

Richard Serra Sculpture 1985 1998 Sculpture 1985 1998

Richard Serra

Richard Serra Sculpture 19851998 Sculpture 19851998:

Space, Site, Intervention Erika Suderburg, 2000 From Ferdinand Cheval's Palais Ideal 1879 1905 and Simon Rodia's Watts Towers 1921 1954 to Ant Farm's Cadillac Ranch 1974 and Richard Serra's Tilted Arc 1981 installation art has continually crossed boundaries encompassing sculpture architecture performance and visual art Although unique in its power to transform both the site in which a work is constructed and the viewer's experience of being in a place installation art has not received the critical attention accorded other art forms In *Space Site Intervention* some of today's most prominent art critics curators and artists view installation art as a diverse multifaceted and international art form that challenges institutional assumptions and narrow conceptual frameworks The contributors discuss installation in relation to the genealogy of modern art community and corporate space multimedia cyberspace public and private ritual the gallery and the museum public and private patronage and political action This ambitious volume focuses on issues of class sexuality cultural identity race and gender and highlights a wide range of artists whose work is often marginalized by mainstream art history and criticism Together the essays in *Space Site Intervention* investigate how installation resonates within modern culture and society as well as its ongoing influence on contemporary visual culture *Richard Serra Sculpture* Kynaston McShine, Richard Serra, Lynne Cooke, Museum of Modern Art (New York, N.Y.), 2007 This book offers a detailed presentation of Richard Serra's entire career from his early experiments with materials like rubber neon and lead to the environmentally scaled steel works of recent years including three monumental new sculptures created for the exhibition that this book accompanies **BOOK JACKET** **Sculpture** Robin Peck, 2004 *Sculpture* examines the philosophy history and material technology of sculpture within the frame of a travel narrative from Canada to New York and across Europe **Richard Serra** Richard Serra, Hal Foster, Museum of Contemporary Art (Los Angeles, Calif.), 1998 This major publication catalogues all of Richard Serra's sculpture of the last thirteen years presenting extensive photographic documentation of his site specific sculpture as well as an important critical text and an interview with the artist **Michael Heizer: The Once and Future Monuments** William L. Fox, 2019-09-24 The most comprehensive account available of Michael Heizer's art by a writer and curator who has critical experience with the artist and his work Michael Heizer is among the greatest and often least accessible American artists As one of the last living figures who launched the Land Art movement his legacy of works that are literally and metaphorically monumental has an incalculable influence on the world of sculpture and environmental art But his seclusion in the remote Nevada desert as well as his notorious obduracy have resulted in significant gaps in our critical understanding Michael Heizer *The Once and Future Monuments* spans the breadth of Heizer's career uniquely combining fieldwork personal narrative and biographical research to create the first major assessment in years of this titan of American art Author William L. Fox founding director of the Center for Art Environment at the Nevada Museum of Art has alternately been a sponsor advocate and critic of Heizer's work for decades Fox's understanding of the artist's history and connection to

landscape his time spent with Heizer at the remote ranch where Heizer is finishing his magnum opus the mile long sculpture City and his access to some of Heizer's key associates give him a unique position from which to discuss the artist's work Fox has also made numerous site visits to Heizer's work including early pieces in the Nevada desert now largely lost to the elements to correct the often inconsistent accounts of their locations Last Fox imparts a crucial new understanding of Heizer's work by elaborating on the artist's bond with his father the famed archaeologist and cultural ecologist Robert Heizer who enlisted his son on important digs in Mexico and Peru providing the young man with an appreciation of site landscape and geology that would thoroughly inform his work Michael Heizer The Once and Future Monuments is a long overdue addition to the critical and biographical literature of this major figure in American art Josef Albers, Late Modernism, and Pedagogic Form Jeffrey Saletnik, 2022-10-13 An incisive analysis of the pedagogy of influential artist and teacher Josef Albers An extraordinary teacher whose influence continues today Josef Albers helped shape the Bauhaus school in Germany and established the art and design programs at Black Mountain College in North Carolina and Yale University His books about color theory have informed generations and his artworks are included in the canon of high modernist non representational art The pedagogy Albers developed was a dynamic approach to teaching that transcended the modernist agendas and cultivated a material way of thinking among his students With this book Jeffrey Saletnik explores the origins of Albers's teaching practices and their significance in conveying attitudes about form material and sensory understanding to artists Eva Hesse and Richard Serra He demonstrates how pedagogy is a framework that establishes the possibility for artistic discourse and how the methods through which artists learn are manifested in their individual practices Tracing through lines from Albers's training in German educational traditions to his influence on American postwar art Josef Albers Late Modernism and Pedagogic Form positions Albers's pedagogy as central to the life of modernism **The Art-Architecture Complex** Hal Foster, 2013-07-23 Hal Foster author of the acclaimed Design and Crime argues that a fusion of architecture and art is a defining feature of contemporary culture He identifies a global style of architecture as practiced by Norman Foster Richard Rogers and Renzo Piano analogous to the international style of Le Corbusier Gropius and Mies More than any art today's global style conveys both the dreams and delusions of modernity Foster demonstrates that a study of the art architecture complex provides invaluable insight into broader social and economic trajectories in urgent need of analysis **The Spatial Politics of the Sculptural** Euyoung Hong, 2016-10-04 Space is a formative factor in the production of sculpture Phenomenological thought interprets sculptural work in relation to the immersive experience of the viewer situating it within its environment But what possibilities lie beyond this unitary position What is the political potential of a sculptural object How can its spatial relations and movements be reconfigured beyond its immediate environment Spatial Politics of the Sculptural investigates the concept of space and its role in the production of the sculptural form from a multidimensional perspective Engaging with the work of Krauss Fried Merleau-Ponty Deleuze and Guattari and using case studies of urban

development in Paris New York and Seoul it reinterprets and dislocates the sculptural form in terms of the political dynamism of space proposing a new methodology for reading producing and expanding sculptural practice Drawing on David Harvey s theory of capital it scrutinizes the idea of the spatial in the process of urbanization It examines the interrelationship between capital flow and accumulation and explores the production and destruction of space in relation to the creation of three dimensional works of art In doing so it expands the idea of the sculptural object in relation to the urban environment

The Tilted Arc Controversy Harriet Senie,2002 **Richard Serra** Richard Serra,1998

Reviewing **Richard Serra Sculpture 19851998 Sculpture 19851998**: Unlocking the Spellbinding Force of Linguistics
