Radical Nature Rediscovering The Soul Of Matter:

Radical Nature Christian De Quincey, 2002 Do animals have souls Do worms and insects feel pain or pleasure Can trees feel anything at all Ever wondered where in the great unfolding of evolution consciousness first appeared If questions like these intrigue you you are in good company because they touch on the deepest mystery in modern philosophy and science How are minds and bodies related How does consciousness fit into the physical world These are not just idle speculations How we answer such questions can dramatically affect the way we live our lives treat the natural world and other people and even how we relate to our own bodies In Radical Nature philosopher Christian de Quincey explores how mind and matter are related and he proposes a radical and surprising answer Consciousness goes all the way down Through animals plants even single cells in fact all the way down the great chain of being to molecules atoms and beyond Drawing on both ancient and modern knowledge de Quincey shows us that the universe teems with consciousness through and through Matter itself tingles with the spark of spirit he says And therefore nature in all its forms and glory is sacred to its deepest roots Radical Nature takes you on a mind stretching journey in this remarkable story of philosophy and science in search of a soul Back cover

Radical Nature Christian de Quincey, 2010-02-22 An exploration of consciousness in all matter from quantum to cosmos Outlines theories of consciousness in ancient and modern philosophy from before Plato to Alfred North Whitehead Reveals the importance of understanding mind in matter for our relationships with the environment with other people even with ourselves Are rocks conscious Do animals or plants have souls Can trees feel pleasure or pain Where in the great unfolding of life did consciousness first appear How we answer such questions can dramatically affect the way we live our lives how we treat the world of nature and even how we relate to our own bodies In this new edition of the award winning Radical Nature Christian de Quincey explores the hard problem of philosophy how mind and matter are related and proposes a radical and surprising answer that matter itself tingles with consciousness at the deepest level It is there in the cells of every living creature even in molecules and atoms Tracing the lineage of this idea through Western philosophy and science he shows that it has a very noble history from before Plato to Alfred North Whitehead He reveals that the way to God is through nature and that understanding how body and soul fit together has surprising consequences for our relationships with our environment with other people and even with ourselves

Ghosts, Spirits, and Psychics Matt Cardin, 2015-07-28 This fascinating work provides a complete overview of paranormal phenomena including the beliefs attitudes and notable figures who have attempted to explain defend or debunk the mysteries behind the unknown Recent interest in the paranormal as pop culture fodder belies its historical status as an important subject of cultural philosophical and scientific significance This book traces the trajectory of paranormal studies from its early role as a serious academic and scientific topic studied by mainstream scientists and eminent scholars to its current popularity in books film and TV This compelling reference work details the experiences encounters and ideas that make up this controversial field of study The contributed entries examine

the broad phenomena of the paranormal addressing the history of scientific investigations along with its contemporary media depictions to illustrate the evolution of cultural attitudes about the paranormal A selection of primary documents provides real life accounts and contributions from noted experts that explore the full scope of themes from spiritualism to poltergeists to astrology Accompanying images timelines quotations and sidebars make the content come to life and encourage alternative explanations of these events

