## **Railway Dragon:**

*The Dragon's Gift* Deborah Brautigam, 2011-04-07 Is China a rogue donor as some media pundits suggest Or is China helping the developing world pave a pathway out of poverty as the Chinese claim In the last few years China's aid program has leapt out of the shadows Media reports about huge aid packages support for pariah regimes regiments of Chinese labor and the ruthless exploitation of workers and natural resources in some of the poorest countries in the world sparked fierce debates These debates however took place with very few hard facts China's tradition of secrecy about its aid fueled rumors and speculation making it difficult to gauge the risks and opportunities provided by China's growing embrace This well timed book by one of the world's leading experts provides the first comprehensive account of China's aid and economic cooperation overseas Deborah Brautigam tackles the myths and realities explaining what the Chinese are doing how they do it how much aid they give and how it all fits into their going global strategy Drawing on three decades of experience in China and Africa and hundreds of interviews in Africa China Europe and the US Brautigam shines new light on a topic of great interest China has ended poverty for hundreds of millions of its own citizens Will Chinese engagement benefit Africa Using hard data and a series of vivid stories ranging across agriculture industry natural resources and governance Brautigam's fascinating book provides an answer It is essential reading for anyone concerned with China's rise and what it might mean for the challenge of ending poverty in Africa

**The Official Railway Equipment Register**, 1911 **Railways and Culture in Britain** Ian Carter, 2001 The 19th century steam railway epitomized modernity's relentlessly onrushing advance Ian Carter delves into the cultural impact of the train Why for example did Britain possess no great railway novel He compares fiction and images by canonical British figures Turner Dickens Arnold Bennett with selected French and Russian competitors Tolstoy Zola Monet Manet He argues that while high cultural work on the British steam railway is thin British popular culture did not ignore it Detailed discussions of comic fiction crime fiction and cartoons reveal a popular fascination with railways tumbling from vast and hitherto unexplored stores of critically overlooked genres

**Railway** George Revill, 2013-06-01 In the nineteenth century railways were viewed as a symbol of progress and confidence in technological modernity In the twenty first century the frustrations of gridlocked traffic record high gas prices and the looming fears of climate change have transformed the railway system once again into a symbol of hope that provides the possibility of an environmentally sustainable future In *Railway* George Revill examines the technology and politics of railway history as well as related themes such as mobility identity design marketing and sustainability In both practical and symbolic senses the cultural meanings of railways continue to play a role in how people organize and respond to modern environments social problems and technologies Revill draws from art literature music and film to illustrate how the railway carries meaning for all of us creating connections and separations detachment and involvement from the routine commuter to the enthusiast As Revill shows railways inform our everyday language from fast track to side track to going off the rails and continue to fascinate us

today In this wide ranging and well illustrated look at railways across the globe Revill ultimately reveals how central they are to our understanding of modern everyday life *Railway Age* Cyril Andrews,2014-06-06 This Vintage Words of Wisdom title was first published in 1937 Ninety nine years earlier in 1838 the London and Birmingham Railway was opened the first intercity railway into London with its terminus at Euston and providing a direct connection to Coventry Birmingham and onwards to the North West This signalled an acceleration in the construction of railways and a period of railway mania that swept the country As Cyril Andrews explains in *The Railway Age* the age of steam trains brought about fundamental transformations to the nation It changed the landscape demanded new engineering and technological advances opened up new opportunities for commerce and perhaps most importantly ushered in changes to society as people now had the means to travel further faster and easier than ever before The social impact of the railways is well covered The author considers the effect upon the various strata of society and how railways improved the working lives of those like the commercial traveller introduced the concept of the commuter and enabled those in want of entertainment Apparently 15 000 people in 1848 travelled by train to Coventry to see a revival of Lady Godiva s ride through the streets Profusely illustrated with over 80 plates and photographs and accompanied by 50 line drawings and cartoons *The Railway Age* takes a broad approach to railway history that considers more the impact and effect that railways had than just the technology of steam engines So we read about the influence of Brunel railway station architecture railway hotels speculators and the beginnings of the London underground with the text interspersed with contemporary accounts poetry and popular songs of the period There are several lithographic plates by the famous early railway artist J C Bourne as well as Punch cartoons entries from *The Comic Bradshaw* and many other rare and fascinating images Often amusing and surprising *The Railway Age* is a welcome addition to the Vintage Words of Wisdom series and will appeal both to the railway enthusiast and to anyone with an interest in social history and in particular the effects of the industrialisation of Britain *Dragons Angels Children 1-3* Ikechukwu Joseph,

