Persons And Personality:

Toward A Psychology of Persons William E. Smythe, 2013-05-13 This closely integrated collection of essays constitutes a wide ranging and comprehensive attempt to understand persons within psychology a long lost enterprise The volume was inspired by the observation that contemporary psychology has become increasingly depersonalized in its conceptions and its methodology and has thereby lost touch with its traditional subject matter of human individuality and the nature of persons This development now threatens the integrity of psychology as a discipline Using both a critical and constructive approach the various contributors share two common objectives to explore the roots of depersonalization in modern psychology through systematic criticism of contemporary functionalist and neo functionalist approaches to articulate some alternative holistic interpretive and historical approaches to the psychology of persons Despite these common objectives the chapters reflect a wide variety of theoretical perspectives and approaches including cognitive science and neuroscience discursive psychology hermeneutics social constructionism semiotics rhetorical analysis and psychological aesthetics These essays do not converge on a unified psychology of persons but they do serve to reopen a form of discourse that has long been absent from mainstream psychology This volume emerged from the deliberations of the Western Canadian Theoretical Psychologists WCTP a group of scholars primarily from Western Canadian universities with shared interests in the history and theory of psychology From its founding in 1989 to the present the WCTP has been actively engaged in promoting and contributing to the development of theoretical psychology Over the past half dozen years scholars have greatly benefitted from the close collaboration and collegial support that participation in the WCTP makes possible The annual meetings provide an opportunity for them to catch up on each other s work and also to pool their expertise to work on topics of shared interest

The Moral Status of Persons Gerhold K. Becker, 2000 The advances in molecular biology and genetics medicine and neurosciences in ethology and environmental studies have put the concept of the person firmly on the philosophical agenda Whereas earlier times seemed to have a clear understanding about the moral implications of personhood and its boundaries today there is little consensus on such matters Whether a patient in the last stages of Alzheimer s disease is still a person or whether a human embryo is already a person are highly contentious issues This book tackles the issue of personhood and its moral implications head on The thirteen essays are representative of the major strands in the current bioethical debate and offer new insights into humanity s moral standing its foundations and its implications for social interaction While most of the essays approach the issue by drawing on the rich intellectual tradition of the West others offer a cross cultural perspective and make available for ethical consideration the philosophical resources and the wisdom of the East The contributors to this book are highly recognized philosophers ethicists theologians and professionals in health care and medicine from East Asia China Japan Europe and North America The first part of the book probes the foundations of personhood Examining critically the main theories on personhood in contemporary philosophy the authors offer alternatives that better respond to contemporary challenges and their implications for bioethics The focus of the second part is firmly on the Confucian relational concept of the person and on the social constitution of personhood in traditional Japanese culture While the essays challenge the individualistic features of personhood in the Western tradition they lay the foundations for a richer concept that holds great promise for the resolution of moral dilemmas in modern medicine and health care The third part of the book enters into a dialogue with the Christian tradition and draws on its spiritual heritage in the search for answers to the

contemporary challenges to human dignity and value Its focus is on the Catholic social thought and Lutheran theology The fourth part addresses the moral status of persons in view of specific issues such as the effects of brain injury gene therapy and human cloning on personhood It extends the scope of research beyond human beings and inquires also into the moral status of animals **Catholic progress** Young men's Catholic assoc,1874 [A Brief Inquiry into the Meaning of Sin and Faith](#) John Rawls,2010-05-01 John Rawls never published anything about his own religious beliefs but after his death two texts were discovered which shed extraordinary light on the subject A Brief Inquiry into the Meaning of Sin and Faith is Rawls s undergraduate senior thesis submitted in December 1942 just before he entered the army At that time Rawls was deeply religious the thesis is a significant work of theological ethics of interest both in itself and because of its relation to his mature writings On My Religion a short statement drafted in 1997 describes the history of his religious beliefs and attitudes toward religion including his abandonment of orthodoxy during World War II The present volume includes these two texts together with an Introduction by Joshua Cohen and Thomas Nagel which discusses their relation to Rawls s published work and an essay by Robert Merrihew Adams which places the thesis in its theological context The texts display the profound engagement with religion that forms the background of Rawls s later views on the importance of separating religion and politics Moreover the moral and social convictions that the thesis expresses in religious form are related in illuminating ways to the central ideas of Rawls s later writings His notions of sin faith and community are simultaneously moral and theological and prefigure the moral outlook found in Theory of Justice
