## **Radiological Accident At The Irradiation:**

**The Radiological Accident in San Salvador** International Atomic Energy Agency, 1990 On 5 February 1989 a radiological accident occurred at an industrial irradiation facility near San Salvador El Salvador Medical products are sterilized at the facility by irradiation by means of an intensely radioactive cobalt 60 source in a movable source rack This source rack became stuck in the irradiation position The operator bypassed the irradiator's degraded safety systems and entered the radiation room with two other workers to free the source rack manually The three men were exposed to high radiation doses and developed the acute radiation syndrome They received initial hospital treatment in San Salvador and subsequent more specialized treatment in Mexico City The legs and feet of two men were so seriously injured that amputation was required The worker who had been most exposed died six and a half months after the accident from lung damage due to irradiation complicated by injury sustained during treatment The report describes the accident and the response to it and presents lessons derived for operators and suppliers of irradiators national authorities medical staff and international organizations Detailed information on dosimetric and medical aspects of the accident is presented in appendices and annexes *The Radiological Accident at the Irradiation Facility in Nesvizh* International Atomic Energy Agency, 1996-01-01 Radiacionnaja avarija v San-Sal'vadore International Atomic Energy Agency, 1992 *The Radiological Accident in Soreq* International Atomic Energy Agency, 1993 On 21 June 1990 a fatal radiological accident occurred at an industrial irradiation facility at Soreq Israel An operator entered the irradiation room by circumventing safety systems and was acutely exposed with an estimated whole body dose of 10.20 Gy The accident like earlier accidents at similar irradiators was the consequence of the contravention of operating procedures An IAEA review team investigated the causes of the accident This report presents its findings and recommendations and describes the clinical management of the patient particularly of the haematological phase The medical treatment included the use of emerging therapies with haematopoietic growth factor drugs which may rescue the overexposed patient albeit in this case only temporarily The report is intended for regulatory authorities responsible for the regulation and inspection of irradiators operating organizations and physicians who may need to treat overexposed patients Lessons Learned from Accidents in Industrial Irradiation Facilities International Atomic Energy Agency, 1996 The purpose of this publication is to present the results of a review of accidents in industrial radiography which have either been reported to regulatory authorities or to professional associations or been published in scientific journals Use of ionizing radiation in medicine industry and research for technical development continues to increase throughout the world Although this industry has a good safety record there is a potential for accidents with serious consequences to human health because of the high dose rates produced by these sources Five fatal accidents occurred between 1975 and 1994 Such accidents have prompted the present review carried out by a team of manufacturers regulatory authorities and operating organizations Having closely looked at the circumstances of each accident the apparent

deficiencies in design safety and regulatory systems and personnel performance the team made a number of recommendations The findings of extensive research pertaining to the lessons that can be learned from irradiation accidents are presented

**The Medical Basis for Radiation-Accident Preparedness** Robert C. Ricks, Mary Ellen Berger, Frederick M. O'Hara, Jr., 2002-01-04 Major radiation accidents cause widespread and common psychosocial problems independent of cultural ethnic political and socioeconomic aspects of the location of the accident As a doctor nurse or emergency room staff you are the first line of defense when these accidents happen New developments over the past several years enable physicians to enhance survival and ease the discomfort of patients injured by radiation The Medical Basis for Radiation Accident Preparedness The Clinical Care of Victims presents the current state of the art in radiation medicine and focuses on the practical issues of importance to the clinicians and nurses who have responsibility for diagnosing treating and caring for the radiation accident patient Topics range from dose assessment to socioeconomic considerations with extensive analyses of treatment options for exposure to different parts of the body As a special feature the work supplies case histories of six recent significant radiological accidents and also includes bibliographic references and index You don't know when you may be involved in treating radiation accident patients In today's uncertain world it could happen at any time Drawing on the expertise of a wide variety of contributors both within and outside of the field of radiation management The Medical Basis for Radiation Accident Preparedness The Clinical Care of Victims provides further insight into the complex care and teamwork needed in the management of the acutely injured patient