Riding the Dragon's Spine: David Bristow,Steve Thomas,2013-02-07 When windmill dodgers David Bristow and Steve Thomas followed their dream to blaze and map a mountain bike trail across South Africa they hoped to be spared howling headwinds freezing rain and slushy terrain They weren t yet were not deterred from having a mud splattering good time The result the Spine of the Dragon trail is the country s ultimate mountain bike tour covering a distance of 4000km from Beit Bridge to Cape Town Aimed at the average off road rider the 58 day trail through South Africa and Lesotho is broken into nine sections each with several stages The entire course can be done in one go or as a series of shorter rides ideal for those with boundless enthusiasm but limited time The authors offer valuable advice on preparing for the trail that includes suggested clothing gear bike maintenance food and safety Each day s route is described in detail and includes Customised annotated map with GPS points Total daily distance Difficulty grading from short and easy to long and hard Entertaining insight into the people and places along the way Engaging photographs Accommodation suggestions and contact details

When he's not out cycling David Bristow writes for a living. He is the former editor of Getaway travel magazine and the author of more than a dozen books for Random House. Struik Steve Thomas discovered mountain bikes while living in the US in the 1980s. Upon his return to South Africa in 1992 he established Daytrippers South Africa's oldest and biggest bicycle touring company.

*Limits of horror* Fred Botting, 2013-07-19 Horror isn't what it used to be. Nor are its Gothic avatars. The meaning of monsters, vampires and ghosts has changed significantly over the last two hundred years as have the mechanisms from fiction to fantasmagoria, film and video games through which they are produced and consumed. *Limits of horror* moving from gothic to cybergothic through technological modernity and across a range of literary, cinematic and popular cultural texts critically examines these changes and the questions they pose for understanding contemporary culture and subjectivity. Re-examining key concepts such as the uncanny, the sublime, terror, shock and abjection in terms of their bodily and technological implications, this book advances current critical and theoretical debates on Gothic horror to propose a new theory of cultural production based on an extensive discussion of Freud's idea of the death drive. *Limits of horror* will appeal to students and academics in Literature, Film, Media and Cultural Studies and Cultural Theory.

**The New Heroines in Film and Television** Helena Bassil-Morozow, 2023-06-29 This thought-provoking volume offers an overview of contemporary representations of prominent female characters as they appear in an array of moving image narratives from a Jungian and post-Jungian perspective. Applying a theoretical frame that is richly informed by the Jungian and post-Jungian concepts of persona, individuation and archetypes, works including *Fleabag* (2016, 2019), *Ladybird* (2017) and *The Queen's Gambit* (2020) as well as Disney productions such as *Brave* (2012), *Moana* (2016) and *Frozen* (2013) are contextualized and discussed alongside their non-screen precedents and contemporaries including myths, fairy tales and works of literature to closely examine new patterns of the female journey. This book identifies how young female characters rebel against the female persona of previous eras through the trickster, the shadow and other archetypes, comparing the contemporary female protagonist with her predecessors to assess the new paths, roles and milestones available to her. Examining the construction of the female persona across time periods and mediums in an accessibly written yet academic style, this book is the first of its kind. With a fulsome account of the progressive developments in entertainment media and Jungian thought, this book is essential reading for students and scholars of film as well as anyone with an interest in analytical psychology and wider feminist issues in contemporary culture.

*Underground Writing* Dave Welsh, 2010-01-01 The purpose of this book is to explore the ways in which the London Underground Tube was mapped by a number of writers from George Gissing to Virginia Woolf. From late Victorian London to the end of the World War II, underground writing created an imaginative world beneath the streets.

of London The real subterranean railway was therefore re enacted in number of ways in writing including as Dantean Underworld or hell as gateway to a utopian future as psychological looking glass or as place of safety and security The book is a chronological study from the opening of the first underground in the 1860s to its role in WW2 Each chapter explores perspectives on the underground in a number of writers starting with George Gissing in the 1880s moving through the work of H G Wells and into the writing of the 1920s and 1930s including Virginia Woolf and George Orwell It concludes with its portrayal in the fiction poetry and art including Henry Moore of WW2 The approach takes a broadly cultural studies perspective crossing the boundaries of transport history literature and London urban studies It draws mainly on fiction but also uses poetry art journals postcards and posters to illustrate It links the actual underground trains tracks and stations to the metaphorical world of underground writing and places the writing in a social political context

**Forensic Media** Greg Siegel, 2014-11-05 In Forensic Media Greg Siegel considers how photographic electronic and digital media have been used to record and reconstruct accidents particularly high speed crashes and catastrophes Focusing in turn on the birth of the field of forensic engineering Charles Babbage's invention of a self registering apparatus for railroad trains flight data and cockpit voice recorders black boxes the science of automobile crash testing and various accident reconstruction techniques and technologies Siegel shows how forensic media work to transmute disruptive chance occurrences into reassuring narratives of causal succession Through historical and philosophical analyses he demonstrates that forensic media are as much technologies of cultural imagination as they are instruments of scientific inscription as imbued with ideological fantasies as they are compelled by institutional rationales By rethinking the historical links and cultural relays between accidents and forensics Siegel sheds new light on the corresponding connections between media technology and modernity
