Place-based Economic Development and the New EU Cohesion Policy Philip McCann, Attila Varga, 2018-02-02 The new

EU Cohesion Policy is one of the largest integrated development policies in the Western world and one of the largest of such programmes anywhere in the world. The reforms to the EU Cohesion Policy contain many different elements each of which interlink in order to provide a cohesive overall framework. Some of the key elements in the reforms however relate to the conditionalities employed and their effects on policy governance and the control mechanism, the smart specialization approach to policy prioritization and resource allocation, the underlying place based logic of the policy and the overall results orientation and evaluation emphasis of the policy. In each of the areas of the EU Cohesion Policy reforms many different scholars from the fields of regional studies, regional science and economic geography have played important roles in shaping the new policy and the chapters here highlight these increasing interactions between the policy and academic spheres of debate. The collection of essays in this book each deal with specific aspects of these critical elements of the Cohesion Policy reforms. In particular they examine some of the strengths and weaknesses of these individual elements and allowing for a better understanding of the origins and backgrounds of many of the ideas underpinning these reforms. This book was previously published as a special issue of *Regional Studies*. **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10

In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. *The UK Regional National Economic Problem* brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities. The North-South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government. *Economic Development and Financial Markets* Adam Śliwiński, Persefoni Polychronidou, Anastasios Karasavoglou, 2019-12-07.
