Radiant Past Ideology And Reality In Hungary's Road To Capitalism:

The Radiant Past Michael Burawoy, János Lukács, 1992-03-15 Communism once heralded as the radiant future of all humanity has now become part of Eastern Europe's past. What does the record say about the legacy of communism as an organizational system? Michael Burawoy and János Lukács consider this question from the standpoint of the Hungarian working class. Between 1983 and 1990 the authors carried out intensive studies in two core Hungarian industries: machine building and steel production to produce the first extended participant observation study of work and politics in state socialism. A fascinating and engagingly written eyewitness report on proletarian life in the waning years of goulash communism. A richly rewarding book, one that should interest political scientists in a variety of subfields from area specialists and comparativists to political economists as well as those interested in Marxist and post-Marxist theory. Elizabeth Kiss, *American Political Science Review*. A very rich book. It does not merely offer another theory of transition but also presents a clear interpretive scheme combined with sociological theory and vivid ethnographic description. Ireneusz Bialecki, *Contemporary Sociology*. Its informed skepticism of post-Communist liberal euphoria, its concern for workers and its fine ethnographic details make this work valuable. Kos R. Na Tas, *American Journal of Sociology*. *Reflections on 1989 in Eastern Europe* Terry Cox, 2013-09-13 This book presents a selection of recent research on the events and developments of 1989 in Eastern Europe. It offers a mix of detailed examinations of the events of 1989 in Eastern Europe, thoughtful and considered appraisals of developments and middle-range theoretical discussions of patterns of cause and effect. The authors range in their approaches from detailed examinations of government and ruling party papers from the archives (some of it originally labelled top secret) to personal observations and oral history based on interviews with participants to analysis of survey data and official statistics. In their chosen focus, the essays range from explorations of the emerging crisis in the communist regimes that led to the events of 1989, reflections and insights into the events and changing mood during 1989 itself, and examinations of some of the consequences and legacies of 1989. This book was published as a special issue of *Europe Asia Studies*. **Privatizing Poland** Elizabeth Cullen Dunn, 2015-09-25 The transition from socialism in Eastern Europe is not an isolated event but part of a larger shift in world capitalism: the transition from Fordism to flexible or neoliberal capitalism. Using a blend of ethnography and economic geography, Elizabeth C. Dunn shows how management technologies like niche marketing, accounting, audit, and standardization make up flexible capitalism's unique form of labor discipline. This new form of management constitutes some workers as self-auditing, self-regulating actors who are disembedded from a social context while defining others as too entwined in social relations and unable to self-manage. *Privatizing Poland* examines the effects privatization has on workers' self-concepts, how changes in personhood relate to economic and political transitions, and how globalization and foreign capital investment affect Eastern Europe's integration into the world economy. Dunn investigates these topics through a study of workers and changing management techniques at the Alima Gerber factory in Rzeszów, Poland.

formerly a state owned enterprise which was privatized by the Gerber Products Company of Fremont Michigan Alima Gerber instituted rigid quality control job evaluation and training methods and developed sophisticated distribution techniques The core principle underlying these goals and strategies the author finds is the belief that in order to produce goods for a capitalist market workers for a capitalist enterprise must also be produced Working side by side with Alima Gerber employees Dunn saw firsthand how the new techniques attempted to change not only the organization of production but also the workers identities Her seamless engaging narrative shows how the employees resisted redefined and negotiated work processes for themselves

Hot Coal, Cold Steel Stephen Crowley, 2010-06-04 Well after the disintegration of the Communist Party and the Soviet state and through several years of economic collapse industrial workers in almost every sector of the former Soviet Union have remained quiescent and the same ineffective and unpopular trade unions still hold a virtual monopoly on worker s representation Why While many argue that labor is a central variable in the development of economic and political systems little is known about workers in the states of the former Soviet Union since the fall of Communism In a comparative study of two groups of industrial workers the coal miners and steelworkers at the end of the Soviet era Stephen Crowley sheds light on where these workers have been and where they are going Coal miners in the final years of the Soviet Union effectively organized and led strikes which supported the end of Communism even though their heavy subsidies would be threatened by capitalism Steel workers in contrast did not effectively organize and strike This pattern has continued under the new governments with the coal miners effectively organized and seeking protection from the worst consequences of marketization while the steel workers remain weakly organized despite deteriorating economic
