Rainforests Lgr4a:

Temperate and Boreal Rainforests of the World Dominick A. DellaSala, 2011 Temperate rainforests are biogeographically unique Compared to their tropical counterparts temperate rainforests are rarer and are found disproportionately along coastlines Because most temperate rainforests are marked by the intersection of marine terrestrial and freshwater systems these rich ecotones are among the most productive regions on Earth Globally temperate rainforests store vast amounts of carbon provide habitat for scores of rare and endemic species with ancient affinities and sustain complex food web dynamics In spite of their global significance however protection levels for these ecosystems are far too low to sustain temperate rainforests under a rapidly changing global climate and ever expanding human footprint Therefore a global synthesis is needed to provide the latest ecological science and call attention to the conservation needs of temperate and boreal rainforests A concerted effort to internationalize the plight of the world's temperate and boreal rainforests is underway around the globe this book offers an essential and heretofore missing tool for that effort DellaSala and his contributors tell a compelling story of the importance of temperate and boreal rainforests that includes some surprises e.g. South Africa Iran Turkey Japan Russia This volume provides a comprehensive reference from which to build a collective vision of their future

Tropical Rainforests Susan E. Place, 2001-05 Presents an overview of the nature of rainforests and discusses the causes and consequences of deforestation in Latin America's rainforests as well as alternative approaches to development

Conservation and Management of Tropical Rainforests E. F. Bruenig, 1996 The tropical rainforest ecosystem Rainforest use wisdom folly ambivalence Sustainable forestry in rainforests Principles and strategies of sustainability Sarawak forestry tortuous road towards sustainability Natarulistic natural rainforest management in Sarawak Restoration of degraded ecosystems Short rotation tree plantations Forest management guidelines Failures major obstacles trends and needs

Rainforests of the World Kathlyn Gay, 2001-08-13 Provides answers to some of the most basic questions about the world's disappearing rain forests Examines reasons for the forests destruction how it affects the indigenous animal and plant life as well as the entire planet

Rainforest Tony Juniper, 2019-09-19 Rainforests have long been recognized as hotspots of biodiversity but they are crucial for our planet in other surprising ways Not only do these fascinating ecosystems thrive in rainy regions they create rain themselves and this moisture is spread around the globe Rainforests across the world have a powerful and concrete impact reaching as far as America's Great Plains and central Europe In *Rainforest Dispatches from Earth's Most Vital Frontlines* a prominent conservationist provides a comprehensive view of the crucial roles rainforests serve the state of the world's rainforests today and the inspirational

efforts underway to save them In Rainforest Tony Juniper draws upon decades of work in rainforest conservation He brings readers along on his journeys from the thriving forests of Costa Rica to Indonesia where palm oil plantations have supplanted much of the former rainforest Despite many ominous trends Juniper sees hope for rainforests and those who rely upon them thanks to developments like new international agreements corporate deforestation policies and movements from local and Indigenous communities As climate change intensifies we have already begun to see the effects of rainforest destruction on the planet at large Rainforest provides a detailed and wide ranging look at the health and future of these vital ecosystems Throughout this evocative book Juniper argues that in saving rainforests we save ourselves too

In the Rainforest Catherine Caufield, 1985 Details of animal and plant life as well as the environmental vulnerability of the tropical rainforest of Central and South America Africa India Philippines and Indonesia

Rainforests Tony Allan, 2003 A survey of how rain forests work what makes them such rich habitats why we need them the consequences of their current destruction and what we can do to save them

Fast Facts: Mysterious Rain Forests Editors of Kingfisher, 2016-03-15 An introduction to the wide range of life in the world's tropical rainforests conveys facts about such topics as the biggest snakes the varieties of rainforest trees and the creatures who live in the high canopies

Tropical Rainforests Eldredge Bermingham, Christopher W. Dick, Craig Moritz, 2005-08 Synthesizing theoretical empirical analyses of the processes that help shape these unique ecosystems Tropical Rainforests looks at the effects of evolutionary histories past climate change ecological dynamics on the origin maintenance of tropical rainforest communities

