The Political Economy of Financial Market Regulation Peter Mooslechner, 2006 In this very nice volume reputed academics and central bankers discuss recent regulatory reforms in financial governance from a political economy perspective Therefore it is invaluable for both policymakers and scholars interested in financial governance and market regulation Sylvester C W Eijffinger Tilburg University The Netherlands Centre for Economic Policy Research UK and CESifo Research Network Munich Germany This book focuses on recent financial market reforms and their implications for social economic and political exclusion In particular it considers the hitherto under researched question of whose interests govern the design of regulatory mechanisms and who influences the decision making process This process is set out as contested terrain in which there are winners and losers and in which there are inevitably circles of exclusion The authors comprising financial authority experts and academic specialists expand the concept of exclusion beyond its typical social dimension to incorporate all actors be they individuals or institutions not permitted to contribute to financial market regulation as a public good As they point out this may take the form of political economic or indeed cultural exclusion The book examines the conflicts that arise between various interests and how these are managed within the process of regulation

Various, 2021-06-23 From votes to strikes to street violence politics is intrinsically geographical Many of the books in this set originally published between 1964 and 1990 illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities *Political Participation and Government Regulation* Sam Peltzman, 1998-11-15 Sam Peltzman is one of the world's leading economists and the essays in this collection are central to the modern canon in political economy These ten articles and an original introduction respond to two broad questions How does government work How do voters and their elected representatives make decisions Given the media's portrayal of the cynical political atmosphere in America Peltzman's responses are rather surprising the electorate really does make well informed decisions and elected officials actually do tend to vote according to their constituents interests These conclusions bear the stamp of the Chicago approach to political economy which applies microeconomic principles to political phenomena an approach that has had considerable success explaining why certain government policies have not achieved their intended effects This collection reflects Peltzman's long career studying the interface between the private economy and the public sector It will be essential to anyone who wishes to study government activity and voting behavior from an economic perspective *The Politics of Telecommunications Regulation: The States and the Divestiture of AT&T* Jeffrey E.

Political Accountability and Regulatory Performance in Infrastructure Industries Farid Gasmi, Paul Noumba Um, Laura Recuero Virto, 2006 The aim of this paper is to empirically explore the relationship between the quality of political institutions and the performance of regulation an issue that has recently occupied much of the policy debate on the effectiveness of infrastructure industry reforms Taking the view that political accountability is a key factor that links political structures and regulatory processes the authors investigate for the case of telecommunications its impact on the performance of regulation in two time series cross sectional data sets on 29 developing countries and 23 industrial countries covering the period 1985-99 In addition to confirming some well documented results on the positive role of regulatory governance in infrastructure industries the authors provide empirical evidence on the impact of the quality of political institutions and their modes of functioning on regulatory performance The analysis of the data sets shows that the positive effect of political accountability on the performance of regulation is stronger in developing countries An important policy implication of this finding is that future reforms in these countries should give due attention to the development of politically accountable systems
