Regions Of War And Peace:

Regions of War and Peace Douglas Lemke, 2002-01-21 In this contribution to the literature on the causes of war Douglas Lemke asks whether the same factors affect minor powers as affect major ones He investigates whether power parity and dissatisfaction with the status quo have an impact within Africa the Far East the Middle East and South America Lemke argues that there are similarities across these regions and levels of power and that parity and dissatisfaction are correlates of war around the world The extent to which they increase the risk of war varies across regions however and the book looks at the possible sources of this cross regional variation concluding that differential progress toward development is the likely cause This book will interest students and scholars of international relations and peace studies as well as comparative politics and area studies

War and Peace in Africa's Great Lakes Region Gilbert M. Khadiagala, 2017-07-11 The book probes major security and governance trends in Africa's Great Lakes region since the 1990s It examines political dynamics in key states Burundi the DRC Rwanda and Uganda as well as the role of international actors such as the AU the EU and the UN thereby providing a unique perspective on efforts towards regional peace and prosperity The authors suggest that while the region has made tremendous progress it faces continuing challenges including reversals in governance that threaten future regional security

The Geography of War and Peace Colin Flint, 2005 Our world of increasing and varied conflicts is confusing and threatening to citizens of all countries as they try to understand its causes and consequences This book takes advantage of a diversity of geographic perspectives as it analyzes the political processes of war and their spatial expression

War in Peace Robert Gerwarth, John Horne, 2013-10-03 Explains why in many parts of Europe the end of the Great War brought not peace but continued conflict Contributes to an understanding of the difficult transition from war to peace and shows how paramilitary violence helped legitimize both fascism and communism and also many of the new nation states that emerged from the Great War

The Relevance of Regions in a Globalized World Galia Press-Barnathan, Ruth Fine, Arie M. Kacowicz, 2018-11-09 This volume provides a unique open inter disciplinary dialogue across the Humanities and Social Sciences to further our understanding of the phenomenon of regions and regionalism in a globalized world both at the theoretical and empirical levels What comprises a region What are the different regional dynamic processes that take place What is the relationship between the regional and the global What role does identity building play Bringing together scholars from various disciplines within and across the Social Sciences and the Humanities to reflect on these questions the book explores how regions are imagined constructed understood and explained in different academic disciplines Each chapter addresses these common questions and uses its own disciplinary lenses to answer them In addition the volume offers interesting reflections on the academic borders constructed in the study of regions thus demonstrating the importance of obtaining insights from both social scientists and humanities scholars in order to better understand the relevance of regions in a complex and globalized world An important work for scholars and

postgraduate students in many fields including political science international relations sociology economics geography history and literature as well as for those interested in regionalism and area studies *War and Peace in Somalia* Michael Keating, Matt Waldman, 2019-01-01 A comprehensive account by global specialists of how Somalia has confronted the challenges of governance amid an Islamist insurgency War in a Changing World Zeev Maoz, Azar Gat, 2001 Essays tracing the changing nature of war in relation to global and regional changes **The Public Papers of Woodrow Wilson: War and peace : presidential messages, addresses, and public papers (1917-1924)** Woodrow Wilson, 1927 *Regions, Power, and Conflict* William R. Thompson, Thomas J. Volgy, Paul Bezerra, Jacob Cramer, Kelly Marie Gordell, Manjeet Pardesi, Karen Rasler, J. Patrick Rhamey Jr., Kentaro Sakuwa, Rachel Van Nostrand, Leila Zakhirova, 2022-08-16 The three main levels of analysis in international relations have been the systemic the national and the individual A fourth level that falls between the systemic and the national is the region It is woefully underdeveloped in comparison to the attention afforded the other three Yet regions tend to be distinctive theaters for international politics Otherwise we would not recognize that Middle Eastern interstate politics somehow does not resemble Latin American interstate politics or interstate politics in Southern Africa although once the Middle East and Southern Africa may have seemed more similar in their mutual fixation with opposition to domestic policies in Israel and South Africa respectively This book divided into three parts first makes a case for studying regional politics even though it must also be appreciated that regional boundaries are also hazy and not always easy to pin down empirically The second part examines power distributions within regions as an important entry point to studying regional similarities and differences Two emphases are stressed One is that regional power assessments need to be conditioned by controlling for weak states which are more common in some regions than they are in others The other emphasis is on regional power hierarchies Some regions have strong regional hierarchies while others do not Regions with strong hierarchies operate much differently from those without them in the sense that the former are more pacific than the latter The third part of the book focuses on regional differences in terms of conflict behavior order preferences rivalries and rivalry termination *The Geography of War and Peace : From Death Camps to Diplomats* Colin Flint Professor of Geography Pennsylvania State University, 2004-09-24 How and why war and peace occur cannot be understood without realizing that those who make war and peace must negotiate a complex world political map of sovereign spaces borders networks and scales This book takes advantage of a diversity of perspectives as it analyzes the political processes of war and their spatial expression Topics include terrorism nationalism religion drug wars water conflicts diplomacy peace movements and post war reconstruction **Strong Money Demand in Financing War and Peace** Makoto Saito, 2021-06-17 This book theoretically and empirically investigates the emergence of strong money demand in wartime Japan 1937 1945 its disappearance after the end of the war 1945 1949 and the reemergence of strong money demand in contemporary Japan from 1995 to the present in terms of the effects on fiscal activities and the price level An augmented fiscal monetary theory

of the price level is constructed from a close examination of the strong money demand present in these periods. Then profoundly puzzling phenomena such as mild deflation despite monetary expansion, low long term interest rates despite fiscal unsustainability and weak aggregate demand despite near zero rates of interest, all of which are actually being observed in contemporary Japan, can now be interpreted in line with the above augmented theory. In the present, strong money demand at near zero rates endows the Japanese government with maximum fiscal flexibility. However, if it disappeared for some reason, prices would surge to the quantity theory of money level and fiscal sustainability would have to be restored. In the future, alternative currency units issued by private banks might carry out a purge of such strong demand for the yen.

Cropland Use and Soil Fertility Practice in War and Peace Donald Bryan Ibach, 1946
International and Regional Security Benjamin Miller, 2016-11-10 This volume is a collection of the best essays of Professor Benjamin Miller on the subjects of international and regional security. The book analyses the interrelationships between international politics and regional and national security with a special focus on the sources of international conflict and collaboration and the causes of war and peace. More specifically, it explains the sources of intended and unintended great power conflict and collaboration. The book also accounts for the sources of regional war and peace by developing the concept of the state to nation balance. Thus, the volume is able to explain the variations in the outcomes of great power interventions and the differences in the level and type of war and peace in different eras and various parts of the world. For example, the book's model can account for recent outcomes such as the effects of the 2003 American intervention in Iraq, the post 2011 Arab Spring and the conflicts between Russia and Ukraine. The book also provides a model for explaining the changes in American grand strategy with a special focus on accounting for the causes of the invasion of Iraq in 2003. Finally, the book addresses the debate on the future of war and peace in the 21st century. This book will be essential reading for students of international security, regional security, Middle Eastern politics, foreign policy and IR.
