Men And Power:

Masculinity and Power Arthur Brittan, 1991-01-08 Political domestic and economic life is dominated by networks of powerful men In *Masculinity and Power* Arthur Brittan analyses this state of affairs He looks at the way in which biologists psychologists and social scientists have attempted to explain masculinity and patriarchy in terms of simplistic models of human nature and social relationships

Men and Power Joseph A. Kuypers, 1999 If there is any one concept that stirs the passions and actions of men as a gender power is the most likely candidate Seldom is powerlessness a preferred or admired quality in a man Yet power can be both a beacon to direct action and maintain order and a plague if frustratingly unattainable or glamorized and abused In the field of men's studies where men and women examine how gender organizes action and thought the role of power may never be settled How are men raised to relate to power and what are the consequences Is power assumed by virtue of genetics and biology is it culturally conferred or is it merely an illusion Does the belief that men are powerful serve a political agenda Do males experience power differently when viewed psychologically as opposed to power in a social setting By keeping control of power have men failed at the leadership demanded of those who possess power What is healthy power for men How do women interpret power How does the male perception of power lead to violent tendencies in some men These questions and many more are examined in *Men and Power* by leading experts in the field of gender identity The purpose of this inquiry is to move beyond the glib resignation that power corrupts to more precisely identify what men can do to transform their quest for power into a healthy benefit to the individual to relationships and to society Compelling topics such as sexuality intimacy equity male identity pornography and many others are explored in detail Contributors are Blye Frank Walter Isaac Michael Kaufman Christopher Kendall Michael S Kimmel John Stoltenberg Laurence Thomas Clark Wolf and Bert Young

The Power of a Man Rick Johnson, 2009 Rick Johnson equips men to be the powerful and influential men God created them to be as husbands fathers and world changers

The Myth of Male Power Warren Farrell, 1993 Doing for men what *The Feminine Mystique* did for women this book from the author of *The Liberated Man* and *Why Men Are the Way They Are* articulates what millions of men feel but have been unable to express marking the beginning of the end in the war between the sexes

Of Men and Monsters Richard Tithecott, 1997-11-01 *Of Men and Monsters* examines the serial killer as an American cultural icon one that both attracts and repels Richard Tithecott suggests that the stories we tell and the images we conjure of serial killers real and fictional reveal as much about mainstream culture and its values desires and anxieties as they do about the killers themselves

Architects of fate, or, Steps to success and power Orison Swett Marden, 1896

Older Men's Lives Edward H. Thompson, Edward H. Thompson (Jr.), 1994-06-07 In this multidisciplinary portrait of men and their concerns in later life the contributors use both a life course and gendered perspective to point out that the image and self image of men are continually reconstructed throughout the life cycle Issues examined include the position of older men in society and the changes wrought in their status and roles over

time men's relationships to spouse children grandchildren and friends and policy implications

Destined for Equality Robert Max Jackson, 1998-10 Men and women remain unequal in the United States but in this provocative book Robert Max Jackson demonstrates that gender inequality is irrevocably crumbling *Destined for Equality* the first integrated analysis of gender inequality's modern decline tells the story of that progressive movement toward equality over the past two centuries in America showing that women's status has risen consistently and continuously Jackson asserts that women's rising status has been due largely to the emergence of modern political and economic organizations which have transformed institutional priorities concerning gender Although individual politicians and businessmen generally believed women should remain in their traditional roles Jackson shows that it was simply not in the interests of modern enterprise and government to foster inequality The search for profits votes organizational rationality and stability all favored a gender neutral approach that improved women's status The inherent gender impartiality of organizational interests won out over the prejudiced preferences of the men who ran them As economic power migrated into large scale organizations inherently indifferent to gender distinctions the patriarchal model lost its social and cultural sway and women's continual efforts to rise in the world became steadily more successful Total gender equality will eventually prevail the only questions remaining are what it will look like and how and when it will arrive

Manning the Law Ngaire Naffine, 2025-09-18 This is a study of elite English men of English law and the methods they used to retain and justify their power and privilege through controlling the story of the legal person It looks at how these men of legal authority thought of themselves and their institution how they studied and explained law and how they put themselves in the middle of it as the standard human in need of legal regulation and protection and in charge of that regulation and protection and assigned to women an inferior legal role and being The main strategy used to do all this was manipulation of the concept of the legal person From the 1860s to the 1920s the courts declared that women were not persons who could exercise public power to vote to sit in Parliament to gain degrees to be lawyers Up to the end of the 20th century and into the 21st women's personhood remained precarious in the private sphere for rape was excused within a marriage and female reproduction remained under state control as it still does The book examines the active exclusion of women from the means of making legal meaning especially the ability to shape law's central concept and shows the epistemological effects of this sex differential of legal power which are still felt today Leading legal thinkers who helped to masculinise the concept of the person to the detriment of women are still revered Law's continuing male orientation is neither seen nor acknowledged and the legal person is treated falsely as if he had always been and remains anyone