Why are the Rainforests Being Destroyed? Peter Littlewood, 2015-01-01 Written in British English Why Are the Rain Forests Being Destroyed looks at the threats to the world's rain forests from the logging and mining industries power and oil companies and from ranchers and farmers

On the Edge Claude Martin, 2015-04-20 In 1972 *The Limits to Growth* introduced the idea that world resources are limited Soon after people became aware of the threats to the world's rainforests the biggest terrestrial repositories of biodiversity and essential regulators of global air and water cycles Since that time new research and technological advances have greatly increased our knowledge of how rainforests are being affected by changing patterns of resource use Increasing concern about climate change has made it more important than ever to understand the state of the world's tropical forests This book provides an up to date picture of the health of the world's tropical forests Claude Martin an eminent scientist and conservationist integrates information from remote imaging ecology and economics to explain deforestation and forest health throughout the world He explains how urbanization an increasingly global economy and a worldwide demand for biofuels put new pressure on rainforest land He examines the policies and market forces that have successfully preserved forests in some areas and discusses the economic benefits of protected areas Using evidence from ice core records and past forest cover patterns he predicts the most likely effects of climate change Claude Martin brings his wealth of experience as an ecologist

director of the WWF and advisor to various conservation organizations to bear on the latest research from around the world. Contributions from eight leading experts provide additional insight. **Temperate and Boreal Rainforests of the World** Dominick A. DellaSala, 2011-09-21. Temperate rainforests are biogeographically unique. Compared to their tropical counterparts, temperate rainforests are rarer and are found disproportionately along coastlines. Because most temperate rainforests are marked by the intersection of marine, terrestrial, and freshwater systems, these rich ecotones are among the most productive regions on Earth. Globally, temperate rainforests store vast amounts of carbon, provide habitat for scores of rare and endemic species with ancient affinities, and sustain complex food web dynamics. In spite of their global significance, however, protection levels for these ecosystems are far too low to sustain temperate rainforests under a rapidly changing global climate and ever-expanding human footprint. Therefore, a global synthesis is needed to provide the latest ecological science and call attention to the conservation needs of temperate and boreal rainforests. A concerted effort to internationalize the plight of the world's temperate and boreal rainforests is underway around the globe; this book offers an essential and heretofore missing tool for that effort. DellaSala and his contributors tell a compelling story of the importance of temperate and boreal rainforests that includes some surprises, e.g., South Africa, Iran, Turkey, Japan, Russia. This volume provides a comprehensive reference from which to build a collective vision of their future. **Encyclopedia of Rainforests** Diane Jukofsky, 2002. Explore the magic and mystery of the world's tropical rainforests. Page 4 of cover. ***Tropical Rainforest Responses to Climatic Change*** John Flenley, Mark Bush, 2007-06-20. The goal of this book is to provide a current overview of the impacts of climate change on tropical forests, to investigate past, present, and future climatic influences on the ecosystems with the highest biodiversity on the planet. *Tropical Rainforest Responses to Climatic Change* will be the first book to examine how tropical rain forest ecology is altered by climate change rather than simply seeing how plant communities were altered. Shifting the emphasis onto ecological processes, e.g., how diversity is structured by climate and the subsequent impact on tropical forest ecology, provides the reader with a more comprehensive coverage. A major theme of this book that emerges progressively is the interaction between humans, climate, and forest ecology. While numerous books have appeared dealing with forest fragmentation and conservation, none have explicitly explored the long-term occupation of tropical systems, the influence of fire, and the future climatic effects of deforestation coupled with anthropogenic emissions. Incorporating modelling of past and future systems paves the way for a discussion of conservation from a climatic perspective rather than the usual plea to stop logging. **Rainforests** Rhett A. Butler, 2011-09. An overview of tropical rainforests for kids. *Rainforests* describes tropical rainforests, why they are important, and what is happening to them. *Rainforests* is based on the award-winning mongabay.com web site. *Rainforests* includes discussion of topics including conservation and protected areas, biodiversity, and ecology, environmental activism, sustainable development, consumption, and economics. **An Introduction to Tropical Rain Forests** Timothy Charles Whitmore, 1990.
