Frances Andrews, Agata Pincelli

Medieval Westminster 1200 154:

Paths to Kingship in Medieval Latin Europe, c. 950-1200 Björn Weiler, 2021-10-14 Medieval Europe was a world of kings but what did this mean to those who did not themselves wear a crown How could they prevent corrupt and evil men from seizing the throne How could they ensure that rulers would not turn into tyrants Drawing on a rich array of remarkable sources this engaging study explores how the fears and hopes of a ruler s subjects shaped both the idea and the practice of power It traces the inherent uncertainty of royal rule from the creation of kingship and the recurring crises of royal successions through the education of heirs and the intrigue of medieval elections to the splendour of a king s coronation and the pivotal early years of his reign Monks crusaders knights kings and those who wanted to be kings are among a rich cast of characters who sought to make sense of and benefit from an institution that was an object of both desire and fear

Matrons and Marginal Women in Medieval Society Robert Edwards, Vickie L. Ziegler, 1995 Exploration of differences between women good women who were absorbed into society and those whose social role condemned them to its fringes

Ramsey Anne Reiber DeWindt, Edwin Brezette DeWindt, 2006 The people of Ramsey included clerics knights and laborers and their activities overlapped to the point that the infamous tripartite division of medieval society into those who prayed fought and worked becomes meaningless The book also crosses chronological boundaries moving through decades of rebellion plague demographic turnover violence bloodshed and war and ending with religious upheaval that spelled the death of the 600 year old abbey and the intrusion of an ambitious new lay landlord with courtly connections BOOK JACKET

Medieval Market Morality James Davis, 2011-11-24 This important study examines the market trade of medieval England by providing a wide ranging critique of the moral and legal imperatives that underpinned retail trade James Davis shows how market goers were influenced not only by practical and economic considerations of price quality supply and demand but also by the moral and cultural environment within which such deals were conducted This book draws on a broad range of cross disciplinary evidence from the literary works of William Langland and the sermons of medieval preachers to state civic and guild laws Davis scrutinises everyday market behaviour through case studies of small and large towns using the evidence of manor and borough courts From these varied sources Davis teases out the complex relationship between morality law and practice and demonstrates that even the influence of contemporary Christian ideology was not necessarily incompatible with efficient and profitable everyday commerce

Peasant and Community in Medieval England, 1200-1500 P. Schofield, 2002-12-17 In recent years work on the medieval English peasant has tended to stress the degree of interaction between the village and the world beyond its bounds This book not only provides an overview of this research but also develops this approach Phillipp R Schofield describes the traditional world of the peasant with attention given to such issues as relations between lord and tenant and the nature of the peasant family and places the peasantry of the late middle ages within the wider political legal ecclesiastical and commercial world of the medieval community

Women in the Medieval

Common Law c.1200-1500 Gwen Seabourne, 2021-04-05 This book examines the view of women held by medieval common lawyers and legislators and considers medieval women's treatment by and participation in the processes of the common law. Surveying a wide range of points of contact between women and the common law from their appearance or not in statutes through their participation or not as witnesses to their treatment as complainants or defendants it argues for closer consideration of women within the standard narratives of classical legal history and for re-examination of some previous conclusions on the relationship between women and the common law. It will appeal to scholars and students of medieval history as well as those interested in legal history, gender studies and the history of women.

Citadel of the Saxons Rory Naismith, 2018-11-29 With a past as deep and sinewy as the famous River Thames that twists like an eel around the jutting peninsula of Mudchute and the Isle of Dogs London is one of the world's greatest and most resilient cities. Born beside the sludge and the silt of the meandering waterway that has always been its lifeblood it has weathered invasion, flood, abandonment, fire and bombing. The modern story of London is well known. Much has been written about the later history of this megalopolis which like a seductive dark star has drawn incomers perpetually into its orbit. Yet as Rory Naismith reveals in his zesty evocation of the nascent medieval city much less has been said about how close it came to earlier obliteration. Following the collapse of Roman civilization in fifth century Britannia darkness fell over the former province. Villas crumbled to ruin, vital commodities became scarce, cities decayed and Londinium the capital was all but abandoned. Yet despite its demise as a living city memories of its greatness endured like the moss and bindweed which now ensnared its toppled columns and pilasters. By the 600s a new settlement, Lundenwic, was established on the banks of the River Thames by enterprising traders who braved the North Sea in their precarious small boats. The history of the city's phoenix-like resurrection as it was transformed from an empty shell into a court of kings and favoured setting for church councils from across the land is still virtually unknown. The author here vividly evokes the forgotten Lundenwic and the later fortress on the Thames, Lundenburgh, of desperate Anglo-Saxon defenders who retreated inside their Roman walls to stand fast against menacing Viking incursions. Recalling the lost cities which laid the foundations of today's great capital this book tells the stirring story of how dead Londinium was reborn against the odds as a bulwark against the Danes and a pivotal English citadel. It recounts how Anglo-Saxon London survived to become the most important town in England and a vital stronghold in later campaigns against the Normans in 1066. Revealing the remarkable extent to which London was at the centre of things from the very beginning this volume at last gives the vibrant early medieval city its due.

