Economic Globalisation as Religious War Michael McKinley, 2007-06-28 Using a critical theory approach to analyze the globalization of the world economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war

circles      **Reading the Enemy's Mind** Paul H. Smith, 2005-12-27 An up close and personal look behind the scenes of the government's psychic spy program as only an insider can. A must read. Harold E. Puthoff PhD founder and former director of the CIA initiated Remote Viewing Program. From behind the cloak of US military secrecy comes the story of Star Gate the project that for nearly a quarter of a century trained soldiers and civilian spies in extra sensory perception ESP. Their objective To search out the secrets of America's cold war enemies using a skill called remote viewing. Paul H. Smith a US Army Major was one of these viewers. With the Star Gate secrets declassified and the program mothballed by the Central Intelligence Agency the story can now be told of the ordinary soldiers drafted onto the battlefield of human consciousness. Using hundreds of interviews with the key players in the Star Gate program and gathering thousands of pages of documents Smith reveals many secrets about how remote viewing works and how it was used against enemy targets. Among these stories are the search for hostages in Lebanon spying on Soviet directed energy weapons investigating the bombing of Pan Am Flight 103 over Lockerbie Scotland tracking foreign testing of weapons of mass destruction combating narco trafficking off America's coasts aiding in the Iranian hostage situation finding KGB moles in the CIA pursuing Middle East terrorists and more. This is a story for the believer and the skeptic a rare look at the innards of a top secret program and an eye opening treatise on the power of the human mind to transcend the limitations of space and time      **Catalog of Copyright Entries.**

Ordinary Ecstasy John Rowan, 2015-12-22 Humanistic Psychology ranges far and wide into education management gender issues and many other fields. Ordinary Ecstasy first published in 1976 is widely regarded as one of the most important books on the subject. Although this new edition still contains much of the original material it has been completely rethought in the light of postmodern ideas with more emphasis on the paradoxes within humanistic psychology and takes into account changes in many different areas with a greatly extended bibliography. Ordinary Ecstasy is written not only for students and professionals involved in humanistic psychology anyone who works with people in any way will find it valuable and interesting      **Dictionary of Politics** Walter John Raymond, 1992      *The Analysis of Psychological Theory* Henderikus J.

Stam, Timothy B. Rogers, Kenneth J. Gergen, 1987      **Models of Man** J.J. Dagenais, 2012-12-06 This essay is first a theoretical and historical study of some classical scientific ways of studying human being in the world. The more readily accessible and more commonly discussed models of being human were chosen for review here but structuralism is included because I believe it will have the same impact in America as it has had in France and I hope that American readers might be forewarned about what may be ideologically at stake before the technical and fruitful aspects of the movement become an academic fad in the United States. The subjects included are mainline experimental psychology from Wundt to Skinner with its relatively shortlived functionalist and Watsonian behaviorist formulations holistic psychology from Brentano through Stumpf Husserl and Goldstein to Maslow Rogers and contemporary third force psychology and the psychoanalytic model for

which the only paradigm is Freud himself Preeminence is given to psychological paradigms since their subject matter lies closest to the classical philosophical tradition from which philosophical anthropology emerged This book is in the final analysis a prolegomenon to an articulated philosophical anthropology Sociological models are also considered the classical tradition from Comte to the present and Marxist anthropology from the manuscripts of 1844 to the present The structuralist model from Durkheim to Chomsky is also considered since it cuts across and gives new dimensions to all the foregoing models The essay is second a phenomenological critique of these historical theoretical considerations
