Downton, 2008-11-19 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's *Ecopolis* takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences **Planning Canadian Regions** Gerald Hodge, Ira M. Environmental Protection Agency. Library Systems Branch, 1974 [Carl Sauer on Culture and Landscape](#) William M. Denevan, Kent Mathewson, 2009-05 Perhaps one of the most distinctive and studied geographers of the twentieth century Carl O Sauer 1889-1975 had influence that extends well beyond the confines of any one discipline With a focus on historical and cultural geography Sauer's essays have garnered praise from poets natural historians and social scientists alike who continue to explore Sauer's work In *Carl Sauer on Culture and Landscape* editors William M Denevan and Kent Mathewson have

compiled thirty seven of Sauer's original works including rare early writings articles in now largely inaccessible publications and transcriptions of key oral presentations that remain little known A student of the relationships between land and life people and places Sauer helped establish landscape studies in cultural geography and paved the way for paradigmatic shifts in the scholarly assessment of Native American history By strongly advocating a land ethic a responsible stewardship of the sustaining earth for his own and for future generations Carl Sauer supplied an esthetic rationale and a historical perspective to the environmental movement The volume opens with two extended essays on Sauer's critics and his works Essays by prominent geographers and other authorities on Sauer introduce each section of the book adding a contemporary element to the presentation and interpretation of Sauer's life and scholarship in areas such as soil conservation man in nature and cultivated plants A complete bibliography of his publications and an extensive compilation of commentaries on his life and work make this an indispensable reference Carl Sauer on Culture and Landscape sheds new light on Sauer's contributions to the history of geographic thought sustainable land use and the importance of biological and cultural diversity all of which remain key issues today
