Regulating The Future Broadcasting Technology And Governmental Control:

Regulating the Future W. A. Kelly Huff, **Regulating the Future** W.A. K. Huff, 2001-05-30 This comprehensive study examines the case of AM stereo and subsequent technologies to demonstrate the FCC's evolution from stern to reluctant regulator. It also examines emerging technologies such as multichannel television sound, digital audio broadcasting, and high definition television, and discusses their impact on the evolution of broadcast regulation. In the 1980s, the tension between governmental control and the marketplace resulted in the FCC's deregulation of TV and radio, electing to set only technical operating parameters and allowing legal operation of any system that meets those minimal standards. Huff argues that this approach is likely to influence regulatory approaches to other new developments in broadcast technologies. The extensive overview of the industry and the study of the interrelationships between the technologies will appeal to communication scholars in the fields of radio and television as well as interest industry professionals. *Encyclopedia of Radio 3-Volume Set* Christopher H. Sterling, 2004-03 Produced in association with the Museum of Broadcast Communications in Chicago, the *Encyclopedia of Radio* includes more than 600 entries covering major countries and regions of the world as well as specific programs and people, networks and organizations, regulation and policies, audience research, and radio's technology. This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old, with essays that provide essential information on the subject as well as comment on the significance of the particular person, organization, or topic being examined. *Shut Off* Gregory Taylor, 2013-04-01 Digital technology has revolutionized modern television, but what exactly has changed? The history of the digital transition is one of great scientific achievement, expensive failures, and significant political and industrial power struggles. In *Shut Off: The Canadian Digital Television Transition*, Gregory Taylor examines the technology, institutional players, and the policies that have shaped Canada's efforts to switch from analogue to digital television broadcasting. Taylor shows how digital television is part of a global media movement by comparing the Canadian experience with the ways in which the digital transition has been managed worldwide. *Shut Off* is about more than television; the digital transition is also a precursor for new developments in mobile digital media. The wireless spectrum freed by the move to digital television is a multi-billion dollar public resource whose auction is impending. The book reveals how digital broadcasting has been the site of dramatic change in the political economy of Canadian media and questions the market-driven process through which the still incomplete transition has unfolded. Considering wide-ranging issues such as equal access and television as a public good, Taylor highlights public and institutional actors in the policy process to provide an analysis of government and industry. Succinct and insightful, *Shut Off* is a timely assessment of a period of technological and economic upheaval in Canadian broadcasting. *Electronic Media Management, Revised* Peter Pringle, Michael F. Starr, 2013-06-26 The fifth edition of a classic text features important updates that reflect the enormous changes that have taken place in recent years: the Internet as an important information transmission format that is here to

stay and convergence among media This edition features thorough discussions on the Internet and convergence as well as reflects the latest information on broadcast and cable regulations and policies It also includes a fresh batch of case studies and study questions As in previous editions this book also covers management theory audience analysis broadcast promotion and marketing

Mass Media in 2025 Erwin K. Thomas, Brown H. Carpenter, 2001-08-30 The future of mass media may appear unpredictable and too complex to fathom but Mass Media in 2025 takes a scholarly theoretical approach to identifying trends and explaining their possibilities Noted contributors approach a variety of media with a solid grounding in the history of each and an eye for which may be vulnerable and which may thrive in the new technological age Trends such as interactivity and niche building will affect everything from the newspaper to public relations and this collection of essays provides a fascinating guide to where the next decades may take us Regardless of the visual aural or printed form Mass Media in 2025 illustrates the degree to which older media will have to incorporate the level of interaction and specialization offered by newer media if they are to survive These effects can already be seen in the proliferation of television channels in the ironic bent of advertising in the rise of infotainment in news organizations This book shows not only how all of this has come to be but also more importantly where it will go

News Ombudsmen in North America Neil Nemeth, 2003-11-30 This book offers the most comprehensive look to date at the effort of about forty U S media organizations to make themselves more accountable Nemeth provides a critical assessment of the ombudsmen s work from the ombudsmen themselves their editors media critics and scholars