Blood on the Tracks Willson, S. Brian, 2011-08-01 We are not worth more they are not worth less This is the mantra of S Brian Willson and the theme that runs throughout his compelling psycho historical memoir Willson s story begins in small town rural America where he grew up as a Commie hating baseball loving Baptist moves through life changing experiences in Viet Nam Nicaragua and elsewhere and culminates with his commitment to a localized sustainable lifestyle In telling his story Willson provides numerous examples of the types of personal risk taking nonviolent actions he and others have taken in attempts to educate and effect political change tax refusal which requires simplification of one s lifestyle fasting done publicly in strategic political and or therapeutic spiritual contexts and obstruction tactics strategically placing one s body in the way of business as usual It was such actions that thrust Brian Willson into the public eye in the mid 80s first as a participant in a high profile water only Veterans Fast for Life against the Contra war being waged by his government in Nicaragua Then on a fateful day in September 1987 the world watched in horror as Willson was run over by a U S government munitions train during a nonviolent blocking action in which he expected to be removed from the tracks and arrested Losing his legs only strengthened Willson s identity with millions of unnamed victims of U S policy around the world He provides details of his travels to countries in Latin America and the Middle East and bears witness to the harm done to poor people as well as to the environment by the steamroller of U S imperialism These heart rending accounts are offered side by side with inspirational stories of nonviolent struggle and the survival of resilient communities Willson s expanding consciousness also uncovers injustices within his own country including insights gained through his study and service within the U S criminal justice system and personal experiences addressing racial injustices He discusses coming to terms with his identity as a Viet Nam veteran and the subsequent service he provides to others as director of a veterans outreach center in New England He draws much inspiration from friends he encounters along the way as he finds himself continually drawn to the path leading to a simpler life that seeks to do no harm rdquo Throughout his personal journey Willson struggles with the question Why was it so easy for me a good man to follow orders to travel 9 000 miles from home to participate in killing people who clearly were not a threat to me or any of my fellow citizens He eventually comes to the realization that the American Way of Life is AWOL from humanity and that the only way to recover our humanity is by changing our consciousness one individual at a time while striving for collective cultural changes toward less and local Thus Willson offers up his personal story as a metaphorical map for anyone who feels the need to be liberated from the American Way of Life a guidebook for anyone called by conscience to question continued obedience to vertical power structures while

longing to reconnect with the human archetypes of cooperation equity mutual respect and empathy Ecofeminism:
Feminist Intersections with Other Animals and the Earth Carol J. Adams, Lori Gruen, 2014-07-31 Leading feminist scholars and activists as well as new voices introduce and explore themes central to contemporary ecofeminism Ecofeminism Feminist Intersections with Other Animals and the Earth first offers an historical grounding overview that situates ecofeminist theory and activism and provides a timeline for important publications and events This is followed by contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more than human world In the final section the contributors explore the complexities of appreciating difference and the possibilities of living less violently Throughout the book the authors engage with intersections of gender and gender non conformity race sexuality disability and species The result is a new up to date resource for students and teachers of animal studies environmental studies feminist gender studies and practical ethics **Consensus on Peirce's Concept of Habit** Donna E. West, Myrdene Anderson, 2016-09-12 This book constitutes the first treatment of C S Peirce's unique concept of habit Habit animated the pragmatists of the 19th and early 20th centuries who picked up the baton from classical scholars principally Aristotle Most prominent among the pragmatists thereafter is Charles Sanders Peirce In our vernacular habit connotes a pattern of conduct Nonetheless Peirce's concept transcends application to mere regularity or to human conduct it extends into natural and social phenomena making cohesive inner and outer worlds Chapters in this anthology define and amplify Peircean habit as such they highlight the dialectic between doubt and belief Doubt destabilizes habit leaving open the possibility for new beliefs in the form of habit change and without habit change the regularity would fall short of habit conforming to automatic mechanistic systems This treatment of habit showcases how through human agency innovative regularities of behavior and thought advance the process of making the unconscious conscious The latter materializes when affordances invariant habits of physical phenomena form the basis for modifications in action schemas and modes of reasoning Further the book charts how indexical signs in language and action are pivotal in establishing attentional patterns and how these habits accommodate novel orientations within event templates It is intended for those interested in Peirce's metaphysic or semiotic including both senior scholars and students of philosophy and religion psychology sociology and anthropology as well as mathematics and the natural sciences Learning Their Language Marta Williams, 2010-10-04 Almost everyone has had a moment when they've felt a connection to an animal Animal communicator Marta Williams says this is the basis of animal communication and it's a skill anyone can develop Williams's background as a scientist informs her logical step by step approach to learning the language of animals a process combining mental imagery visualization deep listening and tuning in to one's intuition Practical advice and proven techniques are interwoven with inspiring real life accounts Williams also discusses ways to use these skills to find lost animals help animals heal from injury or illness and explore similar deep connections with nature and the earth Secularism Mike King, 2007-11-29 Spirituality is a difficult

