The Transmission of Affect Teresa Brennan,2014-02-15

The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar. Indeed, phrases that capture this notion abound in the popular vernacular: negative energy dumping, you could cut the tension with a knife. The *Transmission of Affect* deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another. The ability to borrow or share states of mind, once historically and culturally assumed, is now pathologized, as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life. To neglect the mechanism by which affect is transmitted, the author claims, has serious consequences for science and medical research. Brennan's theory of affect is based on constant communication between individuals and their physical and social environments. Her important book details the relationships among affect, energy, and new maladies of the soul, including attention deficit disorder, chronic fatigue syndrome, codependency, and fibromyalgia.

Einstein's Relativity And Beyond: New Symmetry Approaches Hsin-i Chang, Jong-ping Hsu, 2000-07-20

The purposes of this book are 1) to explore and expound relativity physics and four-dimensional symmetry from the logically simplest viewpoint by making one single postulate instead of two, and 2) to indicate the simplest generalization of the Lorentz transformation in order to cope with frames with constant linear accelerations. The fundamentally new ideas of the first purpose are developed on the basis of the term paper of a Harvard physics undergraduate. They lead to an unexpected affirmative answer to the long-standing question of whether it is possible to construct a relativity theory without postulating the constancy of the speed of light and retaining only the first postulate of special relativity. This question was discussed in the early years following the discovery of special relativity by many physicists, including Ritz, Tolman, Kunz, Comstock, and Pauli, all of whom obtained negative answers. Furthermore, the new theory of relativity indicates the truly universal and fundamental constants in physics and provides a broad view of relativistic physics beyond special relativity. It substantiates the view and sheds light on the understanding that the four-dimensional symmetry framework can accommodate many different concepts of physical time, including common time and Reichenbach's general concept of time. This logically simplest viewpoint of relativity allows a natural extension of the physics of particles and fields from inertial frames to noninertial frames in which the speed of light is not constant. New predictions in physics resulting from this new viewpoint are discussed. The book is based on papers by the author and his collaborators in *Physics Letters A*, *Nuovo Cimento B*, and *Physical Review A* and *D*.

A New Approach to Kant Zehou Li, 2018-05-21. Originally written during the Cultural Revolution, this book introduces and interprets Kant's critical philosophy through the lens of its author Li Zehou's own philosophical approach: anthropological historical ontology. Li argues that the process of human development begins with and is shaped by the practical material activities associated with making and using tools in primitive societies. Over millions of years, these ever

evolving practices accumulate and become sedimented into archetypical forms that shape history social relationships and human psychology Li's views draw upon Marx's theory of practice and as those familiar with his work will recognize his reinterpretation of Confucian thought with its emphasis on material life and worldly existence Beginning with the assumption that the question at heart of Kant's philosophy is What is the human being Li offers a highly original answer by arguing that the root of Kant's transcendental knowledge universal forms moral autonomy and aesthetics can be found in the practical and social activities associated with tool making Li offers a new reading not only of Kant but of modern European philosophy including Hegel and Marx that forces us to rethink our understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our shared human future

Evolutionary Macroeconomics (Routledge Revivals) John Foster,2013-02-01 First published in 1987 Evolutionary Macroeconomics offers an evolutionary approach to macroeconomics as an alternative to contemporary new classical and Keynesian macroeconomics In order to develop such an approach an alternative view of the micro foundations of macroeconomics is presented The book begins with a commentary on the state of macroeconomics and an evaluation of attempts to redevelop its underlying vision of economic behaviour Particular attention is paid to the treatment of expectations and anticipations The second part of the book presents a behavioural framework which is compatible with an evolutionary perspective on economic behaviour The third part of the book discusses the implications of adopting an evolutionary approach to macroeconomic theory empirical methods and policy design culminating in a specific policy proposal to cure stagflation