Manufacturing the Gang Raúl Damacio Tovares, 2002-05-30 Coverage of Mexican American youth gangs has been a staple of local television news in the United

States for decades and its form and content have come to embody many journalistic clichés the rising tide of violence the spread of drug addiction the alienated minority youth But as this bold new study argues these stories contain gross exaggerations that lead to the reinforcement of stereotypes about Mexican American young people and the Mexican American community in general Indeed the police and community leaders greatly influence the content of this coverage by deciding what information to make available to the news media while reporters select certain sources and ignore others thus slanting the story even further As author Raul Tovaresh makes clear the true story of Mexican American youth is far more complex than local news would have its viewers believe Cultural values organizational structures and economic systems all contribute to the production of this journalism which itself has a direct and real impact on the lives of Mexican American teenagers Unlike other books on the subject of Mexican American youth gangs Tovaresh's work critiques the very assumptions on which ideas about such gangs are based and brings much needed attention to a timely and often misunderstood subject

Breaks in the Air John Klaess, 2002-08-22 In *Breaks in the Air* John Klaess tells the story of rap's emergence on New York City's airwaves by examining how artists and broadcasters adapted hip hop's performance culture to radio Initially artists and DJs brought their live practice to radio by buying time on low bandwidth community stations and building new communities around their shows Later stations owned by New York's African American elite such as WBLS reluctantly began airing rap even as they pursued a sound rooted in respectability urban sophistication and polish At the same time large commercial stations like WRKS programmed rap once it became clear that the music attracted a demographic that was valuable to advertisers Moving between intimate portraits of single radio shows and broader examinations of the legal financial cultural and political forces that indelibly shaped the sound of rap radio Klaess shows how early rap radio provides a lens through which to better understand the development of rap music as well as the intertwined histories of sounds institutions communities and legal formations that converged in the post Civil Rights era *Brown and Black*

Communication Diana Rios, Ali Mohamed, 2003-07-30 Though Latinos and African Americans have lived together in large cities as neighbors there is much that is still misunderstood between them Those who live in non diverse locales have only news and entertainment representations on which to base their information about the two cultures This new collection of essays brings together the latest interdisciplinary works by scholars examining conflicts and convergences among Latinos and African Americans in mass mediated and cross cultural contexts Contributions in the form of both empirical and critical ethnographic research present compelling works in cross cultural relations news entertainment news media education and community relations *Brown and Black Communication* R challenges those who do not think that significant projects and key research have been conducted on the two largest ethnic communities in the United States Of certain appeal to both scholars and those with more applied needs in media education and public policy this challenging collection offers a range of perspectives on two widely diverse bodies of American people **Giving Meanings to the World** Giovanna

Dell'Orto,2002-06-30 How did the first United States foreign correspondents help shape an American common sense about the rest of the world This new study is the first to address this key question examining the images of foreign countries that emerge from the first formally organized American foreign correspondence Its focus is on the discourses of the world constructed in mid 19th century correspondence which provided American newspaper readers with their first cohesive view of the world outside its borders By emphasizing the emergence of foreign correspondence across its first two decades 1838 1859 and by comparing it to images in editorial and congressional debates of the time Giovanna Dell Orto s analysis addresses the pivotal question of what meanings were ascribed to foreign cultures during this key time Giving Meanings to the World also establishes for the first time in scholarly literature the early history of the content of foreign news and editorials in American newspapers while also exploring alternative constructions of foreign cultures in the correspondence for an African American newspaper and by women writers Unique in both subject matter and approach this work gathers together and puts into perspective an array of information and discussion about how America viewed other nations in the early days of foreign correspondence

