Reinventing Territories through Solidarity Didier Chabaud, Philippe Eynaud, Nathalie Raulet-Croset, 2025-06-23 While territories have always faced multiple challenges, the addition of ecological transition to economic, cultural, and social issues complicates matters considerably. Transition calls for new perspectives. The reinvention of territories through solidarity appears to be a particularly relevant approach as it allows us to draw on the many innovations brought about by players in the social and solidarity economy (SSE). To illustrate this point, the book brings together case studies that bear witness to their astonishing ability to link the economy and local democracy to ensure the sustainability of their activities. These case studies illustrate a renewed vision of territorial development based on cooperation between the SSE, local authorities, entrepreneurs, and citizens. Subsequently, they usher in a new way of thinking about public action in which solidarity players undertake an important role in co-constructing with local public players systems capable of meeting the major challenges of our time.

Reinventing Talent Management Edward E. Lawler, 2017-05-15 In this book, preeminent organizational scholar Edward Lawler identifies a comprehensive and integrated set of talent management practices that fit today's rapidly evolving workplace. The world of work has changed dramatically, says Lawler. Organizations now operate in a global environment. New technologies continue to disrupt how, when, and where work is done and should be managed. The workforce is becoming more diverse. Sustainability has joined profitability as a key business goal. All of this has dramatically accelerated the pace of change, making recruiting the best talent not simply filling positions an overriding concern. But too many organizations still use a job-based, bureaucratic talent management approach that doesn't take into account how the world has changed. Indeed, a recent study showed that from 1995 to 2016, there was no significant change in the way HR spends its time. Lawler says that talent management has to be reinvented. It needs to be closely linked to the organization's overall strategy. Recruitment and talent management should be driven by the skills and competencies the organization needs for long-term growth. This means talent management requires agile systems that can respond quickly to changing conditions and that take a more individualized approach to evaluating and rewarding performance. And everything talent management does has to be based on evidence, not tradition. Lawler looks at attracting, selecting, developing, rewarding, managing, and organizing talent through this new lens. In today's world, organizations have to constantly reinvent themselves, and talent management must do the same.
