Smits, 2005 The aim of this book is to discuss the need for a uniform contract law in Europe At present it is debated to what extent uniformity of law is required from the economic perspective The view of the European Commission seems to be that diversity of law stands in the way of a proper functioning of the internal market but this view does not seem to be shared by business in the reactions to the Communication on European Contract Law 2001 it was striking to see that most companies do not consider the present diversity to be a true barrier to trade This book offers five different perspectives on the need for a uniform contract law These perspectives include economics behavioral law and economics psychology and law

Micklitz, Rodrigo Vallejo, Pia Letto-Vanamo, 2024-05-30 Since Anu Bradford's groundbreaking book on the Brussels Effect there is a vastly evolving literature on the EU as a global regulatory actor as well as the global reach of EU law This edited collection connects to this debate Yet it shifts the focus from the currently predominant public law focus to investigating European and EU private law and to connecting to literature and research on transnational law To that end it proceeds first conceptually by introducing and giving shape to the notion of a European Transnational Private Law through four conceptual contributions by the editors Secondly it focuses on several sectors finance taxation investment consumer law labour law and topics climate litigation global value chains non discrimination to trace sector specifically the role of EU private law in relation to transnational legal ordering

Regulating Unfair Banking Practices in Europe Stephen Weatherill, Aurelia Colombi Ciacchi, 2010 Private persons often stand surety for a business debt incurred by family members friends or employers These suretyships are commonly banking guarantees contracted by means of standard terms Sometimes the guarantor signs the contract while he/she is not aware of the financial risk related to the guarantee He or she may not even know what a suretyship is But in other circumstances the guarantor may be well aware of the risk but may nonetheless assume it because of strong emotional ties which exist between him/her and the main debtor How then if at all does the law address the potential for unfairness in such situations Some systems choose to rely on objective criteria such as identification of a manifest disproportion between the guaranteed amount and the surety's income and assets while others are more open to subjective inquiry The key point is variation Different jurisdictions in Europe operate different models with different priorities This book provides a comparative overview of the remedies against unfair obligations of non professional guarantors available in 22 EU Member States based on a questionnaire which has been completed by an expert in each

particular jurisdiction and covering both legal rules and the economic context of different credit markets and banking practices

Contract Law in Spain Antoni Vaquer, 2018-03-23 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of the law of contracts in Spain covers every aspect of the subject definition and classification of contracts contractual liability relation to the law of property good faith burden of proof defects penalty clauses arbitration clauses remedies in case of non performance damages power of attorney and much more Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology application and procedure from one legal system to another as well as the international aspects of contract law Throughout the book the treatment emphasizes drafting considerations An introduction in which contracts are defined and contrasted to torts quasi contracts and property is followed by a discussion of the concepts of consideration or cause and other underlying principles of the formation of contract Subsequent chapters cover the doctrines of relative effect termination of contract and remedies for non performance The second part of the book recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it describes the nature of agency sale lease building contracts and other types of contract

Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable time saving tool for business and legal professionals alike Lawyers representing parties with interests in Spain will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative contract law *Globalisation and the Western Legal Tradition* David B. Goldman,2008-02-07 What can globalisation teach us about law in the Western tradition This important new work seeks to explore that question by analysing key ideas and events in the Western legal tradition including the Papal Revolution the Protestant Reformations and the Enlightenment Addressing the role of law morality and politics it looks at the creation of orders which offer the possibility for global harmony in particular the United Nations and the European Union It also considers the unification of international commercial laws in the attempt to understand Western law in a time of accelerating cultural interconnections The title will appeal to scholars of legal history and globalisation as well as students of jurisprudence and all those trying to understand globalisation and the Western dynamic of law and authority **European Contract Law** Hector MacQueen,2019-08-05 This volume tests the claim that as combinations of Civil and Common Law influences the mixed systems of contract law in Scotland and South Africa have anticipated the content of the Principles of European Contract Law PECL concluded and published in 2003 by the unofficial Commission on European Contract Law Going further it rigorously explores what the implications of a Europe wide contract law would be The current official moves towards a European contract law within the European Union make the critiques of PECL in this volume especially urgent and significant With a European contract law nearer to reality than ever before mere policy critiques are no longer enough This book provides the essential technical and substantive assessments of PECL from the perspective of Scots and South African contract lawyers and is offered to the European debate without prejudice as to the deeper policy questions At the same time this volume will inform Scots and South African lawyers about the substance of international developments in the field and suggest ways to develop their still vigorous and vital national laws to remain in step with the needs of the present day The Architecture of European Codes and Contract Law Stefan Grundmann,Martin Schauer,2006-01-01 The nineteen outstanding contributors to this deeply insightful book concur in envisioning a fundamentally new systematic concept of contract law that while preserving the essential and architectureand of the existing European codes would nonetheless find cogent ways to integrate such modern developments as mass transactions chains and networks of contracts regulation of markets and contracts to protect consumers and service and long term contracts into an optional European code The book is organised along three major avenues and the systematic arrangement of a contract law code how it deals with core questions of formation and performance or breach of contract such as mistake and misrepresentation standard contract terms and remedies in the case of breach of contract and the apparent necessity to merge consumer contract law i e such issues as product safety and