Native American Speakers of the Eastern Woodlands Barbara Alice Mann,2001-04-30 This collection of essays examines in context eastern Native American speeches which are translated and reprinted in their entirety Anthologies of Native American orators typically focus on the rhetoric of western speakers but overlook the contributions of Eastern speakers The roles women played both as speakers themselves and as creators of the speeches delivered by the men are also commonly overlooked Finally most anthologies mine only English language sources ignoring the fraught records of the earliest Spanish conquistadors and French adventurers This study fills all these gaps and also challenges the conventional assumption that Native thought had little or no impact on liberal perspectives and critiques of Europe Essays are arranged so that the speeches progress chronologically to reveal the evolving assessments and responses to the European presence in North America from the mid sixteenth century to the twentieth century Providing a discussion of the history culture and oratory of eastern Native Americans this work will appeal to scholars of Native American history and of communications and rhetoric Speeches represent the full range of the woodland east and are taken from primary sources

The Concise Encyclopedia of American Radio Christopher H. Sterling,Cary O'Dell,2010-04-12 The Concise Encyclopedia of American Radio is an essential single volume reference guide to this vital and evolving medium Comprised of more than 300 entries spanning the invention of radio to the Internet this reference work addresses personalities music genres regulations technology programming and stations the golden age of radio and other topics relating to radio broadcasting throughout its history The entries are updated throughout and the volume includes nine new entries on topics ranging from podcasting to the decline of radio

John Vassos Danielle Shapiro,2016-03-30 What should a television look like How should a dial on a radio feel to the touch These were questions John Vassos asked when the Radio Corporation of America RCA asked him to design the first mass produced television receiver the TRK 12 which had its

spectacular premier at the 1939 New York World's Fair Vassos emigrated from Greece and arrived in the United States in 1918 His career spans the evolution of central forms of mass media in the twentieth century and offers a template for understanding their success This is Vassos's legacy shaping the way we interact with our media technologies Other industrial designers may be more celebrated but none were more focused on making radio and television attractive and accessible to millions of Americans In John Vassos Industrial Design for Modern Life Danielle Shapiro is the first to examine the life and work of RCA's key consultant designer through the rise of radio and television and into the computer era Vassos conceived a vision for the look of new technologies still with us today A founder of the Industrial Designers Society of America he was instrumental in the development of a self-conscious industrial design profession during the late 1920s and 1930s and into the postwar period Drawing on unpublished records and correspondence Shapiro creates a portrait of a designer whose early artistic work in books like *Phobia* and *Contempo* critiqued the commercialization of modern life but whose later design work sought to accommodate it Replete with rich behind-the-scenes product stories of America's design culture in the 1930s through the 1950s this volume also chronicles the emergence of what was to become the nation's largest media company and provides a fascinating glimpse into its early corporate culture In our current era of watching TV on an iPod or a smartphone Shapiro stimulates broad discussions of the meaning of technological design for mass media in daily life

Radio and Television Regulation Hugh R. Slotten, 2003-04-30 From AM radio to color television broadcasting raised enormous practical and policy problems in the United States especially in relation to the federal government's role in licensing and regulation How did technological change corporate interest and political pressures bring about the world that station owners work within today and that tuned-in consumers make profitable In *Radio and Television Regulation* Hugh R. Slotten examines the choices that confronted federal agencies first the Department of Commerce then the Federal Radio Commission in 1927 and seven years later the Federal Communications Commission and shows the impact of their decisions on developing technologies Slotten analyzes the policy debates that emerged when the public implications of AM and FM radio and black and white and color television first became apparent His discussion of the early years of radio examines powerful personalities including navy secretary Josephus Daniels and commerce secretary Herbert Hoover who maneuvered for government control of the wireless He then considers fierce competition among companies such as Westinghouse GE and RCA which quickly grasped the commercial promise of radio and later of television and struggled for technological edge and market advantage Analyzing the complex interplay of the factors forming public policy for radio and television broadcasting and taking into account the ideological traditions that framed these controversies Slotten sheds light on the rise of the regulatory state In an epilogue he discusses his findings in terms of contemporary debates over high-resolution TV
