**Historical Dictionary of Singapore** Justin Corfield, 2010-12-02 In spite of Singapore's small size it has long had a major impact on the world because of its geographical location and its wealth. The British initially made the island a major port for the shipping of goods and later as an airline hub for the region. These factors along with a steady government have helped to contribute to the country's affluence. This multicultural, multiracial and multi-religious island nation is the envy of many countries in the world which have tried to emulate the economic success of Singapore. The new edition of the *Historical Dictionary of Singapore* has been completely rewritten since the first edition was released 20 years ago. It relates the history of this country through a chronology, an introductory essay, an expansive bibliography and over 500 cross-referenced dictionary entries on significant persons, events, places, organizations and other aspects of Singapore history from the earliest times to the present.

**Buku Dunia Singapura**, 1987 *Singapore Stories* Ernest Koh, 2010 The history of Singapore has been widely conflated with the history of its economic success. From its heyday as a nexus of trade during the imperial era to the modern city state that boasts high living standards for most of its citizens, the history of Singapore is commonly viewed through the lens of the ruling elite. Published in two volumes in 1998 and 2000, Lee Kuan Yew's memoirs *The Singapore Story* epitomizes this top-down definitive narrative of the nation's past. The history of post-war Singapore has largely been reduced to a series of decisions made by the nation's leaders. Few existing studies explore the role and experiences of the ordinary person in Singapore's post-war history. There are none that do this through ethnography, oral history and collective biography. In a critical study that has no parallel among existing works on Singapore history, this book dispenses with the homogenous historical experience that is commonly presumed in the writing of Singapore's national past after 1945 and explores how the enforcement of a uniform language policy by the Singapore government for cultural and economic purposes has created underappreciated social and economic divides among the Chinese of Singapore, both between and within families. It also demonstrates how mapping distinct economic, linguistic and cultural cleavages within Singaporean Chinese society can add new and critical dimensions to understanding the nation's past and present. Chief among these, the author argues, are the processes behind the creation and entrenchment of class structures in the city state, such as the increasing value of English as a form of opportunity-generating capital.

**Singapore Chinese Society in Transition** Hong Liu, Sin Kiong Wong, 2004 As the first comprehensive study of its kind, this book analyzes the dynamics, processes, mechanisms and consequences of socio-economic and political changes in Singaporean Chinese society from 1945 to 1965. By employing a wide range of primary materials that have been rarely used before, the authors have demonstrated the multi-dimensionality and complexity of the Chinese society in postwar Singapore, which was full of vitality and politically active. They argue that the combination of the internal dynamism and the changing socio-political framework shaped the nature and characteristics of the Chinese community and its fundamental role in the making of modern Singapore. This study is essential reading for an understanding of not only the Chinese politics and business networks

in postwar Singapore but also the historical evolution of the newly independent Republic

Colonial Frames, Nationalist Histories Mrinalini Rajagopalan, 2024-12-15 In recent years there has been a growing debate on the various ways that architecture and urbanism have served the triad of colonialism nationalism and modernity Some have argued that newly decolonized nations sought to represent their modernity through the spaces and symbols of their new national capitals while other scholars have stressed that while the forms and processes of architectural modernization have no doubt served as aids to various nation building projects it is the specific role of individual agents such as planners architects an emerging twentieth century bourgeois citizen or colonial administrators in this national project that needs attention However many such explorations of this subject have so far taken the form of monographs that concentrate on one city thereby limiting the scope required to address the broader questions at hand By juxtaposing case studies from various colonial and postcolonial settings from around the world this edited volume provides a comprehensive and diachronic investigation of the ways in which architecture and urban space mediate the intersections of colonialism nationalism and modernity Examining such spaces as archaeological sites memorials new buildings or historic urban fabric the book questions certain established dichotomies such as that of the imperial center and the colonized periphery the colonial past and the postcolonial present or the isolation of the national or local from the global Besides offering unique historical perspectives on colonialism nationalism and modernity each case study also reassesses theories regarding memory and monumentalization the appropriation and deployment of tradition in the service of nationalism and the institutions of modernity A common thread throughout the essays in this volume is a focus on new loci of power that emerge either in collision with colonial power structures or in collaboration with or those that emerge in the wake of decolonization While the authors recognize the presence of a larger structure of colonial hegemony they also investigate those centers of power that emerge in the interstices of crevices of colonial power Interdisciplinary and theoretically innovative this book offers a global perspective on colonial and national landscapes rewrites the master creator narrative examines national landscapes as sites of contestation and views the globalization of processes such as archaeology beyond
