Simple Things Won't Save The Earth:

Simple Things Won't Save the Earth J. Robert Hunter, 2014-02-19 We drive cars with Save the Whales bumper stickers buy aerosol sprays that advertise no chlorofluorocarbons and wear T shirts made from organically grown cotton All of these earth friendly choices and products convince us that we are thinking globally acting locally and saving the planet But are we really In this provocative book J Robert Hunter asserts that using catchy slogans and symbols to sell the public on environmental conservation is ineffective misleading and even dangerous Debunking the Fifty Simple Things You Can Do to Save the Earth approach Hunter shows that there are no simple solutions to major environmental problems such as species extinction ozone depletion global warming pollution and non renewable resource consumption The use of slogans and symbols Hunter argues simply gives the public a false sense that someone is solving the environmental crisis while it remains as serious now as when the environmental movement began Writing in plain yet passionate prose for general readers he here opens a national debate on what is really required to preserve the earth as a habitat for the human species

Confronting Consumption Thomas Princen, Michael Maniates, Ken Conca, 2002 Essays that offer ecological social and political perspectives on the problem of overconsumption

Ecopiety Sarah McFarland Taylor, 2019-11-12 Tackles a human problem we all share the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth The stories we encounter about the environment in popular culture too often promote an imagined moral economy assuring us that tiny acts of voluntary personal piety such as recycling a coffee cup or purchasing green consumer items can offset our destructive habits No need to make any fundamental structural changes The trick is simply for the consumer to buy the right things and shop our way to a greener future It s time for a reality check Ecopiety offers an absorbing examination of the intersections of environmental sensibilities contemporary expressions of piety and devotion and American popular culture Ranging from portrayals of environmental sin and virtue such as the eco pious depiction of Christian Grey in Fifty Shades of Grey to the green capitalism found in the world of mobile device carbon sin tracking software applications to the socially conscious vegetarian vampires in True Blood the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments Taylor makes the case that it is not through a framework of grim duty or obligation but through one of play and delight that we may move environmental ideals into substantive action

Simple Things Won't Save the Earth J. Robert Hunter, 1997 We drive cars with Save the Whales bumper stickers buy aerosol sprays that advertise no chlorofluorocarbons and wear T shirts made from organically grown cotton All of these earth friendly choices and products convince us that we are thinking globally acting locally and saving the planet But are we really In this provocative book J Robert Hunter asserts that using catchy slogans and symbols to sell the public on environmental conservation is ineffective misleading and even dangerous Debunking the Fifty Simple Things You Can Do to Save the Earth approach Hunter shows that there are no simple solutions

to major environmental problems such as species extinction ozone depletion global warming pollution and non renewable resource consumption The use of slogans and symbols Hunter argues simply gives the public a false sense that someone is solving the environmental crisis while it remains as serious now as when the environmental movement began Writing in plain yet passionate prose for general readers he here opens a national debate on what is really required to preserve the earth as a habitat for the human species *The Greening of Everyday Life* John M. Meyer,Jens Kersten,2016 This interdisciplinary volume develops a distinctive new way of talking about environmental concerns in post industrial society *Powerdown* Richard Heinberg,2004-09-01 This stark look at prospects for a truly sustainable culture speaks frankly about how it is time to Powerdown or to reduce per capita resource usage in wealthy countries develop alternative energy sources and much more *Mother Jones Magazine* ,1998-01 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues **Acting Locally** Harold Ward,2023-07-03 Ninth in the Service Learning in the Disciplines Series this book discusses the pervasive use of service learning in environmental studies programs and explains why it often is a required part of the environmental studies curriculum Contributors from a wide range of college and university environmental studies programs discuss the benefits and challenges these programs provide and the consequent natural fit between environmental studies and service learning
