Management for Events Lynn Van der Wagen, 2009-02-04. Human Resource Management for Events is the first text to cover management of human resources in the event environment. Linking theory, research, and application, it covers the differing and various types of event in which human resource management is key, such as Business Events, a vast sector including events people who manage conferences, exhibitions, incentive trips, and individual business travel; Sporting Events, this sector includes sporting events ranging from the Olympic Games, Rugby World Cup, Soccer World Cup, Tour de France, Grand Prix to many smaller local sporting events; Arts and Entertainment, the logistics, risk, and financial issues facing entertainment events are leading to the development of more sophisticated operational skills for this sector; Music festivals are increasingly popular; Public Events, civic ceremonies, parades, celebrations, festivals, and protests all fall within the scope of public events. Planning, approval, and risk management are increasingly on the agenda for all levels of government. The particular challenges provided by such events are varied. The size of the workforce explodes at the time of the event to include the event management team, many paid staff, hundreds of volunteers, and multiple contractors such as food vendors and cleaning teams. Everyone working on the site comes into the scope of the event workforce. Little time is available for training, and motivation plays a key role in retention and customer service. Decision making occurs on the run, and the event is over before anyone can think about performance appraisal. The environment is further characterised by a fast pace, high stress levels, and many workers are fatigued by the bump in period before the event audience pours through the gates to add yet another level of pressure. These features of the human resources environment are quite different to those of the traditional workforce. Human Resource Management for Events is vital reading for both students and practitioners involved in this crucially important aspect of event management. *Innovating for Sustainability* Luca Berchicci, 2008-09-03. One of

the challenges met by green entrepreneurs and product developers who have tried to develop more sustainable products is that efforts to have better products in environmental terms do not always translate into effective business cases The purpose of this book is a better understanding of the implications of environmental issues in new product development Through an empirical study in the human powered vehicle sector Luca Berchicci examines how and to what extent the environmental ambition of product developers and managers influences the way new products and services are developed The understanding of this phenomenon is particularly important since managers are encouraged and or motivated to undertake environmental new product development projects From the descriptions and analyses of the two cases study Luca Berchicci suggests that a high level of environmental ambition increases the complexity of the product innovation process Moreover a high level of environmental ambition may hamper a product innovation process because it may lead the developers away from the market that their product is to serve Accordingly this book attempts to explain and predict how environmental ambition influences new product development processes This claim provides a theoretical contribution to existing research in both product innovation and green product innovation Moreover this book provides an original and deep insight on the diverse facets of greening

Managing Sustainable Development Programmes Gran Brulin, Lennart Svensson, 2016-05-13

Project work driven by competent project leaders drives positive outcomes Unfortunately these optimistic initial results are often short sighted with few evaluations of their long term impact The research contained in Managing Sustainable Development Programmes reveals an extraordinary level of failure in the durability of large change programmes and projects in both the private and public sectors In this book the authors question whether sustainable development be achieved within the framework of large publicly financed programmes This strong critique of traditional programme implementation overturns much of our current thinking about project delivery and governance The authors focus instead on sustainable change and development They show how active ownership and collaboration between different actors and the dynamics of developmental learning can be used to create programmes and projects that contribute to innovation employment and growth in a way that favours companies employees customers and society in a broader sense The message at its heart is don't blame the project leader but rather look for dynamic possession of projects joint knowledge management and sharing with external stakeholders that will secure long term effects

Global Talent Management Akram Al Ariss, 2014-04-28

This book bridges the research and practice of global talent management It opens important theoretical and practical avenues to understand the concept internationally while focusing on developing and emerging countries Chapters derive from various geographic regions and embrace cross national comparative and interdisciplinary perspectives An open and inclusive approach is used in assessing the challenges of global talent management strategies to overcome these challenges and in charting opportunities for future talent management These three dimensions are crucial to academic researchers and business practitioners for envisioning a positive future role of talent management in businesses and societies
