Life Sciences, Information Sciences Thierry Gaudin, Dominique Lacroix, Marie-Christine Maurel, Jean-Charles Pomerol, 2018-03-15 Developed from presentations given at the Cerisy SVSI Sciences de la vie sciences de l information conference held in 2016 this book presents a broad overview of thought and research at the intersection of life sciences and information sciences The contributors to this edited volume explore life and information on an equal footing with each considered as crucial to the other In the first part of the book the relation of life and information in the functioning of genes at both the phylogenetic and ontogenetic levels is articulated and the common understanding of DNA as code is problematized from a range of perspectives The second part of the book homes in on the algorithmic nature of information questioning the fit between life and automaton and the accompanying division between individualization and invariance Consisting of both philosophical speculation and ethological research the explorations in this book are a timely intervention into prevailing understandings of the relation between information and life

The Darkening Spirit David Tacey, 2013-06-26 The twenty first century could well be Jung s century just as the twentieth century was Freud s Jung predicted the demise of secular humanism and claimed we would search for alternatives to science atheism and reason We would experience a new and even unfashionable appetite

for the sacred Educated people however would not return to unreconstructed religions because these do not express the life of the spirit as discerned by modern consciousness The sacred has developed a darker hue and worshipping symbols of light and goodness no longer satisfies the longings of the soul The new sacred cannot be contained by the formulas of the past but nor can we live without a sense of the sacred We stand in a difficult place between traditional religions we have outgrown and a pervasive materialism we can no longer embrace These changes in our culture have come sooner than Jung might have imagined In his time Jung struck many as eccentric or unscientific But his works speak to our time since we have experienced the full gamut of Jungian transformations the unsettlement of Judeo Christian culture the rise of the feminine the onslaught of the dark side the critique of modernism and positivism and the recognition that the Western ego is neither the pinnacle of evolution nor the lord of creation A new life is needed beyond the ego but we do not yet know what it will look like The outbreak of strong religion and terrorism are signs of the times but these are expressions of a distorted and repressed spirit and not one hopes genuine pointers to the future What the future holds is uncertain but Jung s prophetic vision helps to prepare us for what is to come and this will be of great interest to analytical psychologists and psychoanalysts as well as to theologians futurists sociologists and the general reader

Popper and John Watkins He changed his department not as a defector but as a rebel attempting to exorcize the ancestral spirit He criticized the method of participant observation not as useless but as not comprehensive it is neither necessary nor sufficient for the making of certain contributions to anthropology rather it all depends on the problem situation And so Jarvie remained an anthropologist at heart who in addition to some studies in rather conventional anthropological or sociological molds also studied the tribe of social scientists but also critically examining their problems especially their overall rather philosophical problems but not always so a few of the studies included in this volume exemplify his work on specific issues whether of technology or architecture or nationalism in the academy or moviemaking or even movies exhibiting excessive sex and violence These studies attract his attention both on account of their own merit and on account of their need for new and powerful research tools such as those which he has forged in his own intellectual workshop over the last two decades