subject in the modern world Everywhere from popular media to the university from the bookshelf to the dinner table religions are derided or marginalised and public figures such as Richard Dawkins set upon anyone who admits to a belief in God It seems that science and religion are fundamentally at odds and that a mutual respect is unacceptable to either in their parallel pursuit of truth Yet the majority of Enlightenment authors engaged with both science and spirituality and did not lose their faith Today we tend to see these authors as not having applied full scientific rigour to their religious beliefs but are we correct in dismissing this aspect of their lives so easily In *Secularism* Mike King examines the elements of religion philosophy and science which have contributed to an almost total disavowal of spirituality by contemporary western intellectuals He engages with a wide range of thinkers including Pythagoras Marx Spinoza Darwin and Nietzsche and incorporates detailed studies of a variety of spiritual leaders some of whom readers are unlikely to have considered in this way before to uncover why the western world no longer has any interest in devotion or accords it any respect

The Aesthetics of Care Josephine Donovan, 2016-06-02 In this important new book from a distinguished scholar Josephine Donovan develops a new aesthetics of care which she establishes as the basis for a critical approach to the representation of animals in literature The Aesthetics of Care begins with a guide to the relationship between ethics and aesthetics leading to a reconceptualization of key literary critical terms such as mimesis and catharsis before moving on to an applied section with interpretations of the specific treatment of animals handled by a wide range of authors including Willa Cather Leo Tolstoy George Sand and J M Coetzee The book closes with three concluding theoretical chapters Clear original and provocative The Aesthetics of Care introduces and makes new contributions to a number of burgeoning areas of study and debate aesthetics and ethics critical theory animal ethics and ecofeminist criticism

Science and the Akashic Field Ervin Laszlo, 2007-05-03 Presents the unifying world concept long sought by scientists mystics and sages an Integral Theory of Everything Explains how modern science has rediscovered the Akashic Field of perennial philosophy New edition updates ongoing scientific studies presents new research inspired by the first edition and includes new case studies and a section on animal telepathy Mystics and sages have long maintained that there exists an interconnecting cosmic field at the roots of reality that conserves and conveys information a field known as the Akashic record Recent discoveries in vacuum physics show that this Akashic Field is real and has its equivalent in science's zero point field that underlies space itself This field consists of a subtle sea of fluctuating energies from which all things arise atoms and galaxies stars and planets living beings and even consciousness This zero point Akashic Field is the constant and enduring memory of the universe It holds the record of all that has happened on Earth and in the cosmos and relates it to all that is yet to happen In *Science and the Akashic Field* philosopher and scientist Ervin Laszlo conveys the essential element of this information field in language that is accessible and clear From the world of science he confirms our deepest intuitions of the oneness of creation in the Integral Theory of Everything We discover that as philosopher William James stated We are like islands in the sea separate on the surface but connected in the deep

Leadership in Higher Education from a Transrelational Perspective Christopher M. Branson, Maureen

Marra, Margaret Franken, Dawn Penney, 2018-04-05 There is an abundance of research saying that not only is leadership in higher education ineffective but also that it actually undermines the essential work that should be happening in universities Christopher M Branson Maureen Marra Margaret Franken and Dawn Penney provide a new insight into leadership that has proven to be far more effective for all involved the transrelational approach to leadership This new way of leading places an emphasis on the importance of the relationships that the leader develops with each and every person they are leading However in order to apply this new way of leading higher education institutions must change some of the key ways they work This book provides direction in how this can happen what benefits would result and offers a view on what the future for higher education might be if such changes to leadership are not made Leadership in Higher Education from a Transrelational Perspective both critiques the likely implications of adopting this transrelational form of leadership into a higher educational institution and discusses the implications of not doing so Although a transrelational approach to leadership might seem daunting for higher education institutions to adopt is there any other choice The authors argue that it is inconceivable for institutions founded upon promoting human development as a consequence of research to ignore such research that not only questions the suitability of current leadership practices but also offers a more effective alternative Ontology of

