## **Railway Data:**

**Innovative Applications of Big Data in the Railway Industry** Kohli, Shruti, Kumar, A.V. Senthil, Easton, John M., Roberts, Clive, 2017-11-30 Use of big data has proven to be beneficial within many different industries especially in the field of engineering however infiltration of this type of technology into more traditional heavy industries such as the railways has been limited Innovative Applications of Big Data in the Railway Industry is a pivotal reference source for the latest research findings on the utilization of data sets in the railway industry Featuring extensive coverage on relevant areas such as driver support systems railway safety management and obstacle detection this publication is an ideal resource for transportation planners engineers policymakers and graduate level engineering students seeking current research on a specific application of big data and its effects on transportation

**The Proceedings of 2024 International Conference on Artificial Intelligence and Autonomous Transportation** Limin Jia, Dechen Yao, Feng Ma, Liguang Zhang, Yuejian Chen, Qingwan Xue, 2025-03-27 This book reflects the latest research trends methods and experimental results in the field of Artificial Intelligence and Autonomous Transportation which covers abundant state of the art research theories and ideas As a vital research area that is highly relevant to current developments in a number of technological domains the topics covered include Autonomous Transportation Systems Autonomous Transportation Management and Control Technology Autonomous Transportation Equipment Technology Vehicular Networking and Information Security Emerging Technologies and Future Mobility Intelligent water transportation technology Cross Domain Transportation Technology and so on The goal of the proceedings is to provide a major interdisciplinary forum for researchers engineers academics and industry professionals to present the most innovative research and development in the field of Artificial Intelligence and Autonomous Transportation

Engineers and researchers from academia industry and government will also explore an insight view of the solutions that combine ideas from multiple disciplines in this area The volumes serve as an excellent reference work for researchers and graduate students working in the areas of rail transportation electrical engineering and information technology Gross National Product, Canada, 1870-1926 Malcolm Charles Urquhart,1993 Gross National Product Canada 1870 1926 The Derivation of the Estimates sets out in detail the sources of data and methods employed to obtain annual estimates of the gross national product of Canada between 1870 and 1926 Many other data used in compilation of the estimates or as a basis for assessing the accuracy of the estimates are also provided This information is an important contribution to Canadian economic history revealing growth and fluctuations in the Canadian economy and providing research material for other scholars **Handbook of Research on Emerging Innovations in Rail Transportation Engineering** Rai, B. Umesh,2016-05-31 The rail based transit system is a popular public transportation option not just with members of the public but also with policy makers looking to install a form of convenient and rapid travel Even for moving bulk freight long distances a rail based system is the most sustainable transportation system currently available The Handbook of Research on Emerging Innovations in Rail Transportation Engineering presents the latest research on next generation public transportation infrastructures Emphasizing a diverse set of topics related to rail based transportation such as funding issues policy design traffic planning and forecasting and engineering solutions this comprehensive publication is an essential resource for transportation planners engineers policymakers and graduate level engineering students interested in uncovering research based solutions recommendations and examples of modern rail transportation systems Railway Statistics of the United States of America ... Engineering Workshops Sophie Dupuy-Chessa, Henderik A. Proper, 2020-05-15 This book constitutes the thoroughly refereed proceedings of the international workshops associated with the 32nd International Conference on Advanced Information Systems Engineering CAiSE 2020 which was planned to take place in Grenoble France during June 8-12 2020. Due to the Coronavirus pandemic the conference was held virtually. The workshops included in this book are KET4DF The Second International Workshop on Key Enabling Technologies for Digital Factories ISESL The First International Workshop on Information Systems Engineering for Smarter Life. The total of 8 full and 3 short papers presented in this volume were carefully reviewed and selected from 20 submissions. The book also contains one invited talk *Smart Traction Power Supply Systems for High-speed Railways* Shibin Gao, Zhengqing Han, 2025-01-24. Given the increasingly busy railway networks, increased axle loads and railway speeds, modern railways and urban transport systems require smart and energy efficient traction power supply products and solutions to ensure safe, reliable and environmentally sustainable operations. Based on the latest development and achievements of China's traction power supply system, *Smart Traction Power Supply Systems for High-speed Railways* focuses on the latest research into smart traction power supply systems. Starting from the concept of smart technologies, it describes the structure and functions of smart traction power supply systems, including smart power supply and transformation facilities, smart power supply operation and maintenance management systems, smart power supply dispatching systems and high-speed communication networks. This book covers both theory and the implementation methods and case studies of wide-area protection, self-healing, reconstruction, fault prognosis, health assessment and power supply dispatching. It discusses what is meant by the term smart traction power supply systems and technology trends. It reviews the new concept of the traction substation. It describes how to develop smart traction power supply systems.
