**Traumatic Disorders of the Ankle** W.C. Hamilton, 2012-12-06 The management of ankle injuries has long been a stumbling block for orthopaedists in training As a first year resident I was fortunate to encounter the series of articles by N Lauge Hansen and T Baek Kristensen that classified ankle injuries according to their mechanism I found this information quite helpful throughout my residency and early years of practice Several years ago an attempt was made to summarize this material for the benefit of the orthopaedic house staff of Thomas Jefferson University It quickly became obvious that such a manual would require a great deal of professional illustration and editorial assistance in order to be effective Almost simultaneously a fortuitous encounter with Ms Marie Low at that time Medical Editor of Springer Verlag New York Incorporated provided both the stimulus and the means to present this information in the manner and detail which it deserved Contributors were carefully selected for their knowledge and experience in particular areas and for their willingness to cooperate in providing a smooth flowing
