Embodying Music: A Textbook for Dalcroze Teacher Training towards the Dalcroze Professional Certificate

Jeremy Dittus, 2025-04-08 Dalcroze Education is an experiential way of knowing music through the body. This dynamic and profound philosophy stems from an oral tradition that can be traced back to those who studied directly with mile Jaques Dalcroze in Geneva Switzerland during his lifetime 1865-1950. Recent trends in music education and Dalcroze students stated needs have demanded more specificity and accessibility; these books aim to meet those needs by providing examples of many important skills necessary for a successful Dalcrozian without being narrow or prescriptive. Dalcroze Eurhythmics, Solfège, Improvisation, Plastique, Animé and Pedagogy are all addressed in these volumes to prepare students to earn the Dalcroze Professional Certificate. Students using this text should be enrolled at an authorized Dalcroze Training Center run by someone who holds the Diplôme Supérieur from l'Institut Jaques Dalcroze in Geneva Switzerland. Students who use these books should already have had a fair amount of musical training; an undergraduate degree in music is recommended though not required as the starting point for readers of these texts. It is my hope that these books will enable individuals to gain access to la Méthode Jaques Dalcroze with more efficiency and facility while maintaining the high standards of musicianship that are required to offer joyful and musically inspiring coursework in Dalcroze Education. **Mind and Body**, 1908 **The Effects**

Disability and Music Performance Alejandro Alberto Téllez Vargas, 2018-06-12 Disability and Music Performance examines discriminatory social practices in music conservatoria, orchestras, music festivals, and music competitions which limit disabled people's access to music performance at a professional level. Of particular interest are the disabling barriers that musicians with an intellectual, physical, sensory, or neurological disability, or an acquired brain injury encounter in the world of Western classical music, both as students and as professional performers. This book collects data in the form of semi-structured interviews and video and audio recordings to explore the voice concerns and suggestions expressed by musicians with disabilities. It examines their perceptions of both inclusive and discriminatory practices in music institutions, as well as the representation of and audio-visual recordings by key musical figures with disabilities. Its findings aim to contribute to the wellbeing of musicians with impairments by challenging disabling social practices that see them as inferior. This publication offers performers, teachers, and researchers new perspectives for exploring some of the most common social dynamics in encounters between normative audiences, musicians, and music critics and musicians with disabilities. It invites the reader to recognise disability as a rightful identity category in music performance and to dismantle the disabling barriers that limit the participation of disabled people in music making. **Music and Dance Traditions of Ghana** Paschal Yao
