states At the same time most of the world's poor now live in middle income countries which tend to have higher national poverty lines This year's report tracks poverty comparisons at two higher poverty thresholds 3.20 and 5.50 per day which are typical of standards in lower and upper middle income countries In addition the report introduces a societal poverty line based on each economy's median income or consumption Poverty and Shared Prosperity 2018 Piecing Together the Poverty Puzzle also recognizes that poverty is not only about income and consumption and it introduces a multidimensional poverty measure that adds other factors such as access to education electricity drinking water and sanitation It also explores how inequality within households could affect the global profile of the poor All these additional pieces enrich our understanding of the poverty puzzle bringing us closer to solving it For more information please visit worldbank.org/PSP

Place, Productivity, and Prosperity Arti Grover, Somik Lall, William Maloney, 2022-03-01 Place matters for productivity and prosperity Myriad factors support a successful place including not only the hard infrastructure such as roads but also the softer elements such as worker skills entrepreneurial ability and well functioning institutions History suggests that prosperous places tend to persist while left behind regions or those hurt by climatic technological or commercial shocks struggle to catch up This division gives rise to demands to do something about the subsequent spatial inequality Such pressures often result in costly spatially targeted policies with disappointing outcomes because of a lack of analysis of the underlying barriers to growth and structural transformation and a fair appraisal of the possibility of overcoming them The latest volume of the World Bank Productivity Project series Place Productivity and Prosperity Revisiting Spatially Targeted Policies for Regional Development makes three broad contributions First it provides new analytical and empirical insights into the three drivers of economic geography agglomeration economies migration and distance and the way in which these drivers interact Second it argues that these forces are playing out differently in developing countries than they have in advanced economies urbanization is not accompanied by structural transformation leaving cities crowded and accruing all the negative aspects of urbanization without being concentrated productively Long

term amelioration of poverty in lagging regions requires advancing the overall national agenda of structural change and productivity growth Third it provides a heuristic framework with which to inform policy makers assessments of place based policy proposals helping them identify the regions where policy is likely to have an impact and those that would remain nonviable The framework enables governments to clarify the implications of various policy options to think critically about design priorities including necessary complementary policies and to navigate the implementation challenges This is an extremely welcome book Three experts lay out the principles behind spatially targeted policy and the experience of countries using such policies A must read for anyone interested in spatial inequality and policy to address it Anthony J Venables Professor of Economics University of Manchester and Research Director The Productivity Institute Delivering better livelihoods for all requires tapping into the economic potential of every place including those losing out or lagging behind This however cannot be done effectively without a sound theoretical and empirical framework Place Productivity and Prosperity is the right book to look for such a framework Andr s Rodr guez Pose Princesa de Asturias Chair and Professor of Economic Geography London School of Economics *Building a Partnership for Prosperity* United States. President (1993-2001 : Clinton), 1995 **Identity, Policy, and Prosperity** Jeongwon Bourdais Park, 2017-08-11 This book offers a rare glimpse into China s Korean minority which dominates the area bordering North Korea even as Korea is riven into capitalist and communist societies China s Koreans register this dilemma as one internal to the society they live in in China s postindustrial Northeast As this research makes clear once driven by state investment in industry the Northeast is now struggling to define its identity as a post industrial region the ethnic Koreans there even more so This monograph provides a distinctive look at a group shaped by political turmoil economic transformation and cultural struggle the study may offer an idea of what the future of the Korean peninsula itself might be disentangling the puzzling contradictions and synergies between nationality locality and development in China