Evolution 2.0 Martin Brinkworth,Friedel Weinert,2011-10-07 These essays by leading philosophers and scientists focus on recent ideas at the forefront of modern Darwinism showcasing and exploring the challenges they raise as well as open problems This interdisciplinary volume is unique in that it addresses the key notions of evolutionary theory in approaches to the mind in the philosophy of biology in the social sciences and humanities furthermore it considers recent challenges to and extensions of Neo Darwinism The essays demonstrate that Darwinism is an evolving paradigm with a sphere of influence far greater than even Darwin is likely to have imagined when he published On the Origin of Species in 1859

Marshall's Evolutionary Economics Tiziano Raffaelli,2003-08-29 Alfred Marshall was one of the most important economists ever to have lived This excellent new book from a Marshall expert respected the world over attempts to show that Marshall anticipated

some of the views that are now associated with the cognitive sciences Examining Marshall s philosophy of the human mind his overall approach to economics his concern for socio economic issues and the fertility of his framework this book breathes fresh life into the fascinating world of Marshallian economics **The Cumulative Book Index** ,1985 A world list of books in the English language **The Origins and History of Consciousness** Erich Neumann,2020-03-31 The Origins and History of Consciousness draws on a full range of world mythology to show how individual consciousness undergoes the same archetypal stages of development as human consciousness as a whole Erich Neumann was one of C G Jung s most creative students and a renowned practitioner of analytical psychology in his own right In this influential book Neumann shows how the stages begin and end with the symbol of the Uroboros the tail eating serpent The intermediate stages are projected in the universal myths of the World Creation Great Mother Separation of the World Parents Birth of the Hero Slaying of the Dragon Rescue of the Captive and Transformation and Deification of the Hero Throughout the sequence the Hero is the evolving ego consciousness Featuring a foreword by Jung this Princeton Classics edition introduces a new generation of readers to this eloquent and enduring work A World Perspective Through 21st Century Eyes R. K. Koslowsky,2004 As a community of citizens in the twenty first century we are fortunate to have emerged from the biological evolution of the past million years and the cultural evolution of the past ten thousand years We have enjoyed an abundance of time and freedom to explore the why and how things work and continue to push the limits of the present technological evolution A World Perspective through 21st Century Eyes is not a history textbook or a science history book It is not a treatise on philosophy or theology Rather it is a book on the major themes in the evolution of man and the impact of science thereto It is a book with the major theme addressing the impact of science on society one in which the technical community has not had time to digest and reflect upon during the past fifty years With the time pressures of the day and in the specializations in which we operate there is precious little surplus energy available to us for leisure activity of our choosing I trust that this treatment will sketch a broad outline that the scientific and technological community has had on society over the past five thousand years and potential areas where further impacts will be made in the next one hundred years To this effort I believe the reader will find his or her surplus energy well spent An engineer to which my life s training was aimed is expected to have a complete and thorough knowledge of some subjects This is true for most of us in the technical community therefore it is also true that most of us choose not to write about many topics of which we are not master I feel this separation of subjects and isolation of scientists and technologists does a disservice to others in other disciplines who look for different views in order to maintain a balanced perspective on the myriad of issues confronting them each day Those of us who have grown up in the Western Culture without a technical education may find this discussion exciting in the different way it is broached Just as an engineer appreciates the beauty of the Golden Gate Bridge and the precision of the clock the inspiration from watching the setting sun reading a biblical passage or viewing a Bouguereau painting can motivate and enlighten that same engineer In this way I aim

to provide the reader either technical or non technical with an appreciation of the evolving world from the viewpoint of one who has been technically trained I cannot reproduce the sunset paint or sing to inspire but I hope these insights motivate you to pause and consider your area of expertise with the aim for you to contribute that which has inspired and motivated you

The Human Buddha Aziz Kristof,2000-01-01 The Message for the New Millennium presents a vision of Awakening which reveals the human face of the Buddha It is essential at this moment in our evolution to return to a more realistic perspective of enlightenment Most seekers cannot relate to the concept of enlightenment for they feel intimidated by the image of the flawless Buddha Here The Human Buddha is no longer a spiritual superman who denies natural longings desires and human imperfections The Human Buddha is indeed a sensitive being a child of the Beloved like all of us The Human Buddha openly acknowledges the gentle and vulnerable quality of his or her heart

