Wrigley, George Revill, 2000 The essays in this volume which range across Europe America and Africa and from the 18th to the 20th centuries argue that the experience of travel and the business of representing that experience involved an obligatory engagement with the disturbing perception that travel's pleasures were inseparable from its dangers and ennui. Despite the confidence of some medical authorities in their recommendations of the therapeutic benefits to be derived from change of air as a way of restoring a state of health such opinions failed to establish a consensus either amongst those who followed such peripatetic prescriptions or amongst the medical professions in general. Mad doctors and climatologists alike were forced to adopt an essentially partisan stance in arguing their case for such recommendations and were confronted by rival practitioners who could marshal counter case histories which demonstrated diametrically opposed conclusions concerning the advisability of travel. To this extent the history of travel and its pathologies is a particularly revealing instance of the way medical thinking was dependent on localised studies which might do more to challenge the universal applicability of generally accepted theories than they did to confirm their diagnostic reliability. The essays collected here not only contribute to our understanding of the conception and application of a variety of medical ideas showing how they depended on beliefs about climate and corporeal constitution as well as often inconsistent data or reports culled from travellers and geographically dispersed case histories but also open up illuminatingly complex perspectives on the uncertainties and dangers of the phenomenon of modern travel.

*Tourism and Entrepreneurship International Perspectives* provides an innovative interdisciplinary approach. This book takes as its central theme the role of entrepreneurship in the context of regional, local and national tourism development. By engaging with top academics in both tourism and entrepreneurship this book delivers a cohesive interdisciplinary examination of the most recent developments in both tourism and entrepreneurship. Several key themes are explored and articulated through the following concepts and issues: tourism innovation and entrepreneurship; the role and nature of individual and collective entrepreneurship in different contexts; the role of tourism in responding to development opportunities created by global forces; and finally issues associated with tourism strategies and policies. Divided into four parts, the book reflects on the most relevant areas of tourism entrepreneurship: understanding the conceptual basis of tourism entrepreneurship; creative use of entrepreneurship and processes of social innovation; tourism entrepreneurship mediating the global-local divide; sectoral strategies and policy issues of tourism entrepreneurship. *Tourism and Entrepreneurship International Perspectives* also explains the impact of tourism entrepreneurship on places and overall regional and destination development; examines the role of the public sector in facilitating the need for sustainable tourism development; examines the effects and implications of funding schemes and support programmes; takes the owner-manager and entrepreneur as the starting point of analysis to explore specific issues; allows practitioners and policy makers to explore
