Radicalisation Of Science:

The Radicalisation of Science Hilary Rose, Steven Peter Russell Rose, 1976 **The Radicalisation of Science** Hilary and Steven Rose, 1976 **Love, Power, and Knowledge** Hilary Rose, 1994 Rose's passionately engaged book develops new terms for thinking about science and feminism. She locates the feminist criticism of science as integral to both the feminist movement and the radical science movement. She attends to the political economy of the production of knowledge and to what does and does not count as knowledge. How women and minorities are affected by these processes is also explored. Because biology is destiny is both an old and oppressive claim made by science, she examines at length the latest and massively resourced claimant, the Human Genome program, the so-called Holy Grail of the new industrialized genetics. Rose's commitment to feminist resistance against the science and technology of oppression leads her to explore feminist science fiction as an ally of feminist science critics with its imaginative capacity to explore different futures with different sciences and technologies.

Science Studies during the Cold War and Beyond Elena Aronova, Simone Turchetti, 2016-09-24 This book examines the ways in which studies of science intertwined with Cold War politics in both familiar and less familiar battlefields of the Cold War. Taken together, the essays highlight two primary roles for science studies as a new field of expertise institutionalized during the Cold War in different political regimes. Firstly, science studies played a political role in cultural Cold War in sustaining as well as destabilizing political ideologies in different political and national contexts. Secondly, it was an instrument of science policies in the early Cold War; the studies of science were promoted as the underpinning for the national policies framed with regard to both global geopolitics and local national priorities. As this book demonstrates, however, the wider we cast our net extending our histories beyond the more researched developments in the Anglophone West, the more complex and ambivalent both the science studies and the Cold War become outside these more familiar spaces. The national stories collected in this book may appear incommensurable with what we know as science studies today, but these stories present a vantage point from which to pluralize some of the visions that were constitutive to the construction of Cold War as a juxtaposition of the liberal democracies in the West and the communist East.

Radicalisation James R. Lewis, Akil N. Awan, 2024-01-01 Radicalization has become an important part of the twenty-first century security and political landscape. It is a seemingly ubiquitous term employed by academics, policymakers, civil society actors, practitioners, and media alike in ever-expanding ways describing everything from changing domestic social movements to the growth of international terrorism. This volume provides a comprehensive treatment of radicalization, the processes during which individuals or groups adopt increasingly extreme political, social, or religious beliefs, positions, or aspirations, particularly in cases associated with the use of violence. Adopting a multifaceted and comparative approach, the contributors interrogate this phenomenon from wide-ranging social, ideological, religious, and historical angles. The first part of the book explores how academia has engaged with the concept of radicalization, including the ontological and epistemological

concerns of Critical Terrorism Studies theoretical models for understanding radicalization and approaches to radicalization through the various lenses of identity gender youth and media The second part explores manifestations of radicalization through a range of diverse case studies including the Falun Gong movement Aum Shinrikyo Far Right trans nationalism white nationalist lone wolves and the Great Replacement thesis ISIS and Western jihadists deradicalization programs hero myths the Extreme Right in Eastern Europe and the dark side of globalization **Science in Society** Matthew

Originally published in 1986 This work remains of compelling interest to those concerned with the natural sciences and their social problems It puts forward original and unorthodox ideas about the philosophy of and sociology of science starting from the conviction that modern societies face deep problems arising from unresolved dilemmas about the meaning content and technical applications of the theories of nature they employ The book draws on insights developed within a variety of traditions to explore these problems especially the work of Edmund Husserl and modern critical theory Radicalisation Gilbert McLaughlin, 2023-12-13 Radicalisation is a conceptual investigation within Western liberal democratic societies that follows an analytical framework linking expertise theory to discourse analysis of publications from the academic governmental and non governmental spheres as well as a dozen interviews with experts in the field The reader will come to understand the socio political configurations that led to the emergence of radicalisation as an object of study The book also identifies the historical tensions regarding models definitions and operationalisation of the concept of radicalisation in social sciences research Finally a new model explaining how the term radicalisation became the central conceptual framework of a

new field of expertise will be proposed The book is situated within the fields of security studies crime prevention and sociology of expertise The book is innovative in its distinct focus on the term radicalisation and the expertise thereof With its diachronic and synthetical approach the book also serves as an entry point for all researchers and practitioners seeking an introduction to the subject of radicalisation and violent extremism The book addresses the debates among academics public experts and policymakers into the origin dissemination and maintenance of the field of expertise Thus the aim is not so much to uncover the true meaning of the term as to understand how it has been socially constructed this book will be of great interest to students and scholars of criminology security studies and sociology **The Return of Nature** John Bellamy