The Oxford Companion to Consciousness Tim Bayne,Axel Cleeremans,Patrick Wilken,2014-02-27 Consciousness is undoubtedly one of the last remaining scientific mysteries and hence one of the greatest contemporary scientific challenges How does the brain s activity result in the rich phenomenology that characterizes our waking life Are animals conscious Why did consciousness evolve How does science proceed to answer such questions Can we define what consciousness is Can we measure it Can we use experimental results to further our understanding of disorders of consciousness such as those seen in schizophrenia delirium or altered states of consciousness These questions are at the heart of contemporary research in the domain Answering them requires a fundamentally interdisciplinary approach that engages not only philosophers but also neuroscientists and psychologists in a joint effort to develop novel approaches that reflect both the stunning recent advances in imaging methods as well as the continuing refinement of our concepts of consciousness In this light the Oxford Companion to Consciousness is the most complete authoritative survey of contemporary research on consciousness Five years in the making and including over 250 concise entries written by leaders in the field the volume covers both fundamental knowledge as well as more recent advances in this rapidly changing domain Structured as an easy to use dictionary and extensively cross referenced the Companion offers contributions from philosophy of mind to neuroscience from experimental psychology to clinical findings so reflecting the profoundly interdisciplinary nature of the domain Particular care has been taken to ensure that each of the entries is accessible to the general reader and that the overall volume represents a comprehensive snapshot of the contemporary study of consciousness The result is a unique compendium that will prove indispensable to anyone interested in consciousness from beginning students wishing to clarify a concept to professional consciousness researchers looking for the best characterization of a particular phenomenon

A Quest for Humanity Menno Boldt,2011-01-01 In *A Quest for Humanity* Menno Boldt presents a persuasive new framework for achieving a human social order in the global age Boldt explores the concept of the good society as a world in which every person can realize their potential for humanity through liberty social justice and equal human dignity *A Quest for Humanity* innovatively positions globalization as a deterministic

phenomenon of expanding interdependence and shared knowledge resulting in ever larger economic and political jurisdictions but also creating social and psychological links between peoples across the world Boldt challenges mainstream certainty that Western democracy and constitutional human rights are the exemplary doctrines for the global good society With a fresh vision designed to inspire a universal acknowledgement of human dignity A Quest for Humanity powerfully affirms the value of each human being A Transformation Journey to Creative and Alternative Planetary Futures Victor V. Motti,2019-03-21 This book presents a counter trend against nationalism religious extremism xenophobia and racism It advocates an alternative globalization based not on trade the economy and politics but on humanity s transcendence to a collective consciousness Inspired by a pantheist worldview it applies an integral perspective toward strategic foresight and anticipation on the planetary scale Controversial disappearing and emerging binary oppositions are explained within the framework of the mythology of the Lord of Wisdom versus the Ignorant Mind It shows that our anticipatory planetary era might be characterized by the acknowledgement of our zero knowledge as measured in the ocean of all disciplines zero carbon for energy zero war in politics and zero killing in society zero conscious beings excluded and zero existence as we have known it as humanity merges into some higher and enriched complexity **The Conscious Mind and the Material World** Douglas M. Stokes,2015-01-24 What makes us who we are From a scientific viewpoint any individual s existence is improbable at best Consciousness as an actuality is inarguable its nature however remains elusive This work argues the view of self as a field of pure consciousness debating the existence of a continuing self and drawing conclusions about this entity and its relation to the physical body and the physical world Beginning with an exploration of the relationship between mind and matter it discusses ostensible psi phenomena such as extra sensory perception and psychokinesis and their implications for our understanding of the mind and the cosmos Additional topics include the perennial mind body problem the role of consciousness in quantum mechanics and conversely the role of quantum mechanics in the study of consciousness the anthropic principle and evidence for Intelligent Design Quasi religious questions such as the survival of consciousness after death are also addressed
