New Harmony As Seen By Participants And Travelers:

Heaven On Earth Joshua Muravchik, 2003-11-25 Socialism was man's most ambitious attempt to supplant religion with a doctrine claiming to ground itself in science. Indeed, no religion ever spread so far so fast. Yet while socialism had established itself as a fact of life by the beginning of the 20th century, it did not create societies of abundance or give birth to the New Man. Each failure inspired new searches for the path to the promised land: revolution, communes, social democracy, Communism, Fascism, Third World socialism. None worked, and some exacted staggering human tolls. Then, after two hundred years of wishful thinking and fitful governance, socialism suddenly imploded in a fin de siècle drama of falling walls and collapsing regimes. In *Heaven on Earth*, Joshua Muravchik traces this fiery trajectory through sketches of the thinkers and leaders who developed the theory, led it to power, and presided over its collapse. We see such dreamers and doers as the French revolutionary Gracchus Babeuf, whose Conspiracy of Equals were the first to try to outlaw private property; Robert Owen, who hoped to plant a model socialist utopia in the United States; Friedrich Engels, who created the cult of Karl Marx and scientific socialism; Benito Mussolini, self-proclaimed socialist heretic and inventor of Fascism; Clement Attlee, who rejected the fanatics and set out to build socialism democratically in Britain; Julius Nyerere, who merged social democracy and communism in the hope of making Tanzania a model for the developing world; and Mikhail Gorbachev, Deng Xiaoping, and Tony Blair, who became socialism's inadvertent undertakers. Muravchik's accomplishment in *Heaven on Earth* is to tell a story filled with character and event while, at the same time, giving us an epic chronicle of a movement that tried to turn the world upside down and for a time succeeded. [Dating Buildings and Landscapes with Tree-Ring Analysis](#) Darrin L.

Rubino, Christopher Baas, 2019-05-13 This book presents guidance, theory, methodologies, and case studies for analyzing tree rings to accurately date and interpret historic buildings and landscapes. Written by two long-time practitioners in the field of dendrochronology, the research is grounded in the fieldwork data of approximately 200 structures and landscapes. By scientifically analyzing the tree rings of historic timbers, preservationists can obtain valuable information about construction dates, interpret the evolution of landscapes and buildings over time, identify species and provenance, and gain insight into the species matrix of local forests. Authors Darrin L. Rubino and Christopher Baas demonstrate through full-color illustrated case studies and methodologies how this information can be used to interpret the history of buildings and landscapes and assist preservation decision making. Over 1,000 samples obtained from more than 40 buildings, including high-style houses, vernacular log houses, and timber frame barns, are reported. This book will be particularly relevant for students, instructors, and professional readers interested in historic preservation, cultural landscapes, museum studies, archaeology, and dendrochronology globally. **Term Paper Resource Guide to Nineteenth-Century U.S. History** Kathleen W.

Craver, 2008-06-30 Major help for those inevitable American History term paper projects has arrived to enrich and stimulate students in challenging and enjoyable ways. Students from high school age to undergraduate will be able to get a jumpstart