Genes, Cells, and Brains Hilary Rose,Steven Rose,2014-04-08 Our fates lie in our genes and not in the stars said James Watson co discoverer of the structure of DNA But Watson could not have predicted the scale of the industry now dedicated to this new frontier Since the launch of the multibillion dollar Human Genome Project the biosciences have promised miraculous cures and radical new ways of understanding who we are But where is the new world we were promised Now updated with a new afterword *Genes Cells and Brains* asks why the promised cornucopia of health benefits has failed to emerge and reveals the questionable enterprise that has grown out of bioethics The authors feminist sociologist Hilary Rose and neuroscientist Steven Rose examine the establishment of biobanks the rivalries between public and private gene sequencers and the rise of stem cell research The human body is becoming a commodity and the unfulfilled promises of the science behind this revolution suggest profound failings in genomics itself *Exploring Expertise* James Fleck,Wendy

Faulkner, Robin Williams, 2016-07-27 The growing social and economic significance of expertise is reflected in popular suggestions that we are moving into a post industrial knowledge society The subject of expertise is becoming recognised in a range of scholarly disciplines ranging from science and technology psychology computing and artificial intelligence through to management and organisational behaviour Exploring Expertise brings together some of these diverse understandings of the character and implications of expertise and demonstrates through a set of empirical case studies how expertise means different things to different groups how it is constructed differently in different settings and the consequences of this process for relations between members of the knowledge society and those on the outside The book includes case study material ranging from a hospital ward to a factory to a nuclear weapons facility *Unravelling Radicalisation* Gilbert McLaughlin, Antoinette Raffaella Huber, 2025-08-11 The term radicalisation is being used by politicians activist groups the media governmental organisations and many other groups although it lacks conceptual clarity and insufficient consideration is given to its historical context This edited book offers a reflective overview of the state of the research by addressing questions such as what is radicalisation and does the concept help us to understand political violence differently across the social sciences From a global selection of scholars it explores the definition and the utilisation of the concept of radicalisation pathway modelling and the impact of gender religion and ideologies on radicalisation It combines theoretical and historical analysis providing a good introduction for any scholar and student starting in that field **Preventing and Countering Violent Extremism and Radicalisation** Teresa C. Silva, Marzena Kordaczuk-Was, 2024-11-29 EPUB and EPDF available open access under CC BY NC ND licence How can we use evidence to improve deradicalisation and violence prevention outcomes Based on work developed during the implementation of the cross European INDEED project this is an essential reference book for practitioners researchers and policy makers It sets out the three pillars of best evidence based practice scientific evidence professional judgement and consideration of clients preferences values and beliefs Demonstrating both successful and unsuccessful approaches with case studies from the field the book offers practical strategies for prevention teams designing and evaluating their programmes *Islamist Radicalisation in Europe* Daniela Pisoiu, 2012-01-25 This book examines the Islamist radicalisation process in Europe developing a new theoretical model based on an empirical study of the evolution of Islamist radicals in their social environment The approach of this book is to examine how and under what conditions people choose to radicalise It focuses on the experience of radicalisation from the perspective of those who have undergone it The study is based on trial and court material along with an extensive number of interviews collected from many different European countries and this biographical approach is used to address individuals and the details of their social environment Overall the explanatory framework departs from the existing deterministic paradigm with grievances as causes also present in some psychological models and argues that radicalisation is a process much like occupational choice a rational choice made with social and ideational significance It addresses critically the assumption that because the result of

the radicalisation process could be seen as abnormal the cause of it might be of a similar nature Parallels are drawn with other forms of extremism and European counter radicalisation policies are considered critically This book will be of great interest to students of terrorism studies and political violence political Islam social movements European politics and IR security studies in general **The Routledge Handbook on Radicalisation and Countering Radicalisation** Joel Busher, Leena Malkki, Sarah Marsden, 2023-11-28 This handbook provides a theoretical and methodological exploration of the research on radicalisation and counter radicalisation one of the most influential concepts in Security Studies International Relations and Peace and Conflict Studies Sitting at the heart of high profile research and policy agendas on preventing and countering violent extremism CVE radicalisation as a concept has transformed the way researchers policymakers and societies think about how to counter terrorism and political violence Deliberations about radicalisation and countering radicalisation have become further embedded as efforts to prevent and counter violent extremism have been mainstreamed into other areas of public policy and practice such as education gender relations health peacebuilding aid and development Theoretically and methodologically pluralistic this handbook addresses radicalisation and countering radicalisation as they relate to a wide range of groups and milieus articulating diverse ideological positions drawing together insight and experience from multiple geographic and institutional settings integrating global perspectives and including scholarship focused on a range of policy fields This book will be an essential reference point for anybody working on radicalisation countering radicalisation or terrorism and political violence more broadly The insight that it provides will be relevant for both academics and members of relevant policy and practitioner communities **The radicalisation of science** ,1975
