New Letters:

New Letters of David Hume David Hume, 2011-07-07 This volume first published in 1954 is one of three presenting the correspondence of David Hume. It collects letters from 1737 to 1776 which do not appear in J. Y. T. Greig's two volumes of 1932 and offers a rich picture of the man and his age. The correspondents include such famous thinkers as Adam Smith, James Boswell and Benjamin Franklin. *New Letters to the Tatler and Spectator* Richmond P. Bond, 2014-06-23 Ninety-six letters to the Tatler and the Spectator representing what is probably the largest extant body of unpublished material relating directly to the two journals appeared for the first time in print in this book. The original letters were not published in the Tatler or the Spectator but they were preserved by the editors and eventually found their way into the Marlborough and the Tickell collections. They have been prepared for publication and edited with notes and an introduction by an authority in the field of early periodicals. The letters will be of especial interest to students of early eighteenth-century England for few literary forms more clearly reflect the times in which they are written than the letter, particularly the letter to the editor. A wide range of writers is represented: the inarticulate and the witty, the serving maid and the gentleman. Subject matter is equally diverse, including such topics as women's petticoats, free thinking, the state lottery, the nuisance of a smoking wife, cock throwing and Platonic love. Why the letters were not published in the Tatler or the Spectator is a matter for conjecture. Some of them were apparently used by Addison or Steele as topics for essays. Occasionally a letter was received or rewritten by the editors and printed in an altered form. Whatever the reason for their survival, these letters will be of value to students of language and literary journalism, social conditions and popular philosophy. *New Letters of Thomas Carlyle* Thomas Carlyle, 1904 House Documents United States House of Representatives, 1865 **Catalogue, 1850-56** Mercantile Library of Philadelphia, 1850 **I. S. Chand's ISC Mathematics For Class-XI** O.P. Malhotra, S.K. Gupta & Anubhuti Gangal, I. S. Chand's ISC Mathematics For Class XI **Littell's Living Age**, 1848 **Science on Stage** Kirsten Shepherd-Barr, 2018-06-05 Science on Stage is the first full-length study of the phenomenon of science plays: theatrical events that weave scientific content into the plot lines of the drama. The book investigates the tradition of science on the stage from the Renaissance to the present, focusing in particular on the current wave of science playwriting. Drawing on extensive interviews with playwrights and directors, Kirsten Shepherd-Barr discusses such works as Michael Frayn's *Copenhagen* and Tom Stoppard's *Arcadia*. She asks questions such as: What accounts for the surge of interest in putting science on the stage? What areas of science seem most popular with playwrights and why? How has the tradition evolved throughout the centuries? What currents are defining it now? And what are some of the debates and controversies surrounding the use of science on stage? Organized by scientific themes, the book examines selected contemporary plays that represent a merging of theatrical form and scientific content: plays in which the science is literally enacted through the structure and performance of the play. Beginning with a discussion of Christopher Marlowe's *Doctor Faustus*, the book traces the history of how scientific ideas

quantum mechanics and fractals for example are dealt with in theatrical presentations It discusses the relationship of science to society the role of science in our lives the complicated ethical considerations of science and the accuracy of the portrayal of science in the dramatic context The final chapter looks at some of the most recent and exciting developments in science playwriting that are taking the genre in innovative directions and challenging the audience s expectations of a science play The book includes a comprehensive annotated list of four centuries of science plays which will be useful for teachers students and general readers alike
