Preserving Historic Landscapes, 1990 **All about Flowers** Thomas J. Mickey, 2021-05-07 A nineteenth century entrepreneur's bold innovative marketing helped transform flower gardens into one of America's favorite hobbies There is much that is hard and productive of sorrow in this sin plagued world of ours and had we no flowers I believe existence would be hard to be borne So states a customer's 1881 letter one of thousands James Vick regularly received Vick's business selling flower seeds through the mail wasn't unique but it was wildly successful because he understood better than his rivals how to engage customers emotions He sold the love of flowers along with the flower seeds Vick was genuinely passionate about floriculture but he also pioneered what we now describe as integrated marketing He spent a mind boggling 100 000 per year on advertising mostly to women his target demographic he courted newspaper editors for free publicity his educational guides presaged today's content marketing he recruited social influencers to popularize neighborhood gardening clubs and he developed a visually rich communication and branding strategy to build customer loyalty and deflect their purchasing needs with purchasing desire

Hybrid Noel Kingsbury,2011-11-15 Noel Kingsbury reveals that even those imaginary perfect foods are themselves far from anything that could properly be called natural rather they represent the end of a millennia long history of selective breeding and hybridization Starting his story at the birth of agriculture Kingsbury traces the history of human attempts to make plants more reliable productive and nutritious a story that owes as much to accident and error as to innovation and experiment Drawing on historical and scientific accounts as well as a rich trove of anecdotes Kingsbury shows how scientists amateur breeders and countless anonymous farmers and gardeners slowly caused the evolutionary pressures of nature to be supplanted by those of human needs and thus led us from sparse wild grasses to succulent corn cobs and from mealy white wild carrots to the juicy vegetables we enjoy today At the same time Kingsbury reminds us that contemporary controversies over the Green Revolution and genetically modified crops are not new plant breeding has always had a political dimension Publisher s description