Consciousness Helmut Wautischer, 2008-04-11 Scholars from many different disciplines examine consciousness through the lens of intellectual approaches and cultures ranging from cosmology research and cell biophysics laboratories to pre Columbian Mesoamerica and Tibetan Tantric Buddhism in a volume that extends consciousness studies beyond the limits of current neuroscience research The hard problem of today's consciousness studies is subjective experience understanding why some brain processing is accompanied by an experienced inner life Recent scientific advances offer insights for understanding the physiological and chemical phenomenology of consciousness But by leaving aside the internal experiential nature of consciousness in favor of mapping neural activity such science leaves many questions unanswered In Ontology of Consciousness scholars from a range of disciplines from neurophysiology to parapsychology from mathematics to anthropology and indigenous non Western modes of thought go beyond these limits of current neuroscience research to explore insights offered by other intellectual approaches to consciousness These scholars focus their attention on such philosophical approaches to consciousness as Tibetan Tantric Buddhism North American Indian insights pre Columbian Mesoamerican civilization and the Byzantine Empire Some draw on artifacts and ethnographic data to make their point Others translate cultural concepts of consciousness into modern scientific language using models and mathematical mappings Many consider individual experiences of sentience and existence as seen in African communalism Hindi psychology Zen Buddhism Indian vibhuti phenomena existentialism philosophical realism and modern psychiatry Some reveal current views and conundrums in neurobiology to comprehend sentient intellection Contributors Karim Akerma Matthijs Cornelissen

Science and the Reenchantment of the Cosmos Ervin Laszlo, 2006-01-12 Presents a revolutionary new theory that bridges the divide between science and spirituality Discloses the ramifications of non localized consciousness and how the physical world and spiritual experience are two aspects of the same reality Includes contributions from Jane Goodall Ed Mitchell Stanislav Grof Ralph Abraham and Christian de Quincy among others What scientists are now finding at the outermost frontiers of every field is overturning all the basic premises concerning the nature of matter and reality The universe is not a world of separate things and events but is a cosmos that is connected coherent and bears a profound resemblance to the visions held in the earliest spiritual traditions in which the physical world and spiritual experience were both aspects of the same reality and man and the universe were one The findings that justify this new vision of the underlying logic of the universe come from almost all of the empirical sciences physics cosmology the life sciences and consciousness research They explain how interactions lead to interconnections that produce instantaneous and multifaceted coherence what happens to one part also happens to the other parts and hence to the system as a whole The sense of sacred oneness experienced by our ancestors that was displaced by the unyielding material presumptions of modern science can be restored and humanity can once again feel at home in the universe

The World I Dream of Curt Butz, 2010-08-16 Dreaming humanity s future There is nothing like the dream to create the future Victor Hugo Dream lofty dreams and as you dream so you shall become Your vision is the promise of what you shall one day be your ideal is the prophecy of what you shall at last unveil James Allen What is it we as a human race desire in the world What dreams do we have to shape our future Over 100 artists activists authors educators speakers environmentalists scientists young entrepreneurs visionaries and Elders were asked for the following A written description of your perfect world or your dream world This can be one sentence or many pages a poem or researched essay Your dream world can be as fantastic and marvelous as you want it to be There are no rules no right or wrong descriptions only the world of your imagination and the world of your dreams

