Fragile Families and the Marriage Agenda Lori Kowaleski-Jones, Nicholas Wolfinger, 2006-07-04 Many people see government involvement in family policy as a response to popular concerns that the American family is in a state of crisis One of the primary concerns with fragile families one parent usually mother is economic Poverty rates for single mothers are several times that of two parent families Economic deprivation while growing up has been linked to poor physical health reduced intellectual ability and academic achievement Some social sciences contend that marriage is the solution to many of the problems associated with single parent families Other experts believe that government programs designed to raise marriage rates may cause more problems than they solve i.e. domestic violence

divorce etc The proposed volume will explore issues related to fragile families from many different perspectives on the causes and consequences of this issue This book is divided up into sections covering legal and theoretical perspectives causes and consequences of offspring wellbeing and the aspect of father s importance to the fragile families **Alcohol, Other Drugs, and Behavior** John Jung,2010 Excellent text for covering alcohol and other drugs of abuse **Child Psychopathology** Eric J. Mash,Russell A. Barkley,2014-07-15 This highly respected reference and text on developmental psychopathology brings together leading authorities on the psychological biological and social contextual determinants of child and adolescent problems The comprehensive introductory chapter provides a state of the art developmental systems framework for understanding behavioral and emotional disturbances Subsequent chapters synthesize the developmental bases of specific disorders The characteristics epidemiology developmental course and outcomes and etiological pathways of each disorder are described as are risk and protective factors and issues in conceptualization and diagnosis Important unanswered questions are identified and implications for treatment and prevention considered New to This Edition Includes DSM 5 criteria and discussion of changes Incorporates over a decade s worth of research advances in genetics neurobiology and other areas Chapters on bipolar disorder suicide self injury obsessive compulsive spectrum disorders and personality disorders New Developments in Parent-child Relations Dorothy M. Devore,2006 In the life of a person there are probably no events outside influences or genetic characteristics even approaching the significance of the broad category of acts and actions called parent child relations These include decisions and actions and lack thereof from the first day of life and sometimes throughout the life span They include learning by example schooling disciplining coping skills behavioural practices eating habits communication skills conflict management and a plethora of other actions This book presents new research in this dynamic field **Handbook of Adolescent Health Risk Behavior** Ralph J. DiClemente,William B. Hansen,Lynn E. Ponton,2013-11-21 Adolescence is a developmental period of accelerating physical psychological social cultural and cognitive development often characterized by confronting and surmounting a myriad of challenges and establishing a sense of self identity and autonomy It is also unfortunately a period fraught with many threats to the health and well being of adoles cents and with substantial consequent impairment and disability Many of the adverse health consequences experienced by adolescents are to a large extent the result of their risk behaviors Many adolescents today and perhaps an increasing number in the future are at risk for death disease and other adverse health outcomes that are not primarily biomedical in origin In general there has been a marked change in the causes of morbidity and mortality among adolescents Previously infectious diseases accounted for a disproportionate share of adolescent morbidity and mortality At present however the over whelming toll of adolescent morbidity and mortality is the result of lifestyle practices Encyclopedia of Adolescence Roger J.R. Levesque,2014-07-08 The Encyclopedia of Adolescence breaks new ground as an important central resource for the study of adolescence Comprehensive in breath and textbook in depth the Encyclopedia of

Adolescence with entries presented in easy to access A to Z format serves as a reference repository of knowledge in the field as well as a frequently updated conduit of new knowledge long before such information trickles down from research to standard textbooks By making full use of Springer s print and online flexibility the Encyclopedia is at the forefront of efforts to advance the field by pushing and creating new boundaries and areas of study that further our understanding of adolescents and their place in society Substantively the Encyclopedia draws from four major areas of research relating to adolescence The first broad area includes research relating to Self Identity and Development in Adolescence This area covers research relating to identity from early adolescence through emerging adulthood basic aspects of development e g biological cognitive social and foundational developmental theories In addition this area focuses on various types of identity gender sexual civic moral political racial spiritual religious and so forth The second broad area centers on Adolescents Social and Personal Relationships This area of research examines the nature and influence of a variety of important relationships including family peer friends sexual and romantic as well as significant nonparental adults The third area examines Adolescents in Social Institutions This area of research centers on the influence and nature of important institutions that serve as the socializing contexts for adolescents These major institutions include schools religious groups justice systems medical fields cultural contexts media legal systems economic structures and youth organizations Adolescent Mental Health constitutes the last major area of research This broad area of research focuses on the wide variety of human thoughts actions and behaviors relating to mental health from psychopathology to thriving Major topic examples include deviance violence crime pathology DSM normalcy risk victimization disabilities flow and positive youth development
