The Oxford Handbook of Evidence-based Crime and Justice Policy Brandon Welsh, Steven N. Zane, Daniel P. Mears, 2024 An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good However the term evidence based is characterized by a great deal of rhetoric Indeed there remains a marked disjuncture between calls for evidence based policy and an understanding of what it means for policy to be evidence based The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and guide evidence based policy in juvenile justice criminal justice and

alternatives to system responses and to identify strategies that can increase reliance on evidence based policy To meet these objectives each chapter is guided by several central questions What do we know about evidence based policy and practice in crime and justice How can we improve knowledge of evidence based policy and practice How can we promote more use of evidence based policy and practice Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions

Adjudicative tribunals in both criminal and non criminal cases rely on the concept of the burden of proof to resolve uncertainty about facts Perhaps surprisingly this concept remains clouded and deeply controversial Written by an internationally renowned scholar this book explores contemporary thinking on the evidential requirements that are critical for all practical decision making including adjudication Although the idea that evidence must favor one side over the other to a specified degree such as beyond reasonable doubt is familiar less well understood is an idea associated with the work of John Maynard Keynes namely that there are requirements on the total amount of evidence considered to decide the case The author expertly explores this distinct Keynesian concept and its implications Hypothetical examples and litigated cases are included to assist understanding of the ideas developed Implications include an expanded conception of the burden of producing evidence and how it should be administered **Using Social Science to Reduce Violent Offending** Joel Alan

Criminal Dilemmas Katri K. Sieberg, 2013-03-09

Crime is frightening It breeds emotional responses which can lead to counterproductive governmental policy To allow a rational analysis of these important concerns Criminal Dilemmas applies intuition from economics political science and game theory as a way to develop new perspectives about crime and its causes A basic assumption is that the criminal is a rational actor who makes decisions based on his or her personal expected gains and costs By using this assumption predictions about behavior as well as emotional concerns such as prostitution and gun control find a theoretical perspective By understanding the strategic variables which cause for example gangs and their warfare drug sales and the accompanying violence we have a better chance to design effective public policy

Institutional Violence Deane Curtin, Robert Litke, 2022-05-20

Violence can be

physical and psychological It can characterize personal actions forms of group activity and abiding social and political policy This book includes all of these aspects within its focus on institutional forms of violence Institution is also a broad category ranging from formal arrangements such as the military the criminal code the death penalty and prison system to more amorphous but systemic situations indicated by parenting poverty sexism work and racism Violence is as complex as the human beings who resort to it its institutional forms pervade our relational lives We are all participants in it as victims and perpetrators The chapters in this book were written in the hope that violence can be explicated even if not fully understood and that such clarification can help us in devising less violent forms of living even if it does not lead to its total abolition The studies bring new aspects of violence to light and offer a number of suggestions for its remedy **The Reporter's**

Kelly,Daniel P. Mears,2023-07-03 Written in an accessible style

this book provides a historically grounded critique of American policing and offers implementable solutions providing students a comprehensive understanding of modern policing Contemporary policing is in crisis a situation that has led to persistent calls to reform it Unfortunately many proposed solutions focus on piecemeal changes that ignore a fundamental problem policing relies on a largely reactive approach that does not in any systematic or comprehensive way focus on crime prevention Most of what the police do such as responding to 911 calls for service and employing directed patrols or hot spots policing fails to address the causes of crime Compounding this problem is the absence of any institution or agency charged with prioritizing the prevention of crime and for ensuring that police efforts support this goal A central distinguishing feature of this book is its comprehensive approach and the emphasis on policing as part of a much broader set of changes that must

occur both to improve policing and to improve public safety and justice This approach includes retaining what works eliminating what does not drawing on evidence based policy from around the world and creating systemic changes that institutionalize better policing accountability and evaluation processes for ensuring that the police are effective The Reinvention of Policing can be used in courses focused on policing policy and practice specifically when discussing the nature of policing how policing may reflect and contribute to inequality and injustice or how it might improve these social problems