Leading Educational Change Wisely Christopher M. Branson, 2010-01-01 Despite over 40 years of research and writing about how to lead educational change we still can t get it right Although we keep fine tuning our present ways we are yet to come up with an approach that enables educational change to happen successfully and sustainably Although this book acknowledges the importance of learning from our past it also highlights a key deficiency that has consistently compromised these efforts To date our approach to leading educational change has mainly focussed on trying to come up with the perfect practical strategy or plan In contrast this book argues that leading educational change successfully is not about following a clearly defined process like following a recipe but it is an improvisational art more like driving down a busy main street during peak

hour traffic The successful leadership of educational change is an improvisational art because although the leader needs to have an overarching strategy a guiding plan what they actually do from moment to moment cannot be scripted The leader has to move back and forth from their plan to the reality currently being experienced so that the plan is being achieved but any adverse effects on those involved are being empathically and immediately attended to as well This approach to the leadership of educational change emphasises the need of the leader to be able to cope with the unforeseen the unexpected and the idiosyncratic Moreover this approach to the leadership of educational change emphasises the relational as well as the rational requirements While such views might be familiar to many what is new and unique about this book is that it describes how it all can be achieved It provides clear research supported guidance for those who wish to finally lead successful and sustainable educational change

Leadership for an Age of Wisdom Chris Branson, 2009-09-01 This book provides a clear comprehensive and compelling description of the nature characteristics and prerequisites of wisdom led leadership It not only includes a detailed description of what is meant by wisdom led leadership but also it describes how wisdom led leadership can be developed based on current research data In other words practical ways to promote wisdom led leadership are described In addition a metaphysical foundation in support of wisdom led leadership is provided along with a detailed analysis of how this form of leadership can better prepare the leader to confidently and capably attend to their relational and organisational development demands which are pivotal to their success Finally the fundamentally important and influential external issues of performance management vision goals and accountability are discussed at length with respect to their potentially detrimental impact on the achievement of wisdom led leadership Embracing wisdom led leadership does not mean that we have to forgo what performance management vision goals and accountability procedures seek to achieve It just means that these desired outcomes need to be achieved differently

Humans and Animals: Intersecting Lives and Worlds Anja Höing, Arieahn Matamonasa Bennett, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 Relationships between humans and non human animals are deeply complex and often governed by tensions and paradoxes Both wild and domestic metaphorical and real assistants and adversaries animals effortlessly bridge cultural and natural spaces and form an integral part of human lives This volume addresses several currently debated topics in science and culture How shall we rethink rebuild and re envision our relationships with other animals How do we construct ideas of the animal How can we negotiate animal interests against our own In which ways do we make sense and use of animals in human cultural spaces Addressing the non human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective the chapters within this volume do not seek to answer these questions but rather to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal human bond

Constructivism and International Relations Stefano Guzzini, Anna Leander, 2005-12-12 This book addresses both Wendt s social theory and international relations theory exploring a variety of

constructivist debates without reducing constructivism to one single position **Global Shift** Edmund J. Bourne, 2009-01-02
A remarkable change is taking place that will profoundly influence the way we see ourselves and our world The dominant materialistic separatist worldview a perspective that leads individuals to value their own needs over the good of the whole is giving way to a humanitarian spiritual orientation This shift will revolutionize both the way humanity interacts on a global scale and how we live on a day to day basis Global Shift co published with the Institute of Noetic Sciences IONS explores the roots of such current planetary crises as climate change diminishing resources poverty and disease and explains how a new convergence of scientific research and spiritual insight is propelling us toward a more enlightened future It also presents a call to actions we can implement now such as voluntary simplicity nonviolent communication caring for our bodies and inclusive global thinking that can foster personal healing and bring our lives into alignment with the needs of the planet and a conscious universe *The Representational and the Presentational* Benny Shanon, 2013-12-03 In this wide ranging book the author presents his critique of the contemporary portrayal of cognition an analysis of the conceptual foundations of cognitive science and a proposal for a new concept of the mind Shanon argues that the representational account is seriously lacking and that far from serving as a basis of cognitive activity representations are the products of such activity He proposes an alternative view of the mind in which the basic capability of the cognitive system is not the manipulation of symbols but rather action in the world His book offers a different outlook on the phenomenon of consciousness and presents a new conception of psychological theory and explanation This revised second edition includes a new Postscript
