Regulating Workplace Safety System And Sanctions:

Regulating Workplace Safety Neil Gunningham, Richard Johnstone, 1999 Drawing from experience internationally on recent and important developments in regulatory theory and upon models and approaches constructed during the author's empirical research this book addresses the question how can law influence the internal self regulation of organisations in order to make them more responsive to occupational health and safety concerns In this context it is argued that Occupational Health and Safety management systems have the potential to stimulate models of self organisation within firms in such a way as to make them self reflective and to encourage informal self critical reflection about their occupational health and safety performance This book argues for a two track system of regulation under which enterprises are offered a choice between a continuation of traditional forms of regulation and the adoption of a safety management system based approach on the other The book concludes with a discussion of the use of criminal and administrative sanctions to provide organisations with incentives to adopt effective Occupational Health and Safety management systems The book proposes a wider range of criminal sanctions and sentencing guidelines to ensure employers receive sentencing discounts where they have introduced effective management systems

The Oxford Handbook of British Politics Matthew Flinders, Andrew Gamble, Colin Hay, Michael Kenny, 2009-07-16 The study of British politics has been reinvigorated

in recent years as a generation of new scholars seeks to build upon a distinct disciplinary heritage while also exploring new empirical territory and finds much support and encouragement from previous generations in forging new grounds in relation to theory and methods. It is in this context that *The Oxford Handbook of British Politics* has been conceived. The central ambition of the Handbook is not just to illustrate both the breadth and depth of scholarship that is to be found within the field. It also seeks to demonstrate the vibrancy and critical self-reflection that has cultivated a much sharper and engaging and notably less insular approach to the terrain it seeks to explore and understand. In this emphasis on critical engagement, disciplinary evolution and a commitment to shaping rather than re-stating the discipline, *The Oxford Handbook of British Politics* is consciously distinctive. In showcasing the diversity now found in the analysis of British politics, the Handbook is built upon three foundations. The first principle that underpins the volume is a broad understanding of the political. It covers a much broader range of topics, themes and issues than would commonly be found within a book on British politics. This emphasis on an inclusive approach also characterises the second principle that has shaped this collection, namely diversity in relation to commissioned authors. The final principle focuses on the distinctiveness of the study of British politics. Each chapter seeks to reflect on what is distinctive both in terms of the empirical nature of the issue of concern and the theories and methods that have been deployed to unravel the nature and causes of the debate. The result is a unique volume that draws upon the intellectual strengths of the study of British politics, reflects the innate diversity and inclusiveness of the discipline, isolates certain distinctive issues and then reflects on their broader international relevance and finally looks to the future by pointing towards emerging or overlooked areas of research.

Responding to Environmental Crimes Mark Wright, 2021-11-09. This book provides a critical study of environmental regulation and its enforcement in New Zealand, situated within green criminology. It seeks to address the question of whether the offences in the Resource Management Act 1991 are working by drawing on a range of sources including central government data, local government policies and reports on enforcement, information requests of councils, studies of local authority enforcement behaviour and case law. Through highly layered and richly textured analysis, the project exposes the problems that can arise when an expansive approach is taken to offences, penalties and institutional arrangements in an environmental regulatory statute. It emphasizes how discussions of harm and what should be unlawful will ensure that law makers' enforcement tools will align with their goals for punishment. It examines higher level issues such as wrongfulness and criminality in the environmental regulatory context and explores the relevance of its findings to jurisdictions outside of New Zealand. It also discusses the pros and cons of criminalisation and punishment versus restoration. It speaks to those interested in green criminology, regulatory compliance and enforcement and applications of criminal law.

Corporations and Criminal Responsibility Celia Wells, 2001. Contemporary concern about technological hazards posed by business enterprises has intensified interest in the criminality of corporations. Incorporating ideas from a wide range of literature, the book argues that there is no magic answer to

corporate power to issues of personal safety and their inter relationship with criminal law and justice The attention paid to corporate criminal liability by courts legislatures law reform bodies and international organizations has increased markedly in the past decade As in the first edition the book takes what might be called a panoptic approach to the subject Corporations and their susceptibility to criminal law are examined from sociological psychological philosophical and organizational perspectives as the book progresses This edition has been revised and updated to take account of the burgeoning scholarly literature Detailed analysis of judicial and legislative movements in England and Wales in other national jurisdictions and at the level of international organizations follows Two new chapters on corporate manslaughter and on comparative and international responses to corporate crime accommodate these changes The book is distinctive in combining legal analysis and discussion of law reform debates with a theoretical account of the relationship between legal institutions and the role of risk and blame in shaping criminal law and the practices of the criminal justice system Beyond The Risk Society: Critical Reflections On Risk And Human Security Mythen, Gabe, Walklate, Sandra, 2006-08-01 Bringing together cutting edge academics and researchers Beyond the Risk Society provides an understanding of the relevance and impact of the concept of risk in various subject areas Contributions by domain experts critically evaluate the way in which theoretical risk perspectives have influenced their fields of interest offering the opportunity to reflect upon the problems and possibilities for future work on risk **Shades of Green** Neil Gunningham, Robert A. The Public Law/Private Law Divide Mark R Freedland, Jean-Bernard Auby, 2006-03-01 The contributions brought together in this book derive from joint seminars held by scholars between colleagues from the University of Oxford and the University of Paris II Their starting point is the original divergence between the two jurisdictions with the initial rejection of the public private divide in English Law but on the other hand its total acceptance as natural in French Law Then they go on to demonstrate that the two systems have converged the British one towards a certain degree of acceptance of the division the French one towards a growing questioning of it However this is not the only part of the story since both visions are now commonly coloured and affected by European Law and by globalisation which introduces new tensions into our legal understanding of what is public and what is private *Employment Law* Stephen Taylor, Astra Emir, 2015 *Employment Law* 4e provides a complete and accessible introduction to the subject with a wealth of practical activities and a unique chapter on preparing and presenting a case **Labour Market Regulation and Deregulation in Asia** Caroline Brassard, Sarthi Acharya, 2006 Papers presented at the Conference on Regulation Deregulation and Reregulation held at Singapore during 22-24 March 2004 Governance and Regulation in Social Life Augustine Brannigan, George Pavlich, 2007-03-06 With leading international contributors this text is the only work currently available that examines W G Carson and his crucial influence in the turn towards sociological approaches to criminology and a criminological interest in governance and social control