The Canons of the Third Lateran Council of 1179 Danica Summerlin, 2019-11-28 Investigates papal government in the later twelfth century focusing on the decrees issued at papal councils and their reception.

The Stationers' Company and the Printers of London, 1501-1557 Peter W. M. Blayney, 2013-11-21 This major revisionist reference work explains for the first time how the Stationers Company acquired both a charter and a nationwide monopoly of printing. In the most detailed and comprehensive

investigation of the London book trade in any period Peter Blayney systematically documents the story from 1501 when printing first established permanent roots inside the City boundaries until the Stationers Company was incorporated by royal charter in 1557 Having exhaustively re examined original sources and scoured numerous archives unexplored by others in the field Blayney radically revises accepted beliefs about such matters as the scale of native production versus importation privileges and patents and the regulation of printing by the Church Crown and City His persistent focus on individuals most notably the families rivals and successors of Richard Pynson John Rastell and Robert Redman keeps this study firmly grounded in the vivid lives and careers of early Tudor Londoners *Thirteenth Century England VI* Michael Prestwich, R. H. Britnell, Robin Frame, 1997 An indispensable series for anyone who wishes to keep abreast of recent work in the field

WELSH HISTORY REVIEW **The Church in the Medieval Town** T.R. Slater, Gervase Rosser, 2016-12-05 This volume of essays explores the interaction of Church and town in the medieval period in England Two major themes structure the book In the first part the authors explore the social and economic dimensions of the interaction in the second part the emphasis moves to the spaces and built forms of towns and their church buildings The primary emphasis of the essays is upon the urban activities of the medieval Church as a set of institutions parish diocese monastery cathedral In these various institutional roles the Church did much to shape both the origin and the development of the medieval town In exploring themes of topography marketing and law the authors show that the relationship of Church and town could be both mutually beneficial and a source of conflict *Medieval British Towns* Heather Swanson, 1999-06-30 *Medieval British Towns* sets out to explain the reasons for the explosion of town foundation throughout the British Isles from the twelfth century onwards and charts the subsequent development of towns through to the early sixteenth century The raison d'etre of towns throughout the British Isles was as market places and centres of trade in an increasingly commercialised society The comparative approach adopted here illuminates the diverging experiences of towns in the four different countries of the British Isles but sets them within the overall context of a shared value system where social cohesion was provided by the church It offers a guide to students and general readers first venturing into the study of medieval urban history and provides comparative material for more experienced students of both history and the related disciplines of archaeology and historical geography

Popular Protest in Late Medieval English Towns Samuel Kline Cohn, Douglas Aiton, 2013 Draws new attention to popular protest in medieval English towns away from the more frequently studied theme of rural revolt *Churchmen and Urban Government in Late Medieval Italy, c.1200-c.1450* Frances Andrews, Agata Pincelli, 2013-11-28 Major new study of secular religious boundaries and the role of the clergy in the administration of Italy's late medieval city states *St Stephen's College, Westminster* Elizabeth Biggs, 2020 First full length account of St Stephen's Chapel bringing out its full importance and influence throughout the Middle Ages **After the Black Death** Mark Bailey, 2021 The Black Death was the worst pandemic in recorded history This book presents a major reevaluation of its immediate impact and longer term consequences

in England **Chaucer and the City** Ardis Butterfield, 2006 Presenting essays exploring Chaucer's identity as a London poet and the urban context for his writings this volume addresses the centrality of the city in Chaucer's work and the importance of Chaucer to a literature and a language of the city **Public Piers Plowman** C. David Benson, 2010-11-01 Public Piers Plowman is divided into two parts The first is an extended essay on what Benson calls the Langland myth He traces the evolution of Piers scholarship and demonstrates the limitations of treating Piers as a direct expression of the poet's experience and intellectual views In the second part Benson offers an alternative history for the poem Benson approaches it from a broader public context using representative examples from vernacular writing parish art and civic practices He argues that Piers reached a wide contemporary audience because far from being an account only of the author's own life and opinions it was securely rooted in the common culture of its time and place Jacket The Art of Solidarity in the Middle Ages Gervase Rosser, 2015 Explores the motives and experiences of the medieval men and women who joined together in guilds family like societies that affected most aspects of their members' lives A Companion to Britain in the Later Middle Ages S. H. Rigby, 2008-04-15 This authoritative survey of Britain in the later Middle Ages comprises 28 chapters written by leading figures in the field Covers social economic political religious and cultural history in England Ireland Scotland and Wales Provides a guide to the historical debates over the later Middle Ages Addresses questions at the leading edge of historical scholarship Each chapter includes suggestions for further reading
