Risk Principles for

Public Utility Regulators Janice A. Beecher, Steven G. Kihm, 2016-05-01 Risk and risk allocation have always been central issues in public utility regulation Unfortunately the term risk can easily be misrepresented and misinterpreted especially when disconnected from long standing principles of corporate finance This book provides those in the regulatory policy community with a basic theoretical and practical grounding in risk as it relates specifically to economic regulation in order to focus and elevate discourse about risk in the utility sector in the contemporary context of economic technological and regulatory change This is not a how to book with regard to calculating risks and returns but rather a resource that aims to improve understanding of the nature of risk It draws from the fields of corporate finance behavioral finance and decision theory as well as the broader legal and economic theories that undergird institutional economics and the economic regulatory paradigm We exist in a world of scarce resources and abundant uncertainties the combination of which can exacerbate and distort our sense of risk Although there is understandable impulse to reduce risk attempts to mitigate may be as likely to shift risk and some measures might actually increase risk exposure Many of the concepts explored here apply not just to financial decisions such as those by utility investors but also to regulatory and utility decision making in general

great deal of economics is about law the functioning of markets property rights and their enforcement financial obligations and so forth yet these legal aspects are almost never addressed in the academic study of economics Conversely the study and practice of law entails a significant understanding of economics yet the drafting and administration of laws often ignore economic principle The New Palgrave Dictionary of Economics and the Law is uniquely placed by the quality breadth and depth of its coverage to address this need for building bridges Drawn from the ranks of academics professional lawyers and economists in eight countries the 340 contributors include world experts in their fields Among them are Nobel laureates in economics and eminent legal scholars First published in 1998 and now available in paperback for the first time The New Palgrave Dictionary of Economics and the Law has established itself as a classic reference work in this important field

Reinventing Water and Wastewater Systems Paul Seidenstat, David Haarmeyer, Simon Hakim, 2002-07-25 A critical and insightful look at the past present and future state of water and wastewater services In response to the worldwide water crisis foreseen by many experts Reinventing Water and Wastewater Systems presents practical solutions for making drinking water more affordable and available as well as strategies for improving water sanitation to satisfy the demands of a growing global population Through extensive data and case histories this book demonstrates the potential success of privatizing water delivery and wastewater treatment facilities In addition it provides examples of state of the art techniques for achieving higher efficiencies in water infrastructure facilities through reengineering improved technologies and quality benchmarking Contributed chapters are provided by leading global engineers and economists from such companies as the World Bank Stone and Weber Consultants the Atlantis Water Fund and the Anglian Water Company Coverage by these experts includes exploring regulatory frameworks financing the water and wastewater infrastructure reinventing public sector operations analyzing the past and future of the global water industry and examining the restructuring operations in selected U S cities Reinventing Water and Wastewater Systems Global Lessons for Improving Water Management is a constructive volume for civil engineers working in water and wastewater treatment urban and regional planners and environmental engineers as well as government administrators overseeing infrastructure and water systems and financial institutions involved with underwriting major water improvement projects The Economics of Regulation Charles Franklin Phillips, 1969

Institutional Reform, Regulation and Privatization Rolf W. Künneke, Aad F. Correljé, John Groenewegen, 2005-01-01 This book provides evolutionary and institutional perspectives on the reform of infrastructure industries tracing the development of this process in a number of sectors and countries The contributors contend that infrastructure based industries such as telecommunications public transport water management and energy have been increasingly exposed to the dynamism of the market since becoming privatized and have therefore been stimulated into short term efficiency and long term innovation Drawing on institutional economic theory backed up with case studies such as the California energy crisis the Dutch gas industry oil and electricity companies in Spain and the privatization of Schipol airport in Amsterdam the book focuses on

process driving forces and actors roles to explain how new balances are established between competing institutions The degree to which the processes of institutional change are predictable and the effects of deliberate strategic interventions of governments or private actors are explored Specific technical and sector aspects and their influence on institutional change in various infrastructures are also discussed Telecommunications Policy for the 1990s and Beyond Walter G. Bolter,James W. McConnaughey,Fred J. Kelsey,1990 This book analyzes the development of the telecommunications industry since the AT T divestiture The reference work examines the technological revitalization of the telecommunications industry from the perspective of global markets and from these trends considers the implications for regulatory policy in the future
