Community Organizing for Urban School Reform Dennis Shirley,2010-01-01 Observers of all political persuasions agree that our urban schools are in a state of crisis Yet most efforts at school reform treat schools as isolated institutions disconnected from the communities in which they are embedded and insulated from the political realities which surround them Community Organizing for Urban School Reform tells the story of a radically different approach to educational change Using a case study approach Dennis Shirley describes how working class parents public school teachers clergy social workers business partners and a host of other engaged citizens have worked to improve education in inner city schools Their combined efforts are linked through the community organizations of the Industrial Areas Foundation which have developed a network of over seventy Alliance Schools in poor and working class neighborhoods throughout Texas This deeply democratic struggle for school reform contains important lessons for all of the nation s urban areas It provides a striking point of contrast to orthodox models of change and places the political empowerment of low income parents at the heart of genuine school improvement and civic renewal

After Redlining Rebecca K. Marchiel,2021-09-05 The story of how American banks helped disenfranchise nonwhite urbanities and condemn to blight the very neighborhoods that needed the most investment is infuriating And yet by digging into the history of urban finance Rebecca Marchiel here illuminates how urban activists changed some banks behavior to support investment in communities that they had once abandoned These developments in turn affected federal urban policy and reshaped banks understanding of the role that urban communities play in the financial system The legacy of reinvestment activism is clouded but Marchiel s detailing of it transforms our understanding of the history and significance of community bank relations Provided by publisher

Joint Economic Committee,1983 This Could Be the Start of Something Big Manuel Pastor Jr.,Chris Benner,Martha Matsuoka,2015-10-27 For nearly two decades progressives have been dismayed by the steady rise of the right in U S politics Often lost in the gloom and doom about American politics is a striking and sometimes underanalyzed phenomenon the resurgence of progressive politics and movements at a local level Across the country urban coalitions including labor faith groups and community based organizations have come together to support living wage laws and fight for transit policies that can move the needle on issues of working poverty Just as striking as the rise of this progressive resurgence has been its reception among unlikely allies In places as diverse as Chicago Atlanta and San Jose the usual business resistance to pro equity policies has changed particularly when it comes to issues like affordable housing and more efficient transportation systems To see this change and its possibilities requires that we recognize a new thread running through many local efforts a perspective and politics that emphasizes regional equity Manuel Pastor Jr Chris Benner and Martha Matsuoka offer their analysis with an eye toward evaluating what has and has not worked in various campaigns to achieve regional equity The authors show how momentum is building as new policies addressing regional infrastructure housing and workforce development bring together business and community groups who share a common desire to see their city and region succeed Drawing on a wealth of case studies as well as their own experience in the field Pastor Benner and Matsuoka point out the promise and pitfalls of this new approach concluding that what they term social movement regionalism might offer an important contribution to the revitalization of progressive politics in America

Nonviolent Action Ronald M. McCarthy,Gene Sharp,Brad Bennett,2013-07-04 This comprehensive guide to research sources and theories about nonviolent action as a technique of struggle in social and political conflicts discusses the methods and techniques used by groups in various encounters Although violence and its causes have received a great deal of attention nonviolent action has not received its due as an international phenomenon with a long history An introduction that explains the theories and research used in the study provides a practical guide to this essential bibliography of English language sources The first part of the book covers case study materials divided by region and subdivided by country Within each country materials are arranged chronologically and topically The second major part examines the methods and theory of nonviolent action principled nonviolence and several closely related areas in social science such as conflict analysis and social movements The book is indexed by author and subject *Reformers to Radicals* Thomas Kiffmeyer,2008-10-10 A well researched and vigorously written account of social activism radical politics and the failed War on Poverty in 1960s Appalachia Journal of American History In 1964 a group of young social activists formed the Appalachian Volunteers with the intention of eradicating poverty in eastern Kentucky and the rest of the Southern mountains In *Reformers to Radicals* author Thomas Kiffmeyer documents the history of this organization as their youthful enthusiasm led to radicalism and controversy

These reformers sought to improve the lives of the Appalachian poor while making strides toward economic change in the region. Their efforts included refurbishing schools and homes and offering educational opportunities. But in time these volunteers faced nationwide accusations that they were seditious and un-American. After losing the support of the federal and state governments and of many Appalachian people, the group disbanded in 1970. *Reformers to Radicals* examines the various factors that led to the Appalachian Volunteers' ultimate failure, from infighting within their ranks to tensions with the very people they sought to help. It chronicles a critical era in Appalachian history and investigates the impact the 1960s reform attitude had on the region. Catalog of Copyright Entries. Third Series Library of Congress. The Public Opinion Process Irving Crespi, 2013-11-05 What is public opinion? How can we best study it? This work presents a process model that answers these questions by defining public opinion in a way that also identifies an approach to studying it. The model serves as a framework into which the findings of empirical research are integrated, producing a comprehensive understanding of public opinion that encompasses the congeries of middle-range theories that have emerged from empirical research. The three-dimensional process model and the way it is explicated satisfies the diverse and sometimes divergent needs and interests of political scientists, sociologists, social psychologists, and communication specialists who study public opinion. This is achieved by clearly differentiating and interrelating the following: individual opinions, the judgmental outcomes of a process in which attitudinal systems comprised of beliefs, values, interests, and feelings function as intervening variables that direct and structure perceptions of public issues; collective opinions, the outcomes of communication from which mutual awareness emerges and that integrate separate individual opinions into a significant social force; and political roles of collective and individual opinions, the outcomes of the extent to which collective and individual opinions have achieved legitimacy as the basis for governing a people. **DON'T USE THIS PARAGRAPH FOR GENERAL CATALOGS** Each dimension of the model has its corresponding subprocess: transactions between individuals and their environments; communications among individuals and collectives; and political legitimation of public opinion. Since the process model is by definition interactional, none of the three dimensions has theoretical or sequential priority over the others. Instead of treating the psychological, political, and sociological aspects of public opinion as separate stages of an unidirectional process, the three aspects are modeled as dimensions of a complex, ongoing system in continuous interaction with each other. This conceptualization satisfies the need for a truly interdisciplinary theory in that it demands that each dimension be studied in terms of its defining subprocess. It also avoids the twin errors of reductionism and reification in the study of public opinion. **Housing and Planning References**, 1975 Ethnic Chicago Melvin Holli, Peter d'Alroy Jones, 1995-05-19 A study of ethnic life in the city, detailing the process of adjustment, cultural survival, and ethnic identification among groups such as the Irish, Ukrainians, African Americans, Asian Indians, and Swedes. New to this edition is a six-chapter section that examines ethnic institutions.

approaches as inextricably intertwined While common wisdom holds that the New Left rejected all state involvement as cooptative at best Jennifer Frost traces the ways in which New Left and community activists did in fact put forward a prescriptive even visionary alternative to the welfare state After Students for a Democratic Society and its community organizing unit the Economic Research and Action Project disbanded New Left and community participants went on to apply their strategies and goals to the welfare rights women s liberation and the antiwar movements In her study of activism before the age of identity politics Frost has given us the first full fledged history of what was arguably the most innovative community organizing campaign in post war American history
