Back cover **Dissenting Bodies** Martha L. Finch, 2009-11-19 For the Puritan separatists of seventeenth century New England godliness as manifested by the body was the sign of election and the body with its material demands and metaphorical significance became the axis upon which all colonial activity and religious meaning turned Drawing on literature documents and critical studies of embodiment as practiced in the New England colonies Martha L Finch launches a fascinating investigation into the scientific theological and cultural conceptions of corporeality at a pivotal moment in Anglo Protestant history Not only were settlers forced to interact bodily with native populations and other new world communities they also fought starvation and illness were whipped branded hanged and murdered sang prayed and preached engaged in sexual relations and were baptized according to their faith All these activities shaped the colonists understanding of their existence and the godly principles of their young society Finch focuses specifically on Plymouth Colony and those who endeavored to make visible what they believed to be God's divine will Quakers Indians and others challenged these beliefs and the constant struggle to survive build cohesive communities and regulate behavior forced further adjustments Merging theological medical and other positions on corporeality with testimonies on colonial life Finch brilliantly complicates our encounter with early Puritan New England

Photo-era ,1919 Reading Texts, Reading Lives Daniel Morris, Helen Maxson, 2012-06-14 Our culture attempts to separate competing ideological factions by denying relationships between multiple perspectives and influences outside of one's own narrow interpretive community The distinguished essayists in this volume find Daniel R Schwarz's pluralistic self-questioning approach to what he calls reading texts and reading lives quite relevant to the current historical moment and political situation A legendary scholar of modernist literature Schwarz's critical principles are a healthy corrective to cultural hubris The essayists treat works ranging from fictions by Joyce Conrad Morrison and Woolf to the poetry of Yeats to Holocaust literature to the environmental writings of Wendell Berry to the photographs of Lee Friedlander The authors focus on different works but they follow Schwarz in stressing formal elements most often associated with traditional realism while keeping an eye on historical and author-centered approaches The essayists also follow Schwarz in their emphasis on narrative cohesion and in how they look for signs of agency among characters who possess the will to alter their fate even in a seemingly random universe such as the one depicted by Conrad Readers with eyes to ethics and aesthetics they follow Schwarz in encouraging a values-centered approach that leaves room for the reader to address the ways in which reading a text correlates to the reader's ability to find meaning and value in experience outside the text Like Schwarz the essays look for intentionality of authorial meaning rather than something called an author function as well as for the relationship between lived experience and the imagined world of the literary work rather than the endless semiotic play of an ultimately indecipherable text
