**Singing Grass, Burning Sage** Jack Nisbet, 1999 Singing Grass Burning Sage is a celebration in photos and text of eastern Washington's arid lands a region that encompasses the heart of the Columbia River Basin and supports a shrub steppe environment dominated by sagebrush and bunchgrass Formed by massive basalt flows that pulsed across the Basin sculpted by ceaseless winds and scoured by the cataclysmic Lake Missoula floods at the climax of our most recent Ice Age this landscape offers some of the most spectacular geologic vistas in the world The vast spaces of this wide domain are full of wonder and surprise as that raw rock provides the setting for a dramatic interplay of human and natural history

*Washington's History, Revised Edition* Harry Ritter, 2018-10-23 Now with a new design and updated content including three brand new chapters plus a new preface and a postscript from the author An anything but dry history textbook in a take it with you package Washington's History is a fascinating walk through the sweeping story of a place and its people For centuries the natural beauty and riches of the Northwest have excited the human imagination from its first peoples to seafaring explorers to westward thinking pioneers to technological thinkers and giants A Washington resident himself author Harry Ritter offers fifty five vignettes illustrated with rare archival photographs that comprise an entertaining and informative picture of life in the Far Northwest Learn about the Natives explorers traders missionaries loggers farmers inventors and politicians From Chief Seattle to Dr John McLoughlin William E Boeing Henry M Scoop Jackson Bill Gates and Jeff Bezos these are the people at the epicenter of events that shaped the Evergreen State The Hanford Reach Stamford D. Smith, 2004 The desert country along the Columbia River is one of the West's least known desert places one that most people don't even drive through unless they are unusually curious travelers The Hanford Reach is the last free stretch of the river between the McNary and Priest Rapids Dams a place boasting a varied landscape of floodplains wetlands deserts orchards and nuclear reactors This is not a place that people think to visit Known primarily for hosting the country's most toxic nuclear outpost it is public land that barely exists in public consciousness But because the Reach has been posted off limits by the military since 1943 this book offers readers a little seen glimpse into what the Pacific Northwest's arid east was like before the postwar boom Susan Zwinger has kayaked the Columbia through Hanford Reach with scientists and activists who are helping to restore it and in this book she outlines the geographical extent of the Reach reviews its history and takes readers through the terrain by foot on road and on the river Here is a land of dark lava flows and basalt cliffs interspersed throughout subtle pale shrub steppe a table of aridity cut through by one of the country's most prodigious rivers Zwinger's sparkling text enhanced by Skip Smith's striking photos captures the subtleties of the contrasting vistas just as it makes clear the depth of the radioactive poisoning within the soil and wildlife We have only just begun to unfold the land's treasures petroglyphs ancient village sites new species and geological wonders and in 2000 President Clinton protected 560 square miles of land as the Hanford Reach National Monument This book celebrates what is preserved in that buffer zone at the
