Regularity In Semantic Change:

Regularity in Semantic Change Elizabeth Closs Traugott, Richard B. Dasher, 2001-12-20 This important study of semantic change examines how new meanings arise through language use especially the various ways in which speakers and writers experiment with uses of words and constructions in the flow of strategic interaction with addressees There has been growing interest in exploring systemicities in semantic change from a number of perspectives including theories of metaphor pragmatic inferencing and grammaticalization Like earlier studies these have for the most part been based on data taken out of context This book is a detailed examination of semantic change from the perspective of historical pragmatics and discourse analysis Drawing on extensive corpus data from over a thousand years of English and Japanese textual history Traugott and Dasher show that most changes in meaning originate in and are motivated by the associative flow of speech and conceptual metonymy

Opening Windows on Texts and Discourses of the Past Janne Skaffari, 2005-01-01 Some of these windows were opened by historical linguists who have acquired discourse perspectives some by pragmaticians with historical interests and others by literary scholars drawing from linguistic pragmatics BOOK JACKET *Cognitive English Grammar* Günter Radden, René Dirven, 2007 Cognitive English Grammar is designed to be used as a textbook in courses of English and general linguistics It introduces the reader to cognitive linguistic theory and shows that Cognitive Grammar helps us to gain a better understanding of the grammar of English The notions of motivation and meaningfulness are central to the approach adopted in the book In four major parts comprising 12 chapters Cognitive

English Grammar integrates recent cognitive approaches into one coherent model allowing the analysis of the most central constructions of English Part I presents the cognitive framework conceptual and linguistic categories their combination in situations the cognitive operations applied to them and the organisation of conceptual structures into linguistic constructions Part II deals with the category of things and their linguistic structuring as nouns and noun phrases It shows how things are grounded in reality by means of reference quantified by set and scalar quantifiers and qualified by modifiers Part III describes situations as temporal units of various layers internally as types of situations and externally as located relative to the time of speech and grounded in reality or potentiality Part IV looks at situations as relational units and their structuring as sentences Its two chapters are devoted to event schemas and space and metaphorical extensions of space Cognitive English Grammar offers a wealth of linguistic data and explanations The didactic quality is guaranteed by the frequent use of definitions and examples a glossary of the terms used overviews and chapter summaries suggestions for further reading and study questions For the Key to Study Questions click here

corpus of dictionary citations from Middle to contemporary English and on a large corpus of Warlpiri citations Limited to the operations of metaphor and of three categories of metonymy this typology posits just four types of basic relation between extended and core meanings As a result the phenomenon of polysemy and semantic extension emerges as amenable to strikingly concise description *Historical Cognitive Linguistics* Margaret E.
