Macey, 2018-10-10 Originally published in 1991 A multidisciplinary guide in the form of a bibliography of selected time related books and articles divided into 25 existing academic disciplines and about 100 subdisciplines which have a wide application to time studies *Air & Space Smithsonian* ,1986 *The Cause of Menopause & Mercury Is Not a Planet* Toby L. Murray RMT, 2015-07-25 In this work Toby L Murray RMT connects human anatomy and physiology to the Inverse Square Law and the Biological Tides Theory in support of the hypothesis that the Moons gravity generates a Monthly Cranial Respiration Cycle in cerebral spinal fluid which induces the secretion of neuro endocrine hormones thus regulating bodily functions such as menstruation This hypothesis further proposes that as the Moon steadily moves further away from Earth in a process known as the Lunar recession the Monthly Cranial Respiration Cycle diminishes leading to conditions such as menopause disease and aging in general The author combines the ideas of the late astronomers Drs Thomas Van Flandern and Robert Harrington with Newtonian Mechanics and General Relativity to demonstrate that Mercury is the moon to the planet Venus which separated from Venus in a process similar to the Moons recession from Earth The resulting new models of the solar and planetary systems are that of atoms of eight life essential elements with properties belonging to the group of non metals