liability warranties and consumer debt and insolvency with traditional core contract law concepts and the importance to substantive contract law of the pre contractual phase in which information duties are becoming steadily more paramount The authors perspectives cover a wide range of jurisdictions including new EU Member States The book and s commitment to an integration of comparative law EC law and the debate on European codification offers practitioners and academics fertile ground for the development of a new model of contract law that is more than a common denominator of what has been in force so far This model may serve as a basis for Europe wide and perhaps even worldwide discussion **Elgar**

Performance-Oriented Remedies in European Sale of Goods Law Vanessa Mak, 2009-01-15 Contractual remedies aimed at performance create a well known rift between common law and civil law traditions in the one existing in the shadow of damages whilst in the other regarded as a generally enforceable right following from the contract Developments in approximation of laws in Europe in particular in consumer sales law suggest however that a convergence of these approaches may be within reach Putting the focus on the contract of sale which as the most common type of contract may fulfil a leading role in the harmonisation process this book aims to

provide a model for further convergence of European sales laws engaging with issues of contract theory and comparative law lying at the heart of the process. Independently from this the comparison between different systems is used in order to highlight particular problems in the remedial schemes of individual systems and to see whether a better solution may be borrowed from elsewhere. Scaling the interests of sellers and buyers as reflected in national laws as well as in uniform sets of rules such as CISG and PECL a plea is made for a primary position for performance oriented remedies in the harmonisation of European sales law. In this context special significance is attributed to the possibility of cure by the seller which has both practical and conceptual links to the buyer's remedies aimed at performance.

The Institutional Framework of European Private Law Fabrizio Cafaggi, 2006. This volume explores the relationship between constitutional and regulatory questions on the one hand and private law on the other hand examining how European private law has developed under the influence of regional legal traditions and the EU *acquis communautaire*. It focuses on the multiple actors and institutions that today contribute to legal and cultural integration within a multi level framework involving Member States and subnational actors together with EU Institutions. It underlines the different roles of legislators, regulators and judges in building an integrated market which is consistent with fundamental rights and social policies. It also highlights the principles and institutions that may preserve national legal identities in the context of European legal and political integration striking a difficult balance between harmonization and differentiation. Within this framework the volume questions the current boundaries of European private laws and proposes a coordinated perspective which examines competition regulation and private law alike. The book focuses in particular on competition and consumer law and on tort and regulation. Attention is also drawn to the strategic role to be played by private international law. It is argued that the distinction between private and public law should be redefined by acknowledging a new balance between public institutions and private parties. The collection contains several proposals for furthering the process of Europeanization of private law without losing the richness of existing western legal traditions as they have developed in previous centuries. It calls on European and national institutions to involve practitioners in devising new patterns of legal integration and in transforming European legal education. This book is an original contribution to the scholarly and policy debates about the desirability and modes of Europeanization of private law in a context in which the pressures of globalization and of national identities seem to question the chosen path of integration.

European Consumer Access to Justice Revisited Stefan Wróblewski, 2015. This book asks what is European consumer access to justice and how we can improve it by means of procedural and substantive laws.

European Private Law: Foreword Mauro Bussani, Franz Werro, 2009.

The Work of the British Law Commissions Shona Wilson Stark, 2017-07-13. The Law Commission of England and Wales and the Scottish Law Commission were both established in 1965 to promote the reform of the laws of their respective jurisdictions. Since then they have each produced hundreds of reports across many areas of law. They are independent of government yet rely on governmental funding and governmental

approval of their proposed projects They also rely on both government and Parliament and occasionally the courts or other bodies to implement their proposals This book examines the tension between independence and implementation and recommends how a balance can best be struck It proposes how the Commissions should choose their projects given that their duties outweigh their resources and how we should assess the success or otherwise of their output Countries around the world have created law reform bodies in the Commissions image They may wish to reflect on the GB Commissions responses to the changes and challenges they have faced to reappraise their own law reform machinery Equally the GB Commissions may seek inspiration from other commissions experiences The world the GB Commissions inhabit now is very different from when they were established They have evolved to remain relevant in the face of devolution the UK s changing relationship with the European Union increasing pressure for accountability and decreasing funding Further changes to secure the future of independent law reform are advanced in this book
