Rail Transport Research Needs Special Report 174:

The Transportation Research Board, 1920â€“2020 Sarah Jo Peterson, 2019-12-30 In 1920 state highway engineers federal officials and experts from academia were among a small group convened by the National Academy of Sciences to confront the problems of the highway The public was entrusting them with billions of dollars for good roads and World War I had proved the feasibility of moving freight long distances by truck But even new highways were crumbling They turned to research for solutions The founders of the Transportation Research Board TRB and the generations that followed took on problems such as safety social equity and environmental issues They embraced total transportation adapting their highway research model to urban transportation and then applying it to rail marine and aviation modes Today TRB convenes thousands of researchers practitioners and administrators every year to advise the government solve practical problems foster innovation and stimulate new research In The Transportation Research Board 1920 2020 Everyone Interested Is Invited Sarah Jo Peterson tells the story of how people and institutions created and have continued to shape TRB In a compelling narrative accompanied by more than 150 images exploring the history of transportation and research she argues that TRB can be best understood as an infrastructure one that people purposely designed and devotedly maintained Despite TRB s institutional complexity its unique mission the vast collection of acronyms in its orbit and the significant changes to the organization in its first 100 years Dr Peterson provides a view from 30 000 feet deftly describing the social political and economic context in which transportation and TRB functioned At the same time she attends to details of the key events individuals and human motivations that shaped TRB s evolution The author s skills as a historian her experience in the transportation field and her manifest ability to tell a good story have produced a book that transportation professionals of all stripes and for that matter anyone interested in the history of transportation in the United States should find both engaging and informative and an essential addition to their library
