidarity and resistance with which to develop a society based on equity and common humanity Quotations and images are used to convey the messages and priorities of disabled people seeking asylum ensuring that the book is both engaging and grounded in the insights of lived experience This book will interest people seeking to improve social justice including scholars of disability migration sociology and politics
